

Shoulder scales

MVC

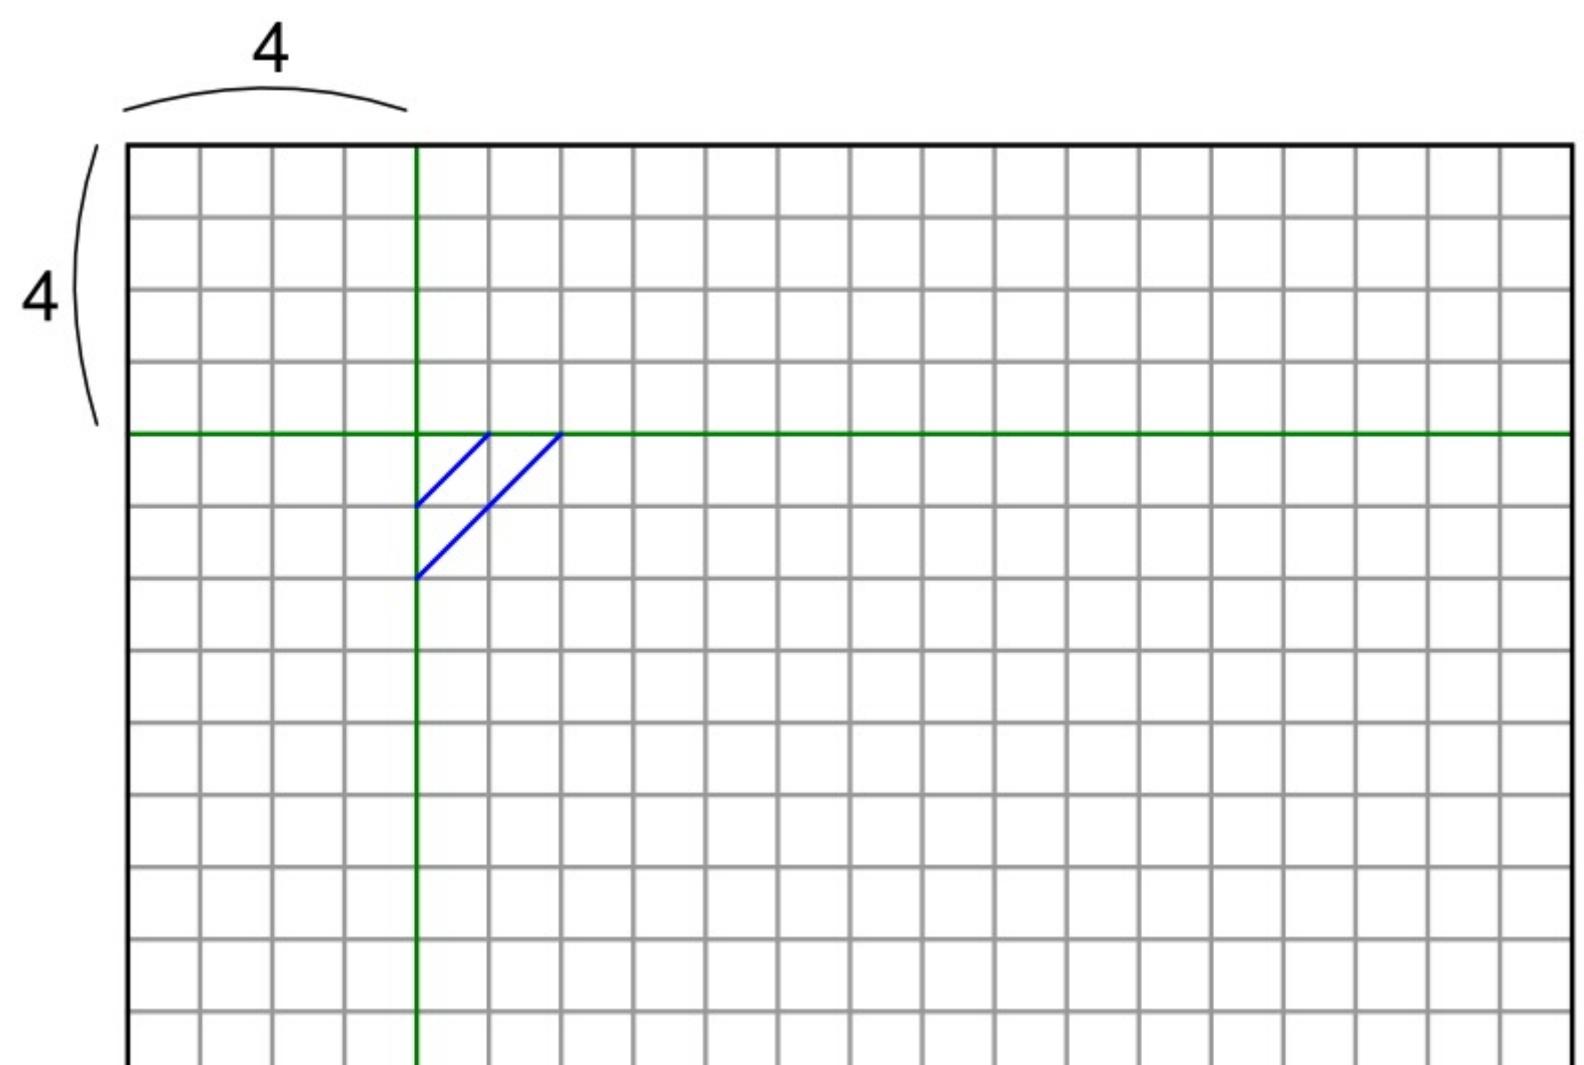

20 x 20 grid

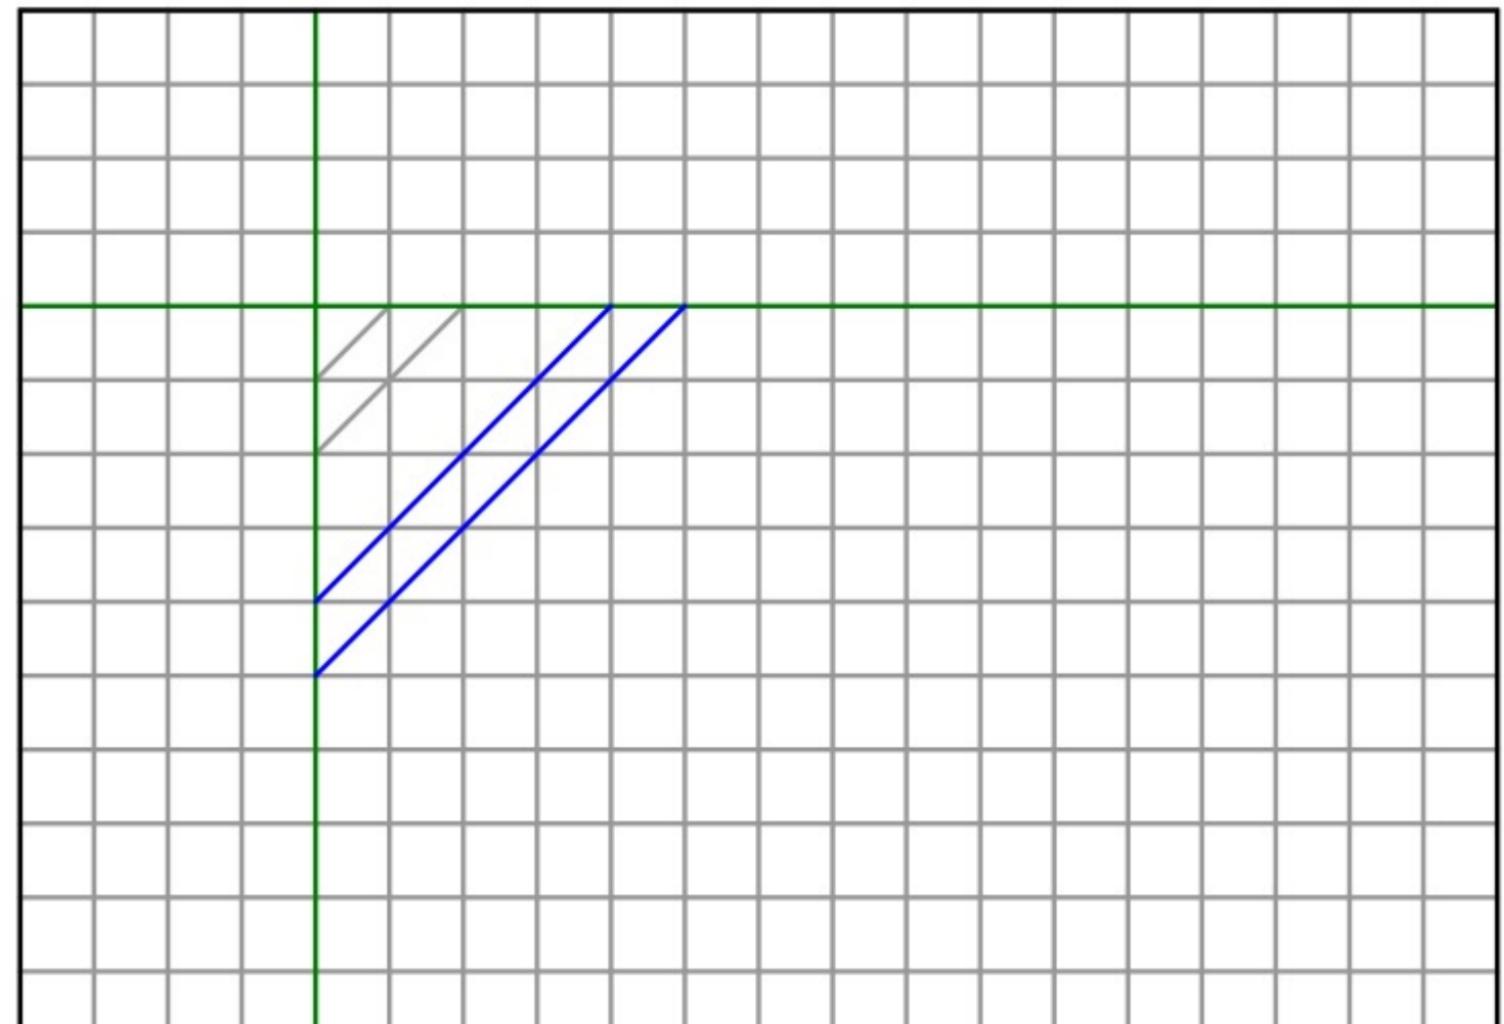

Crease direction
not important

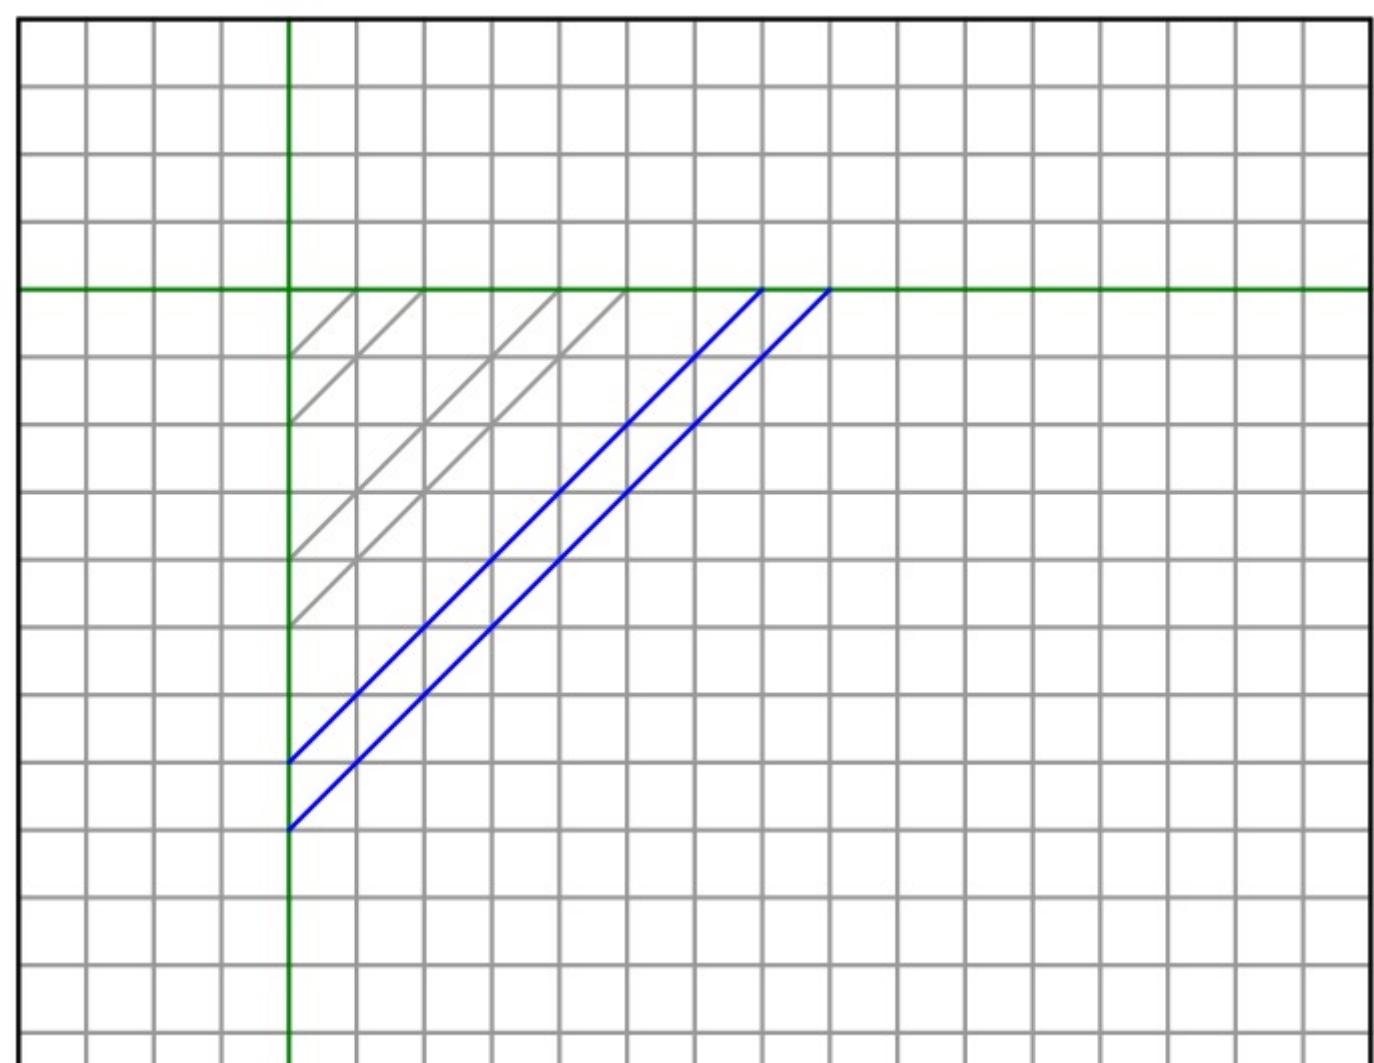

MVC

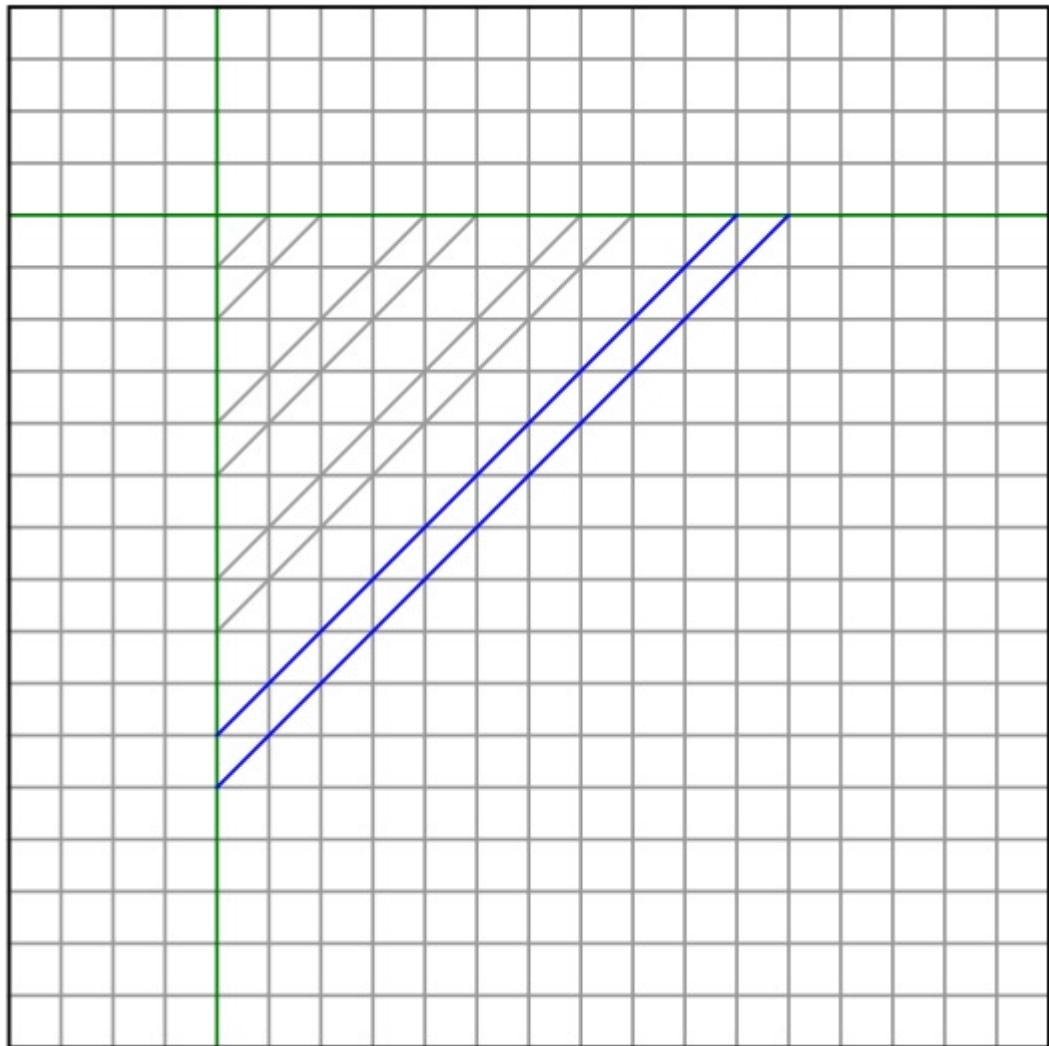

(w)

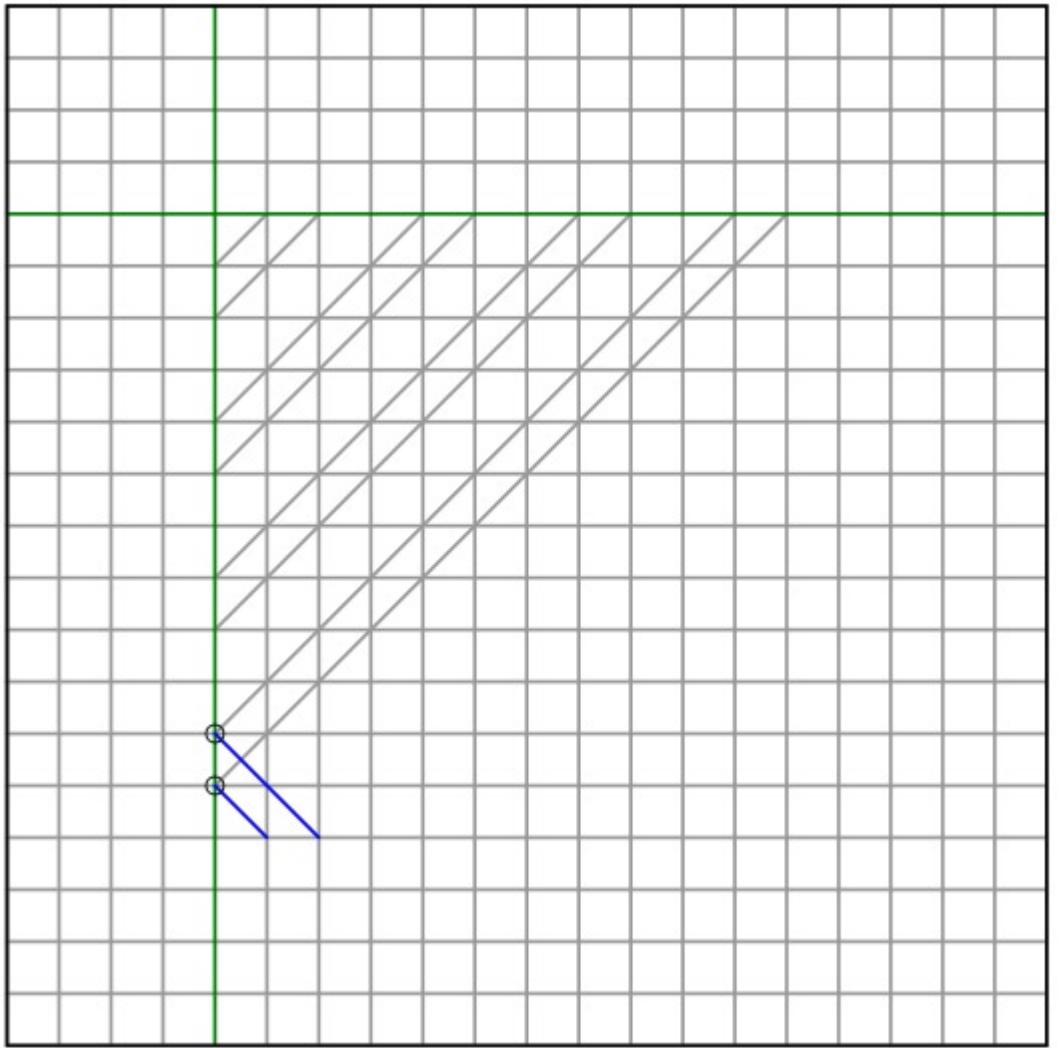

Fold or score
the following
precreases on the
white side-

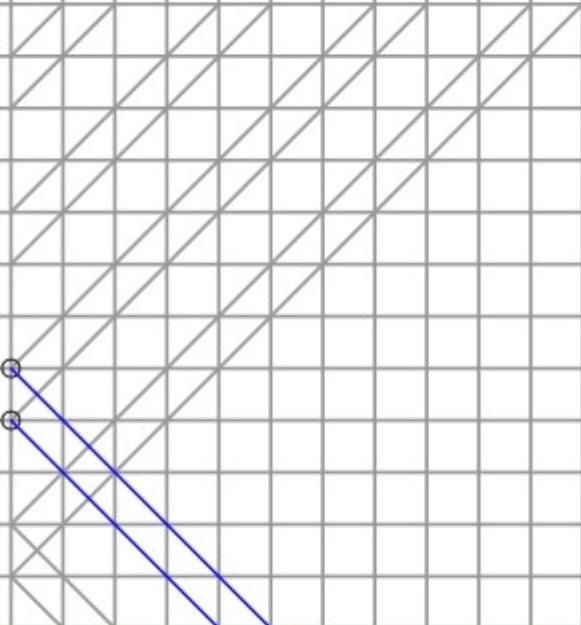

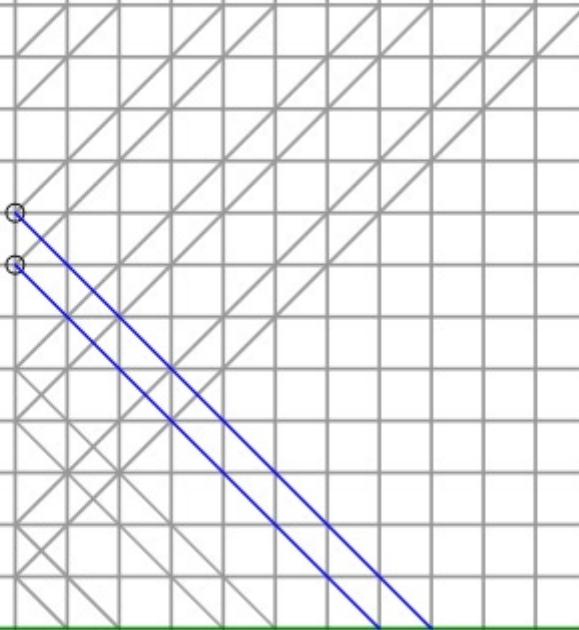

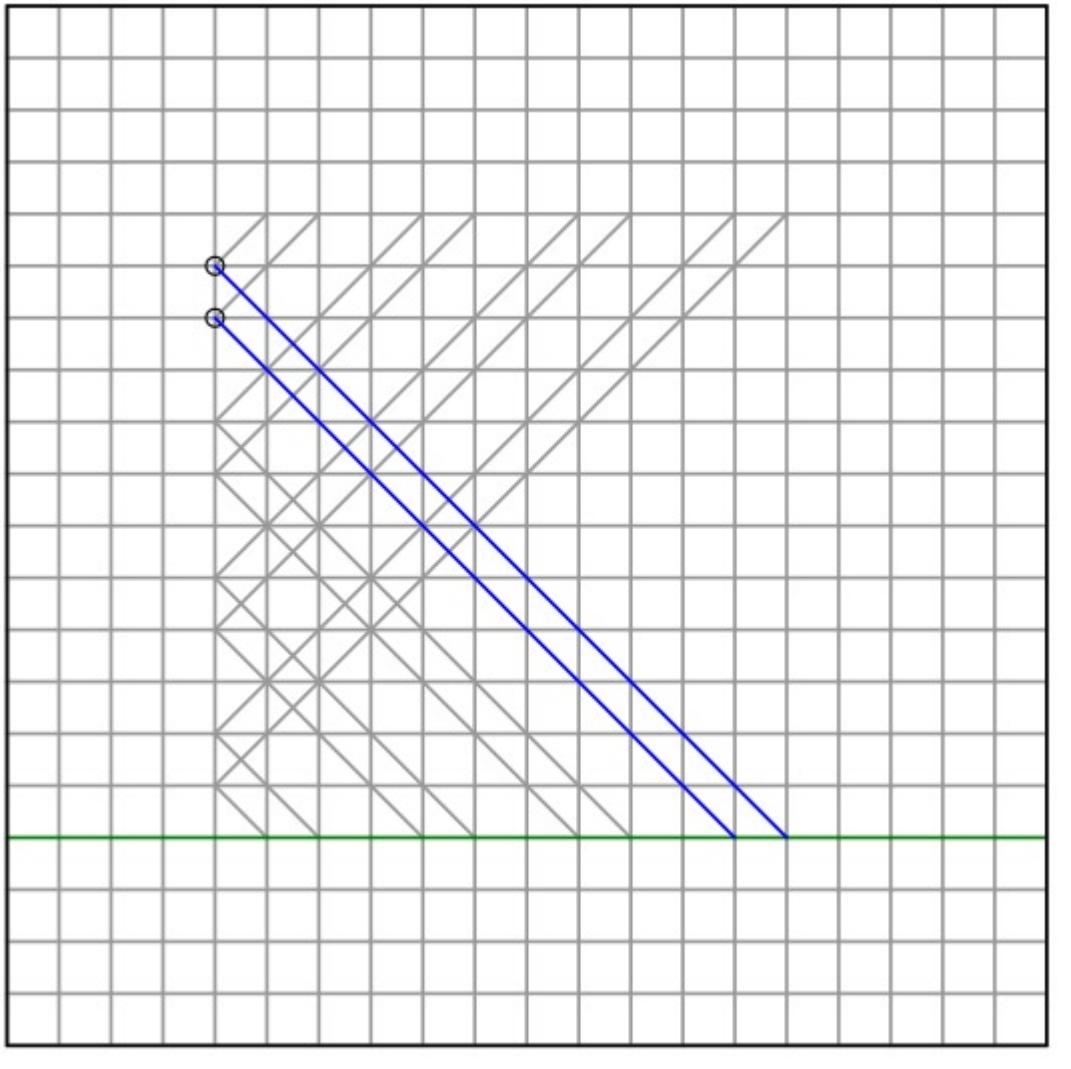

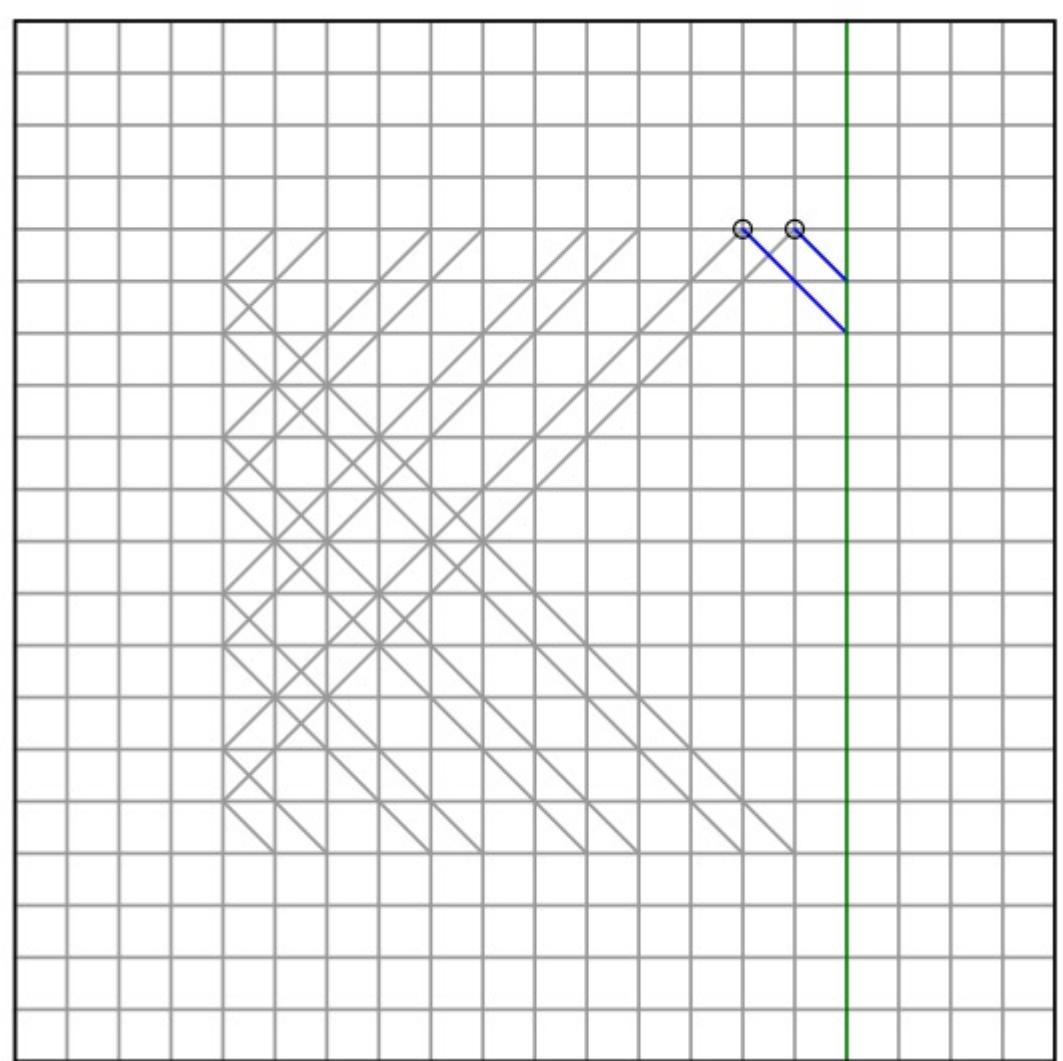

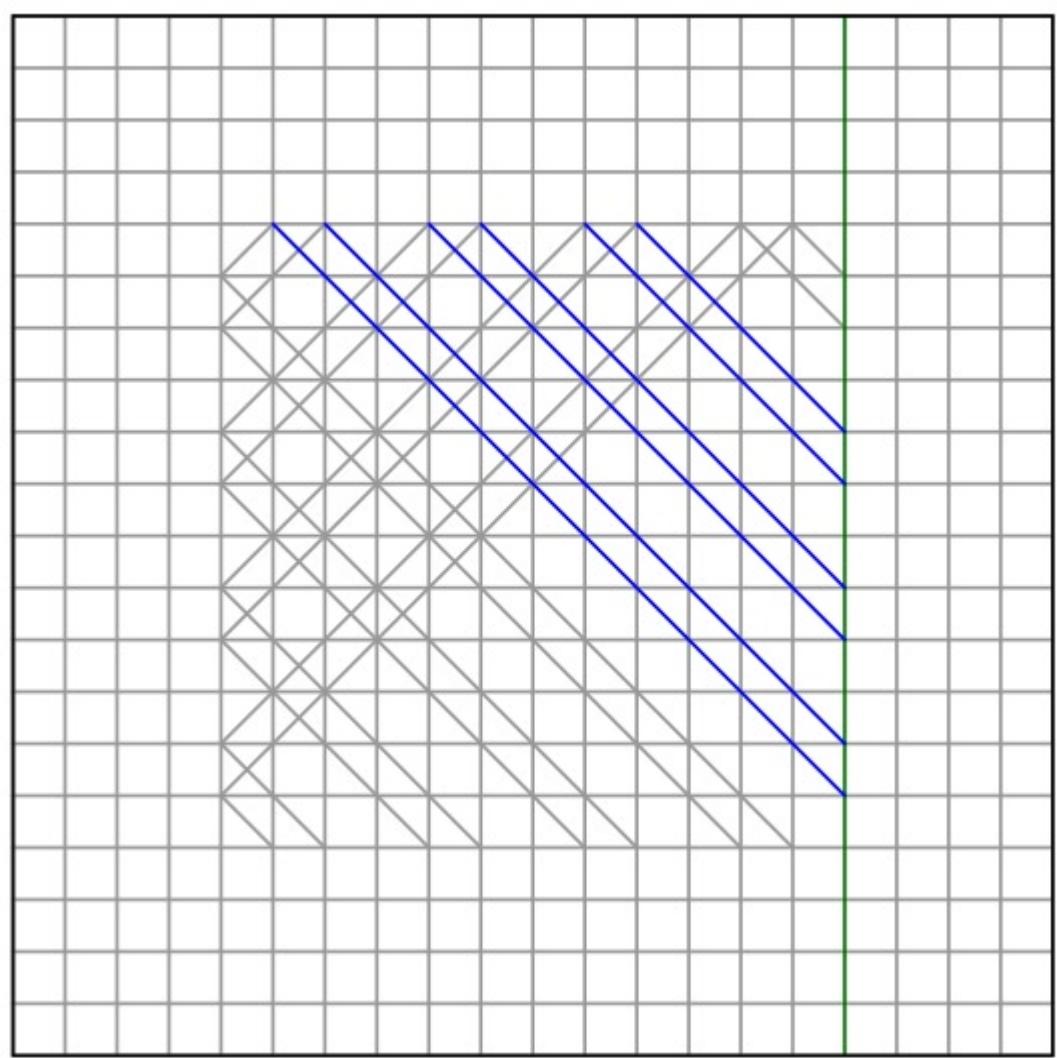

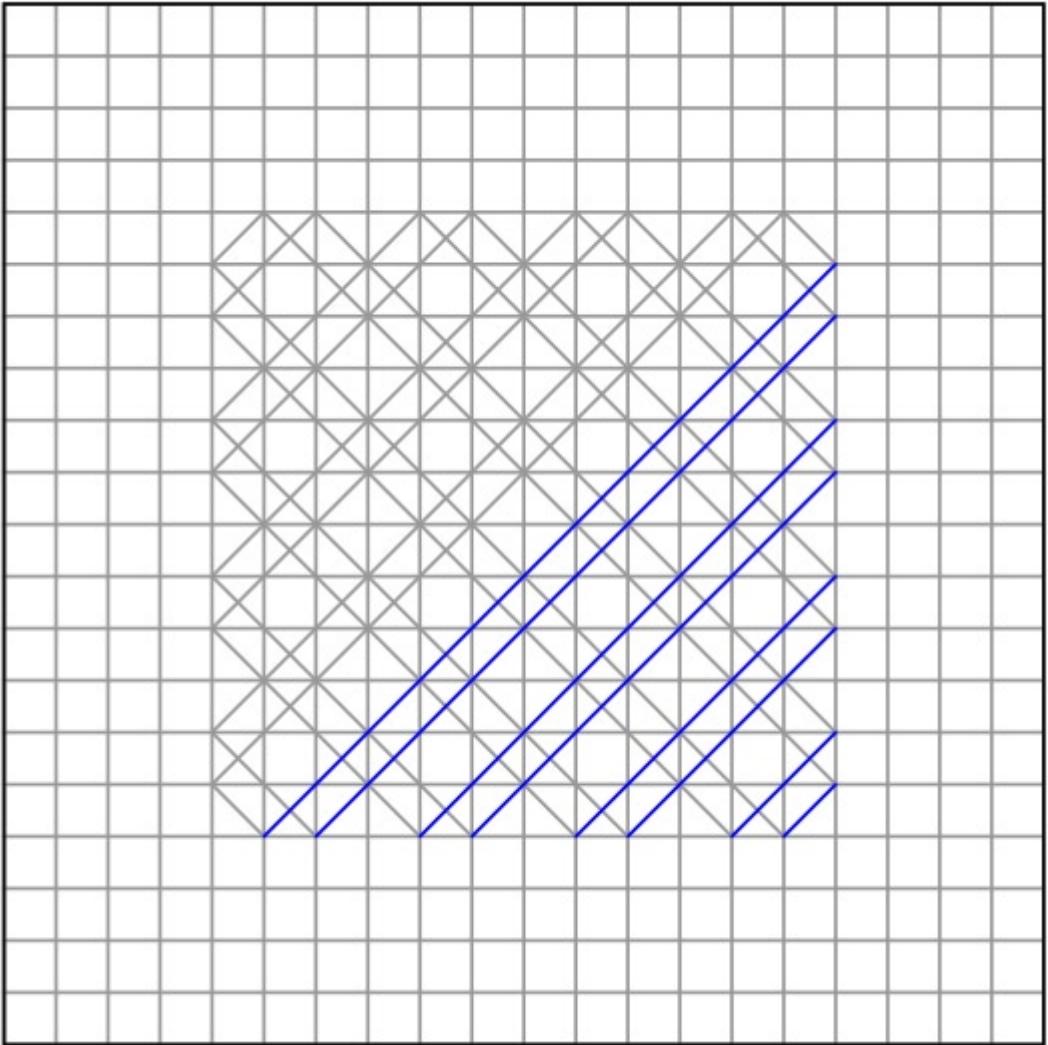

($-1, 1$)

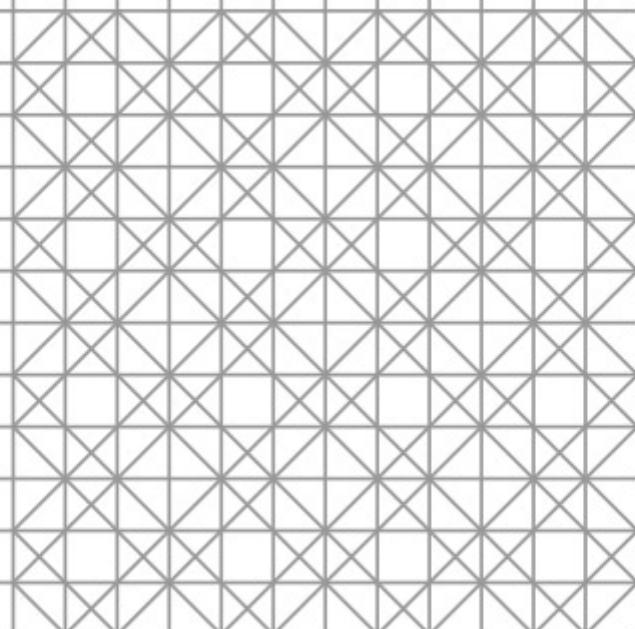

($0, 0$)

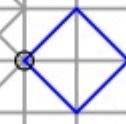

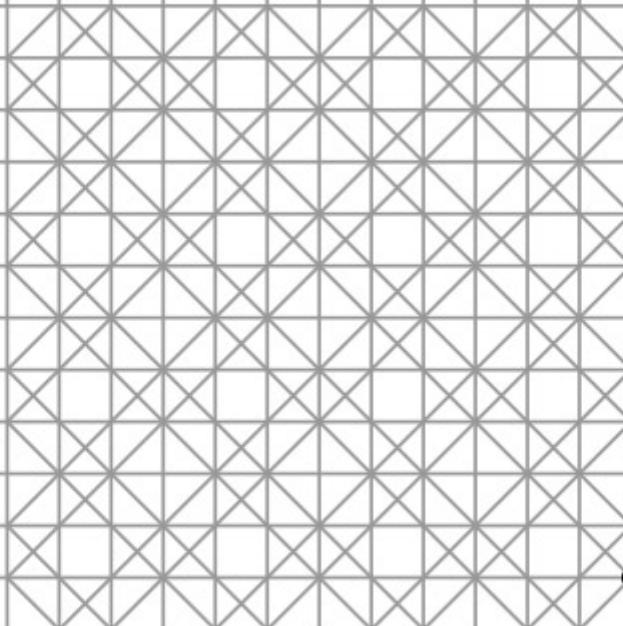

x

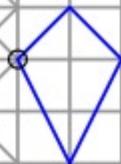

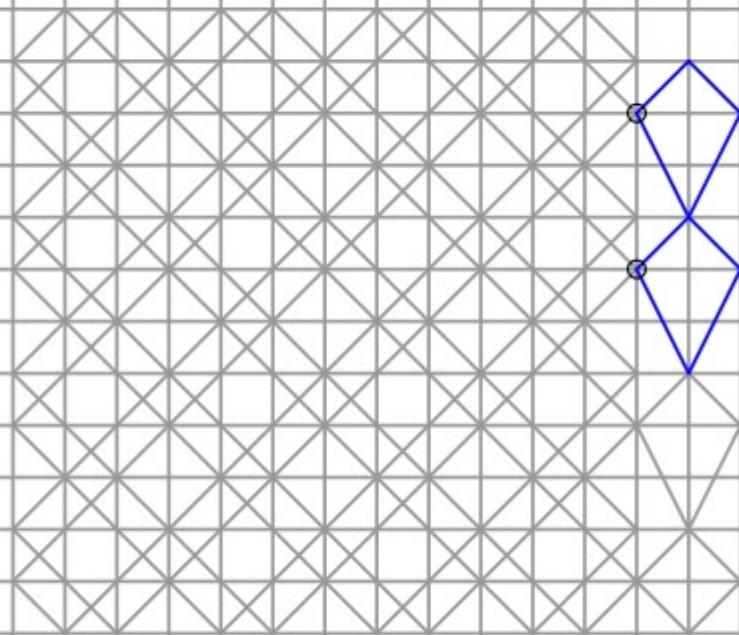

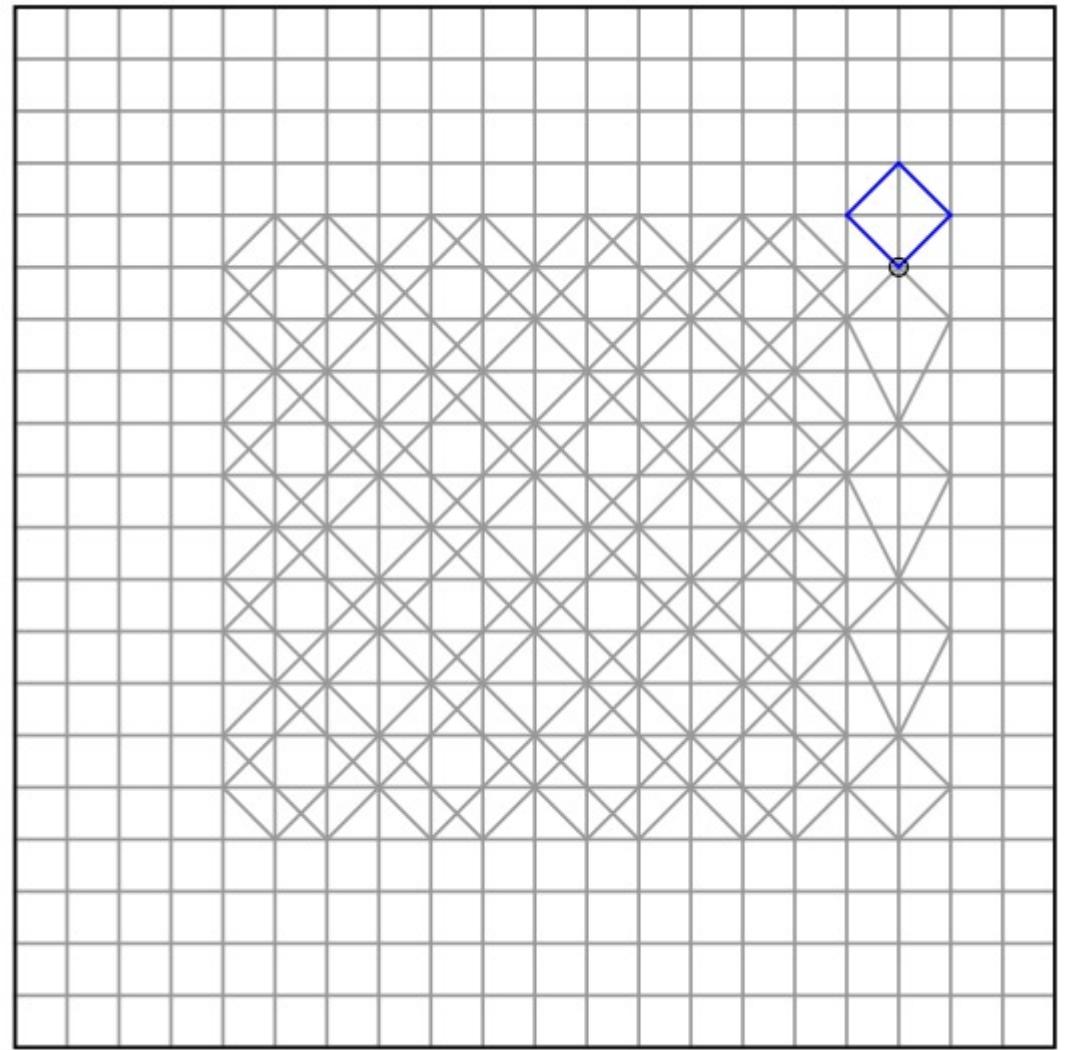

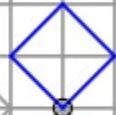

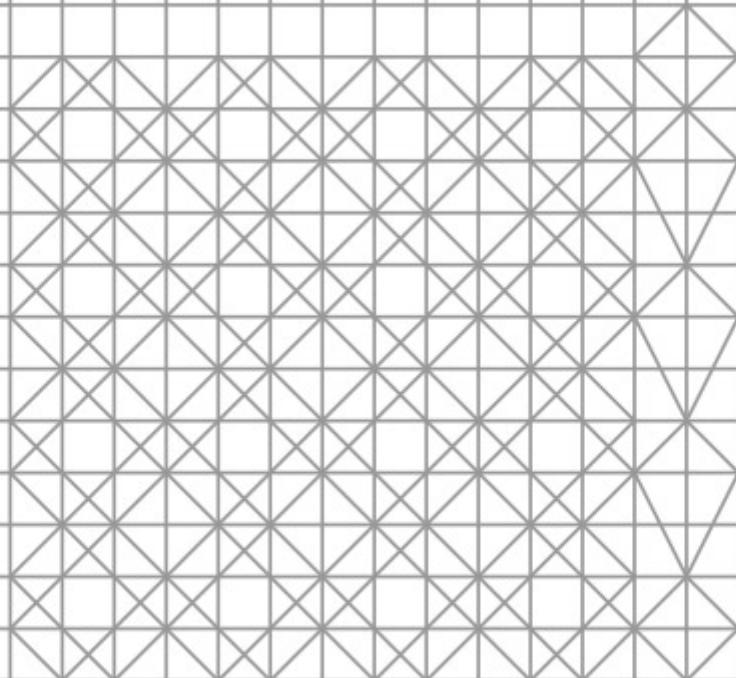

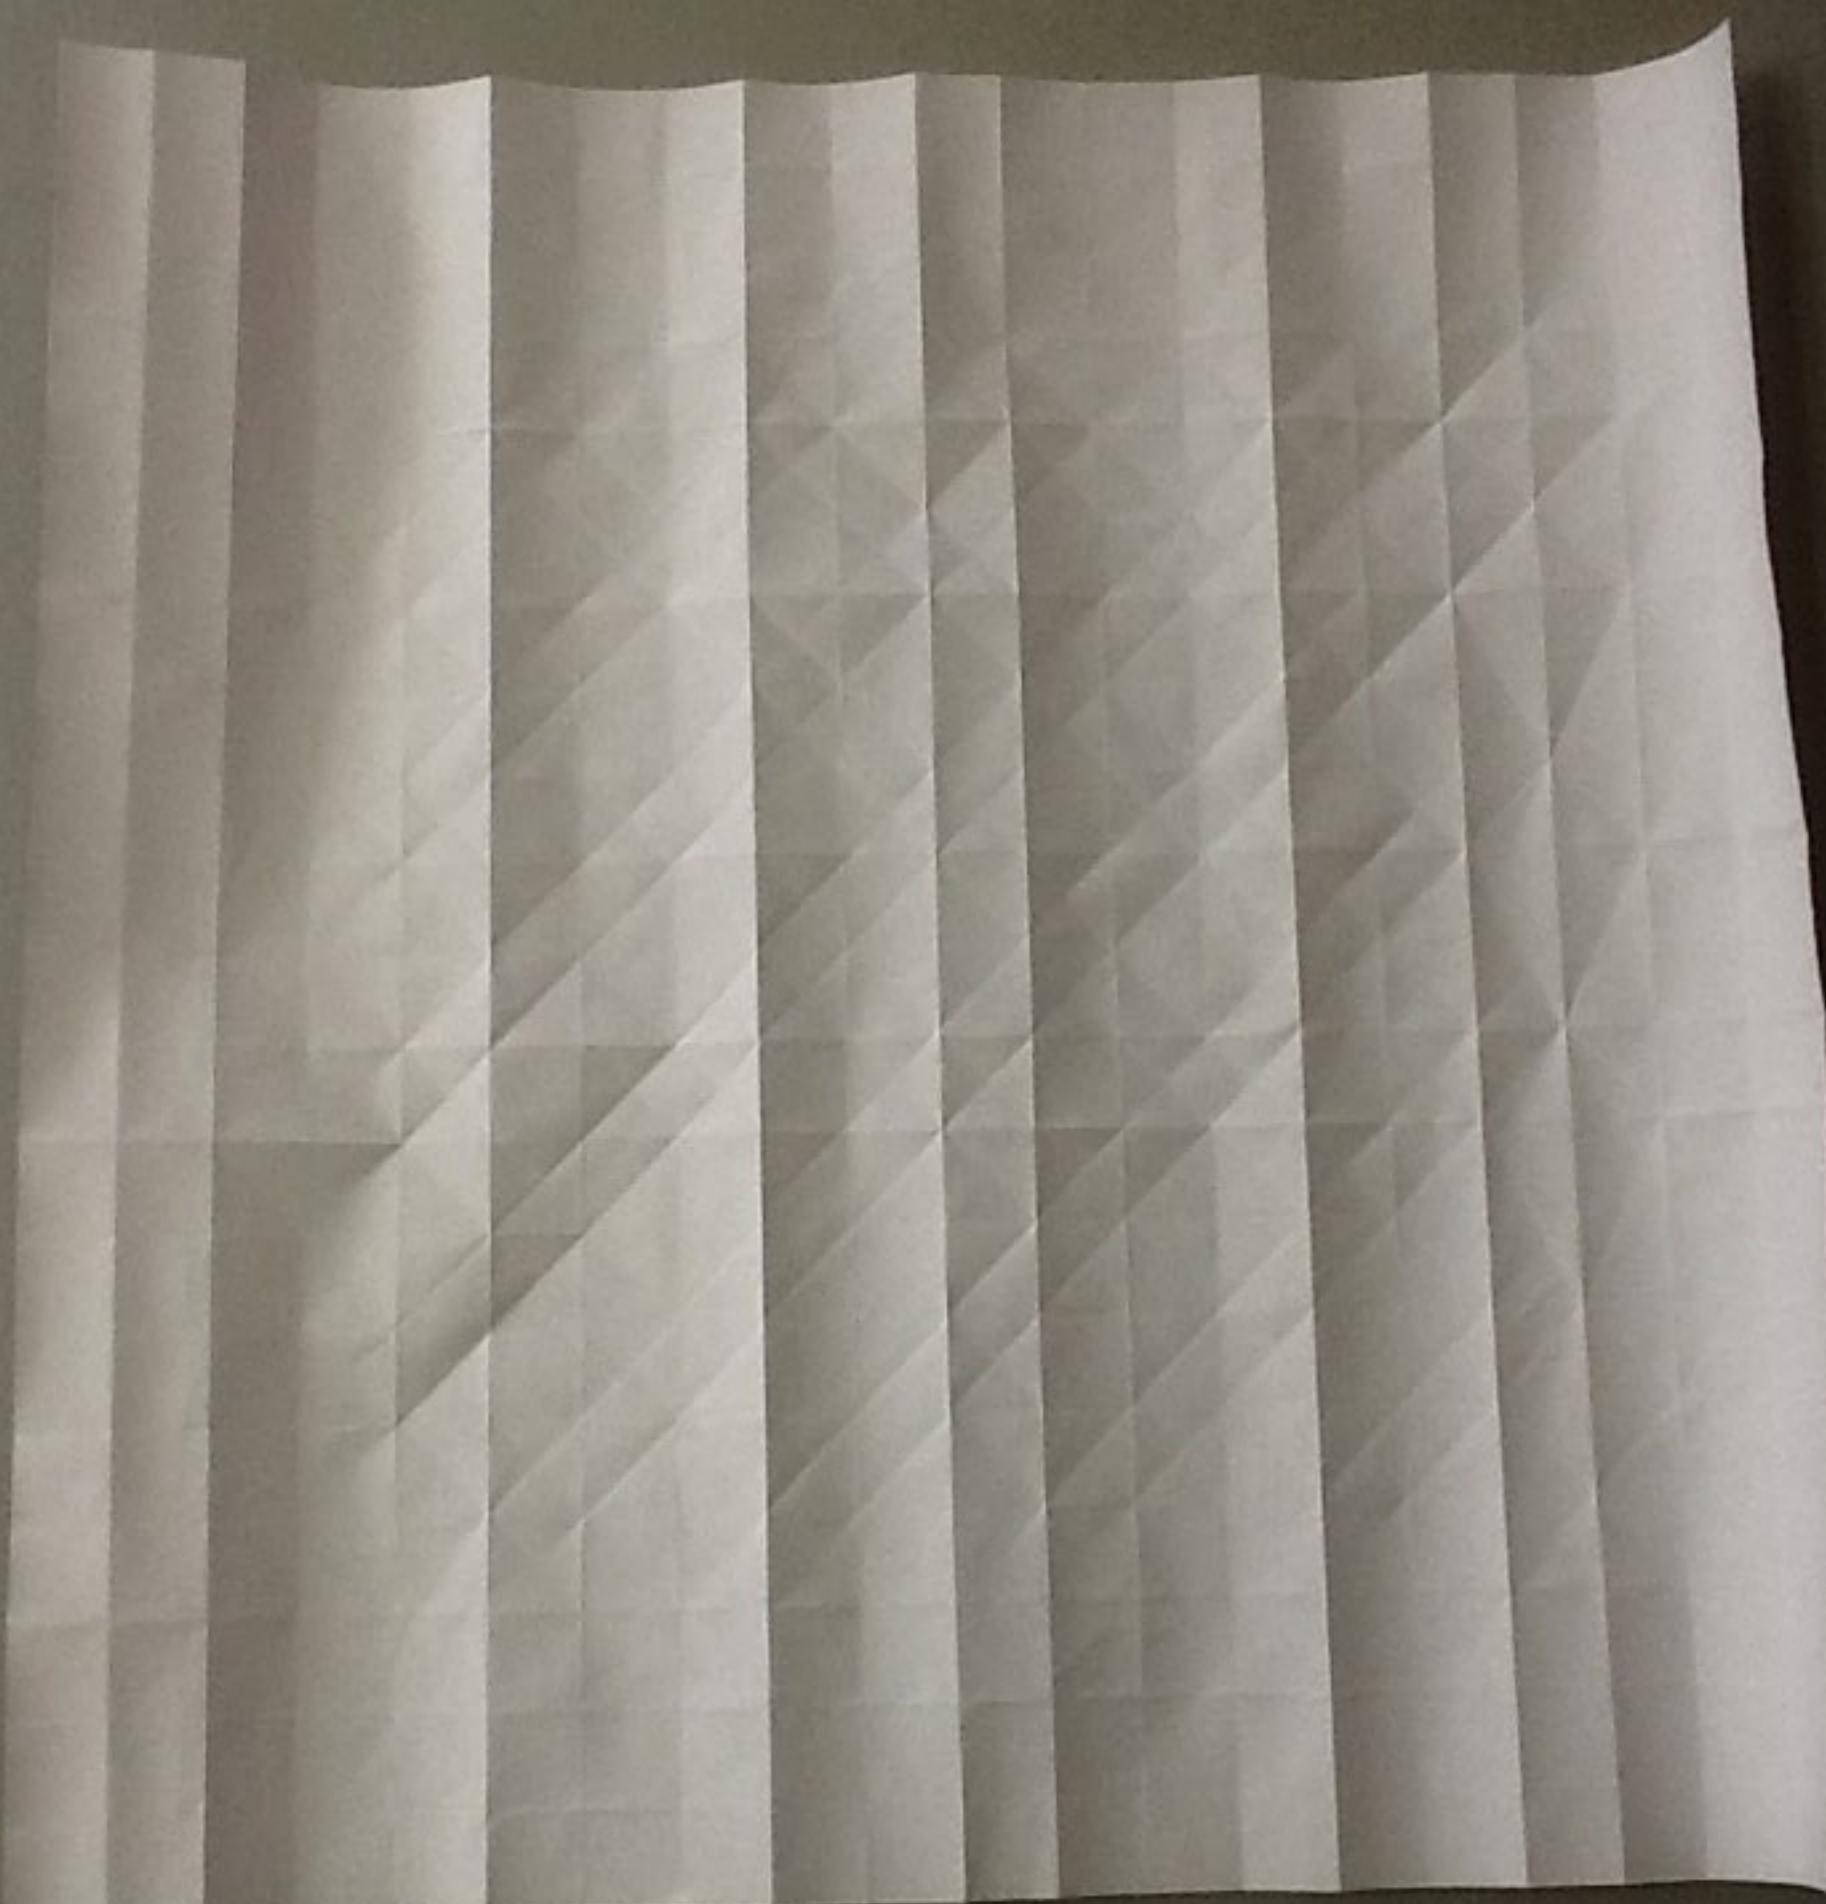

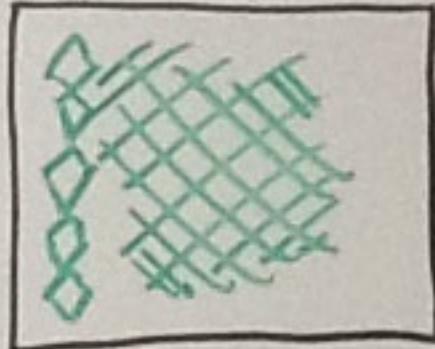

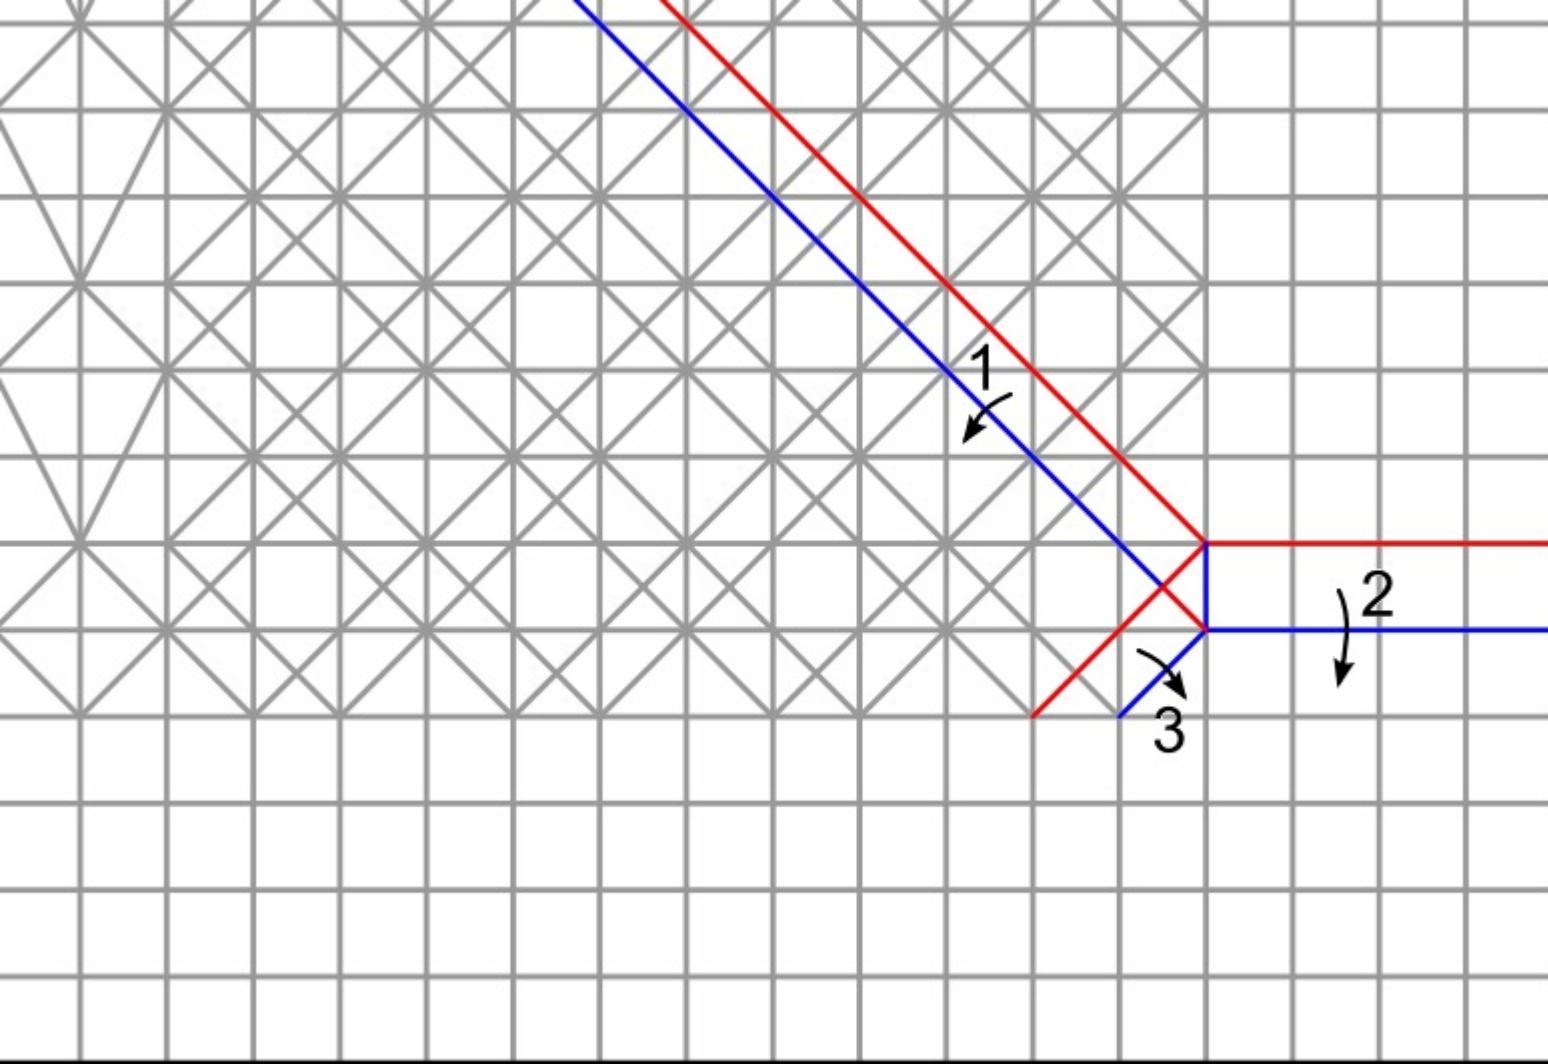

(c)

MVC

Collapse creases
on the colored
side-

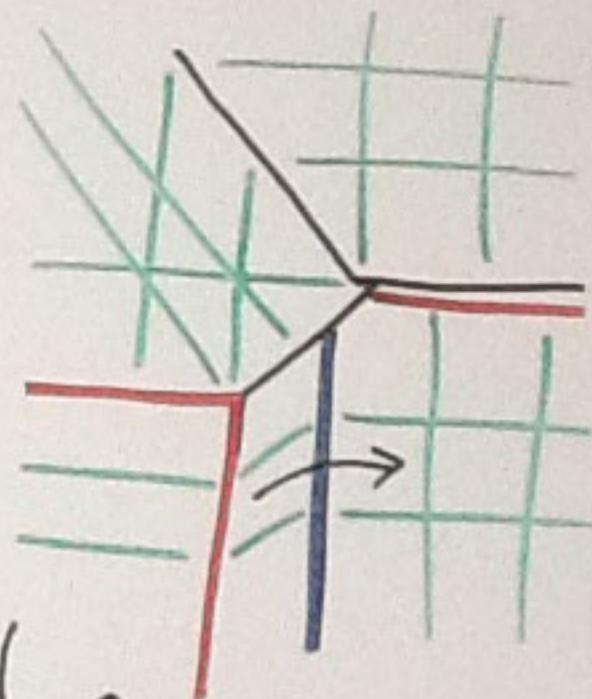

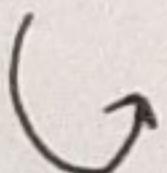

MVC

⑥

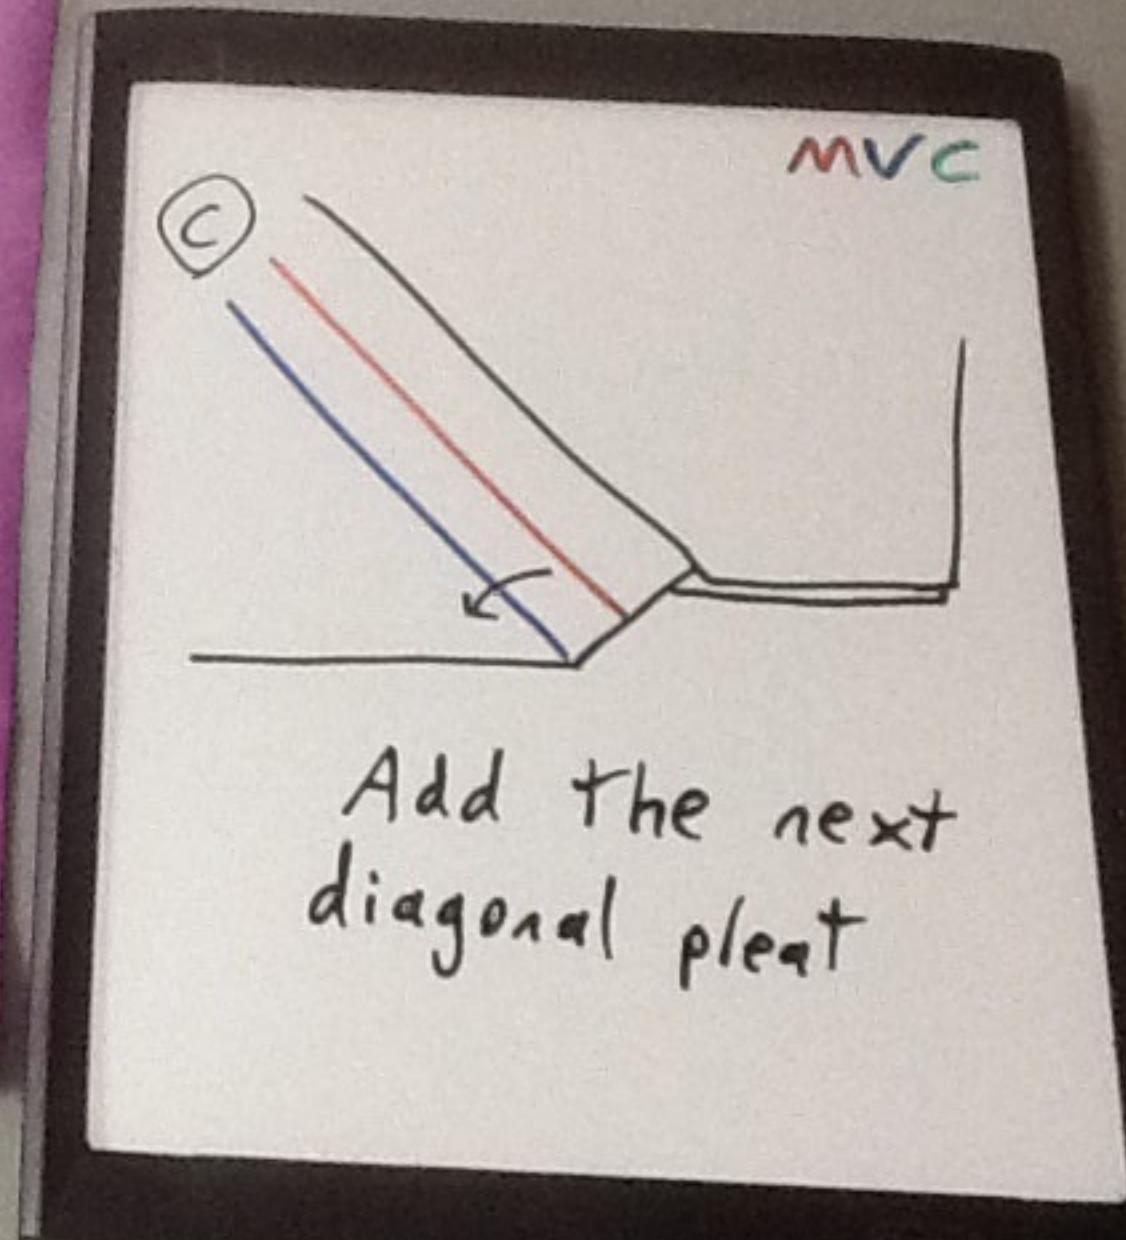

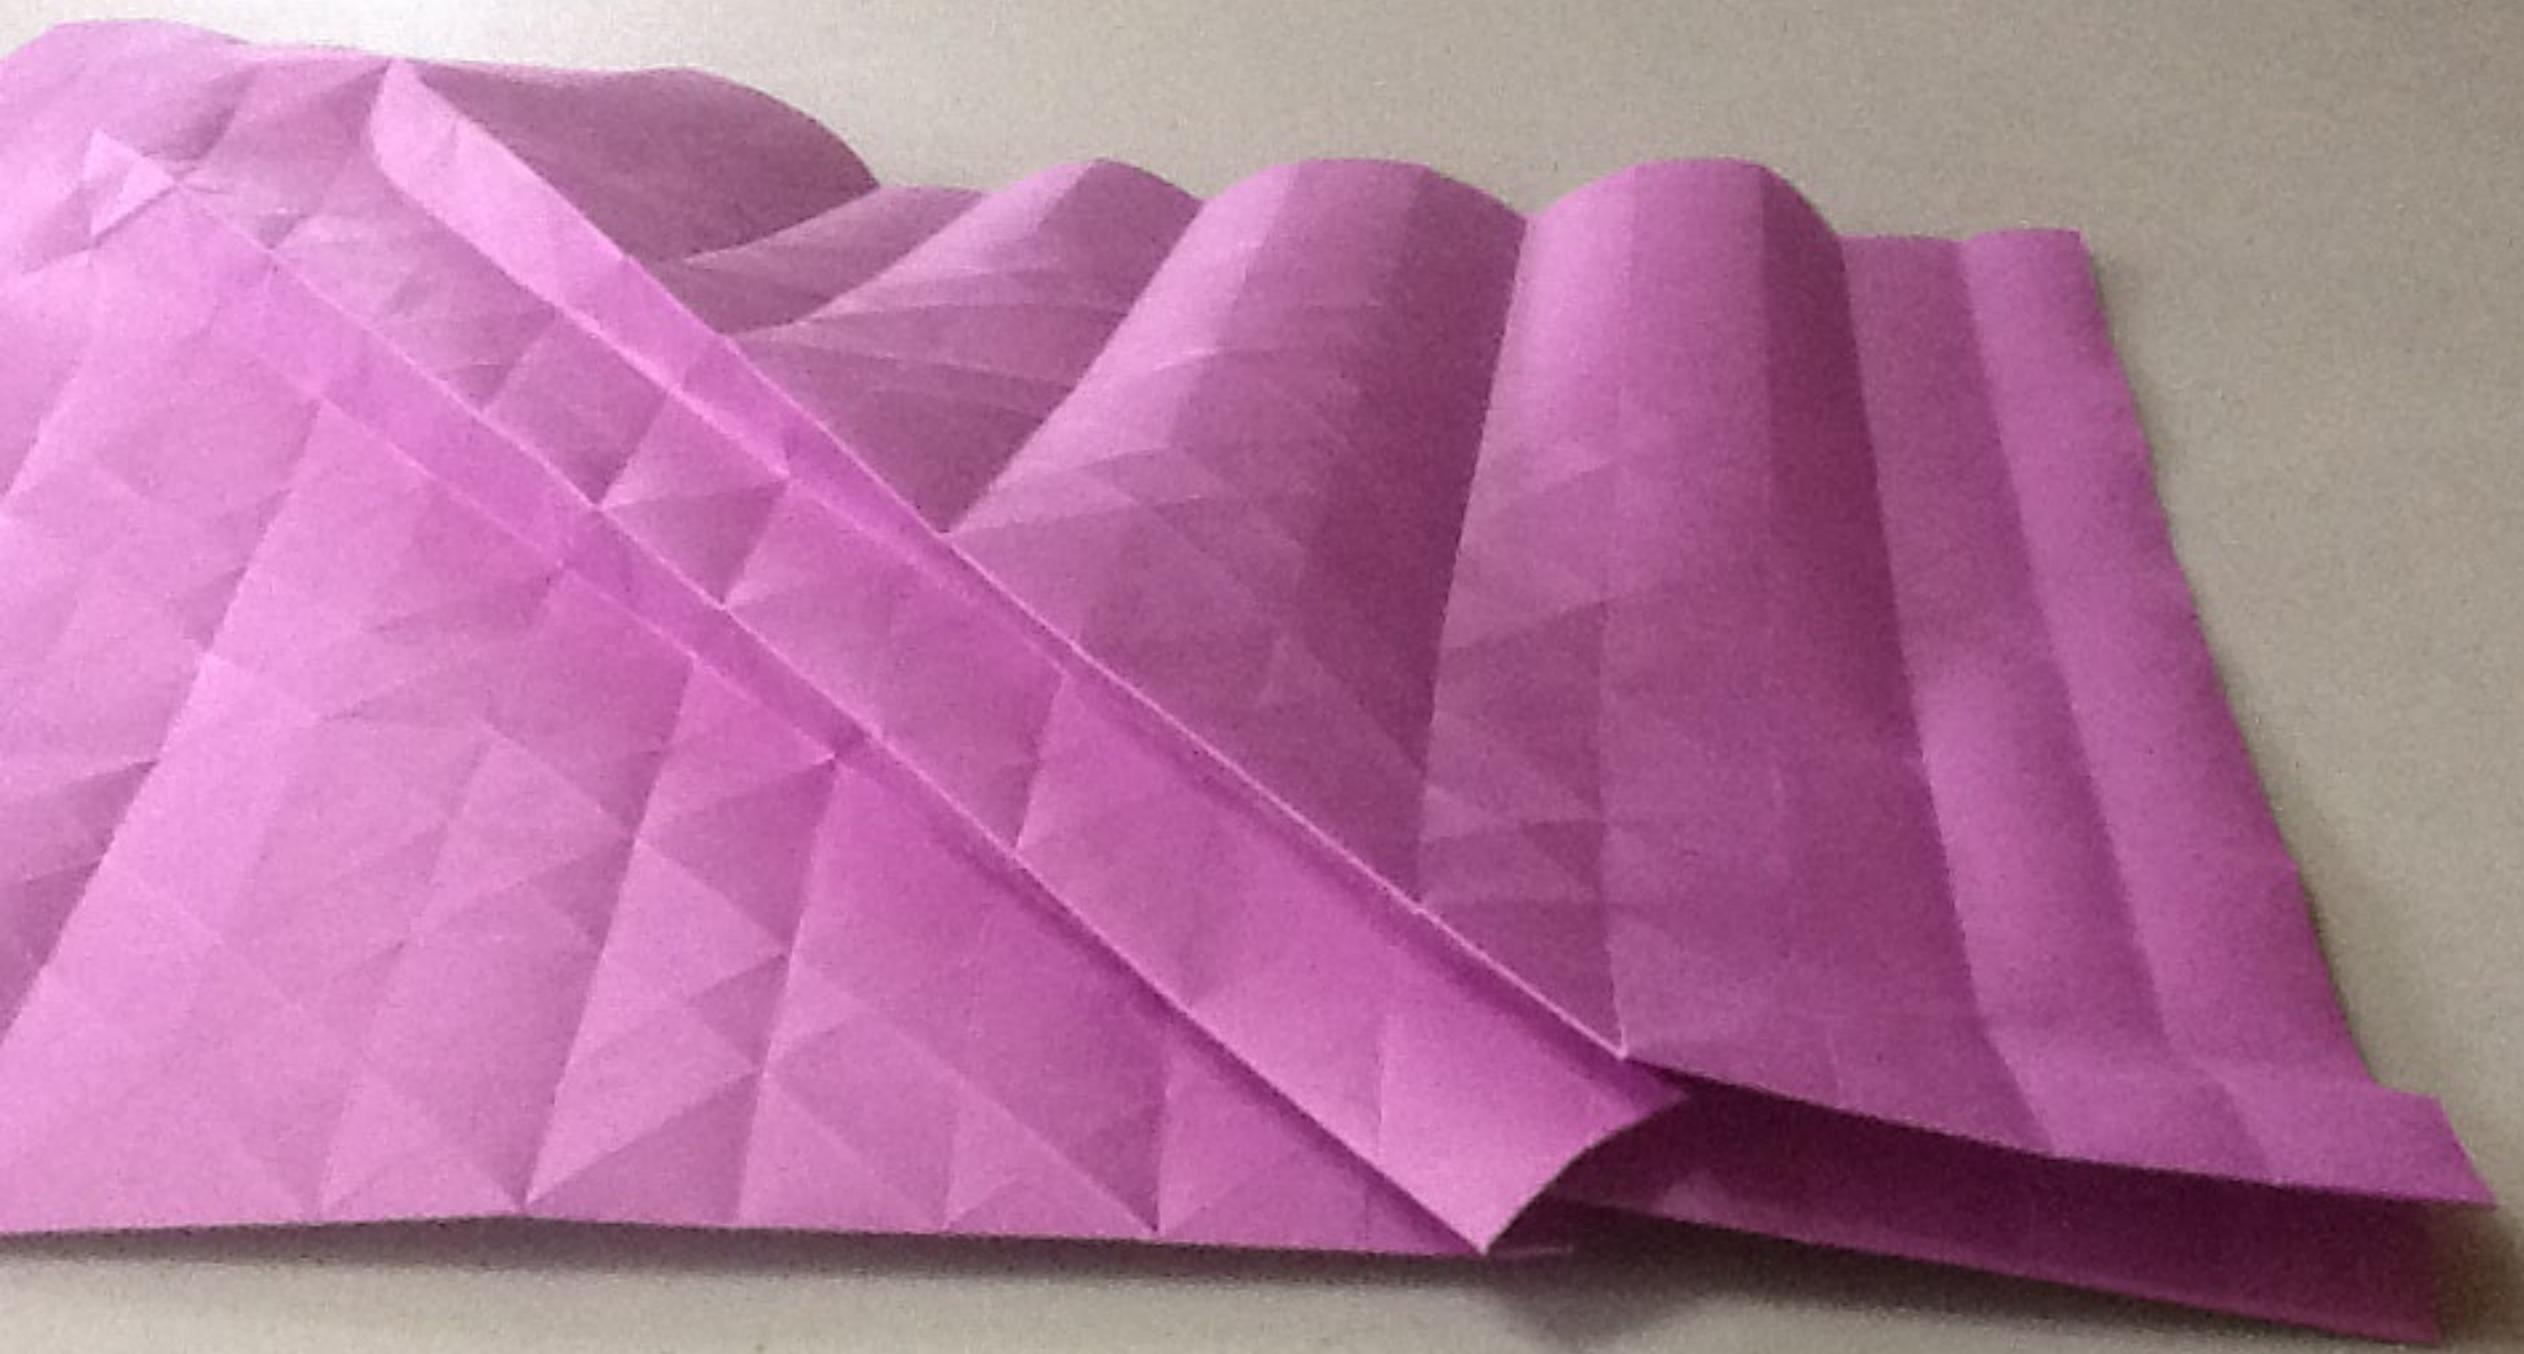

As you fold
the lower part back-

⑥

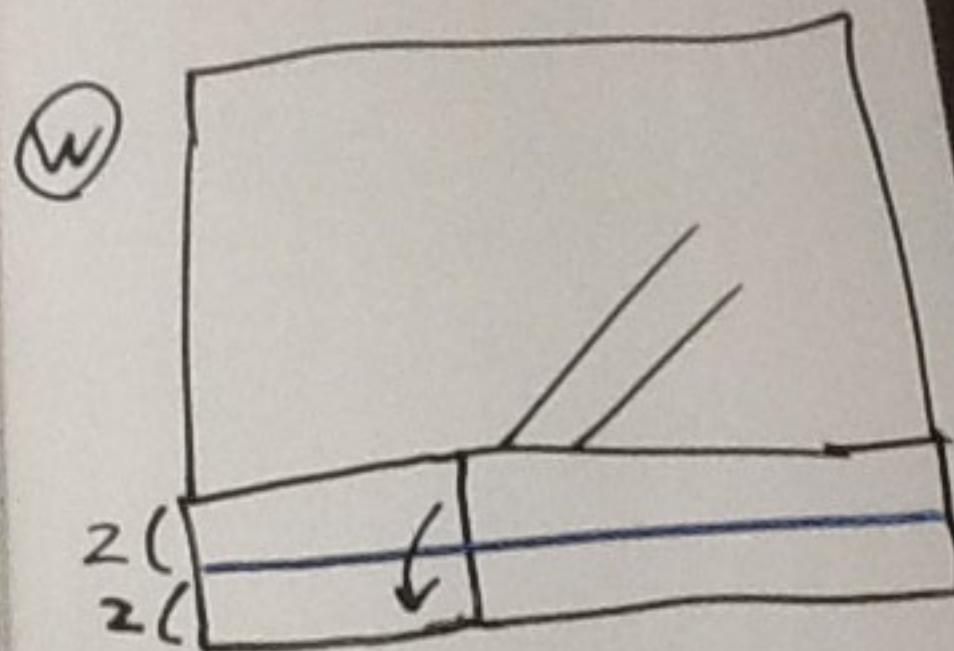

the lower

MVC

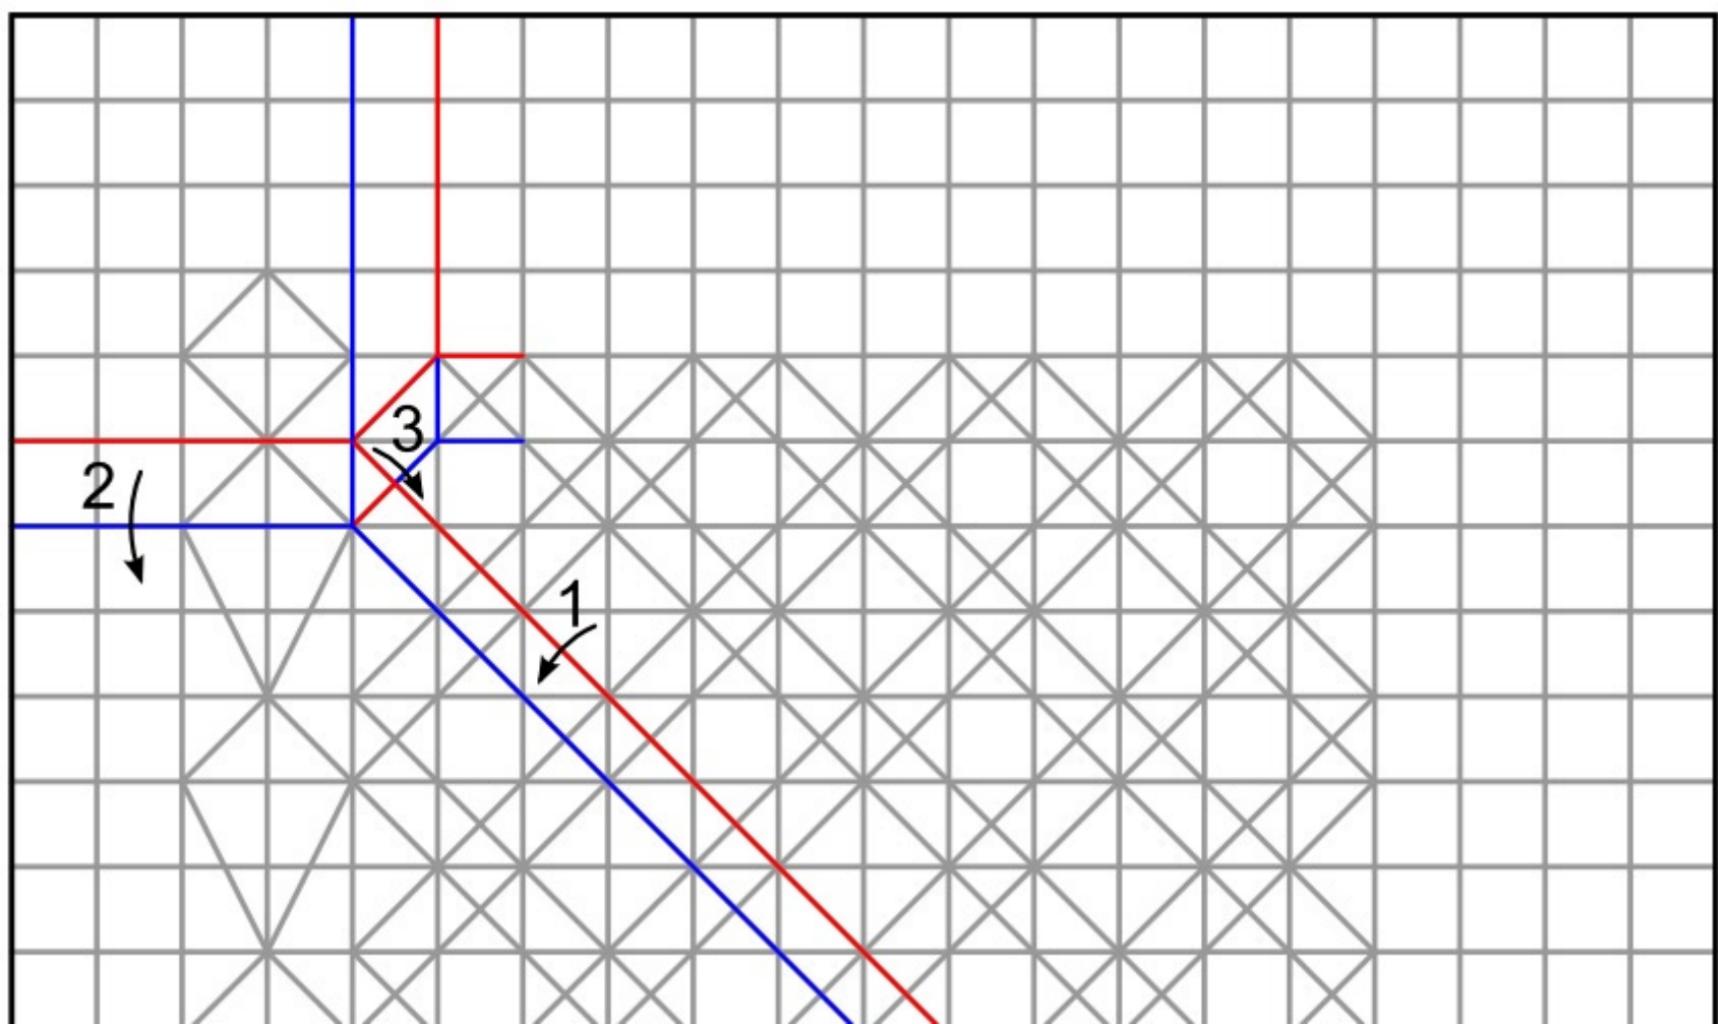

Fold down to secure
the new pleat

mvc

(C)

Resume collapse
on the colored
side-

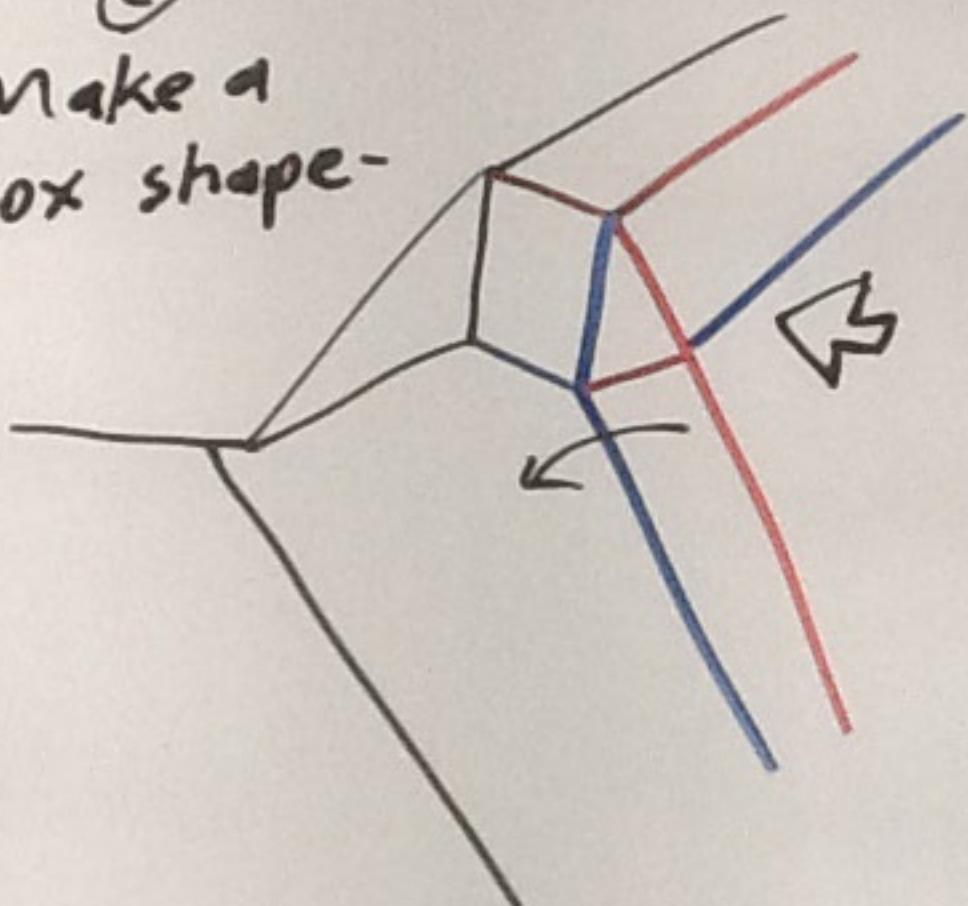

c
make a
box shape-

MVC

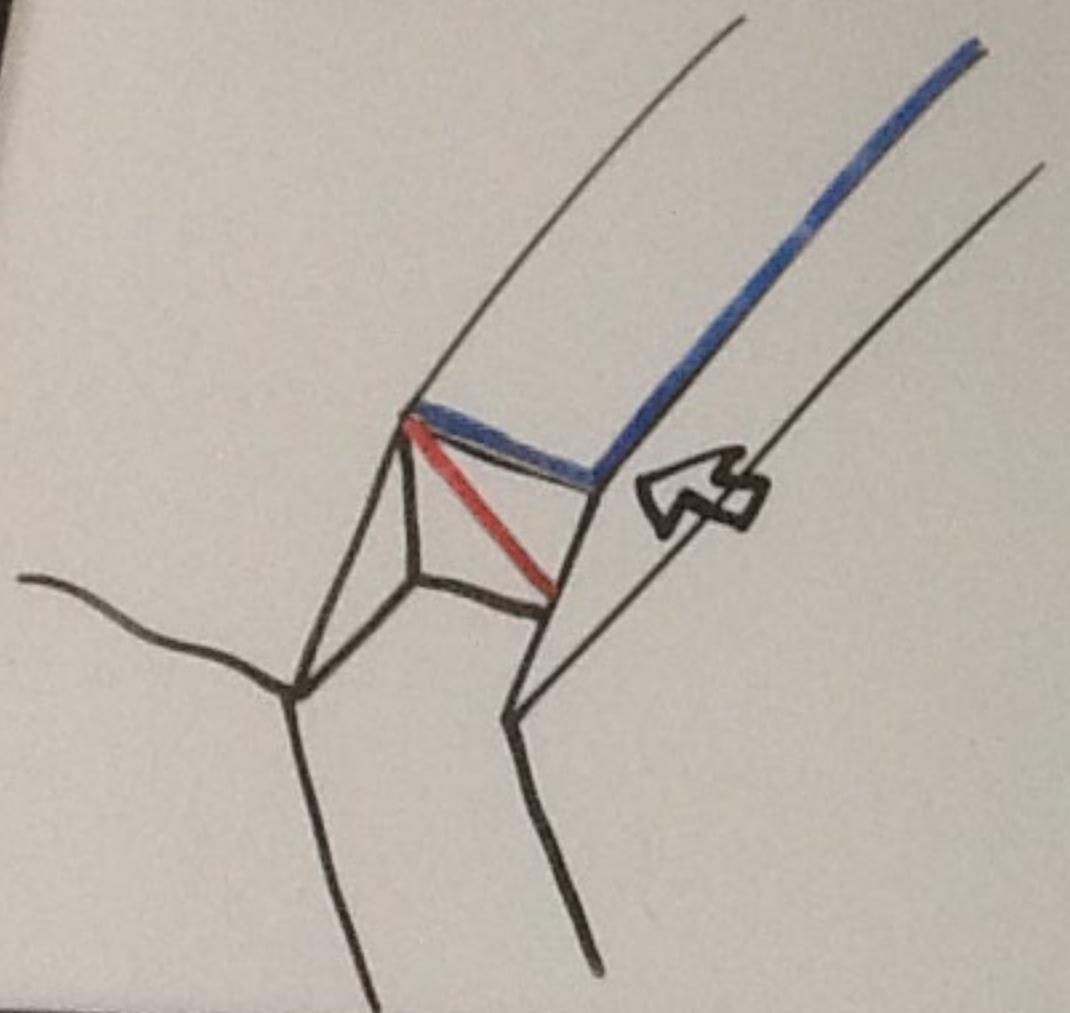

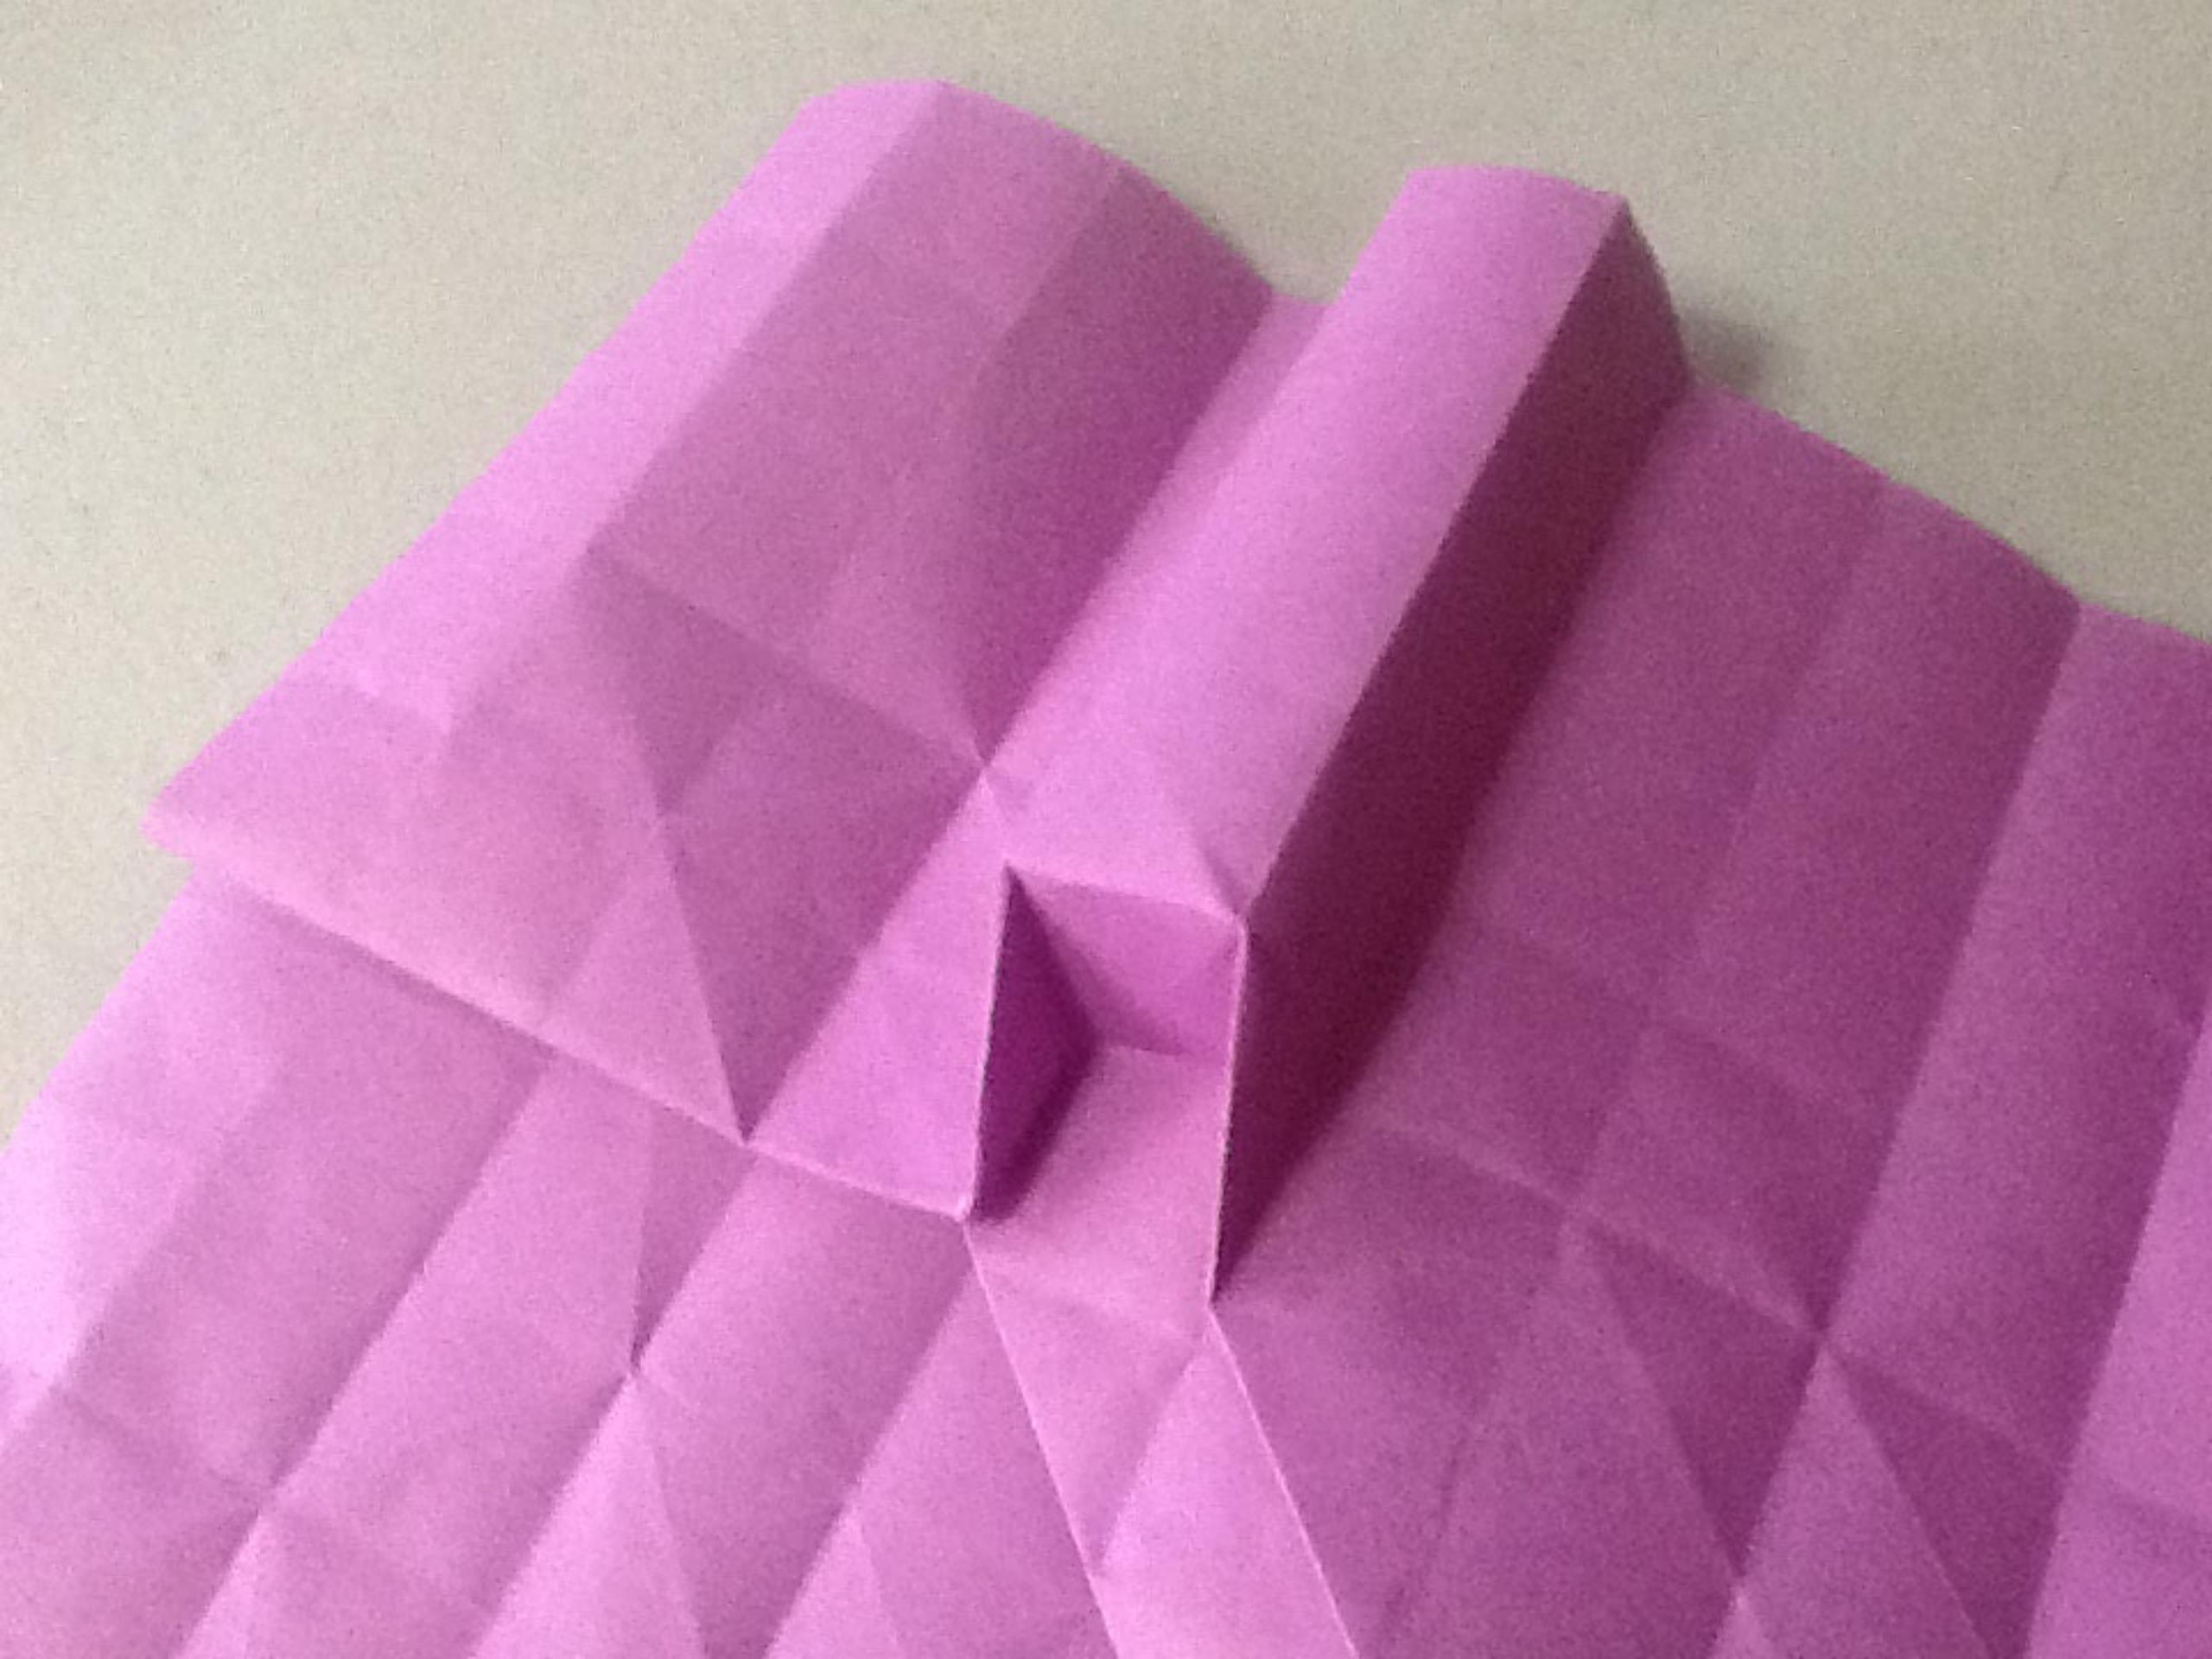

MVC

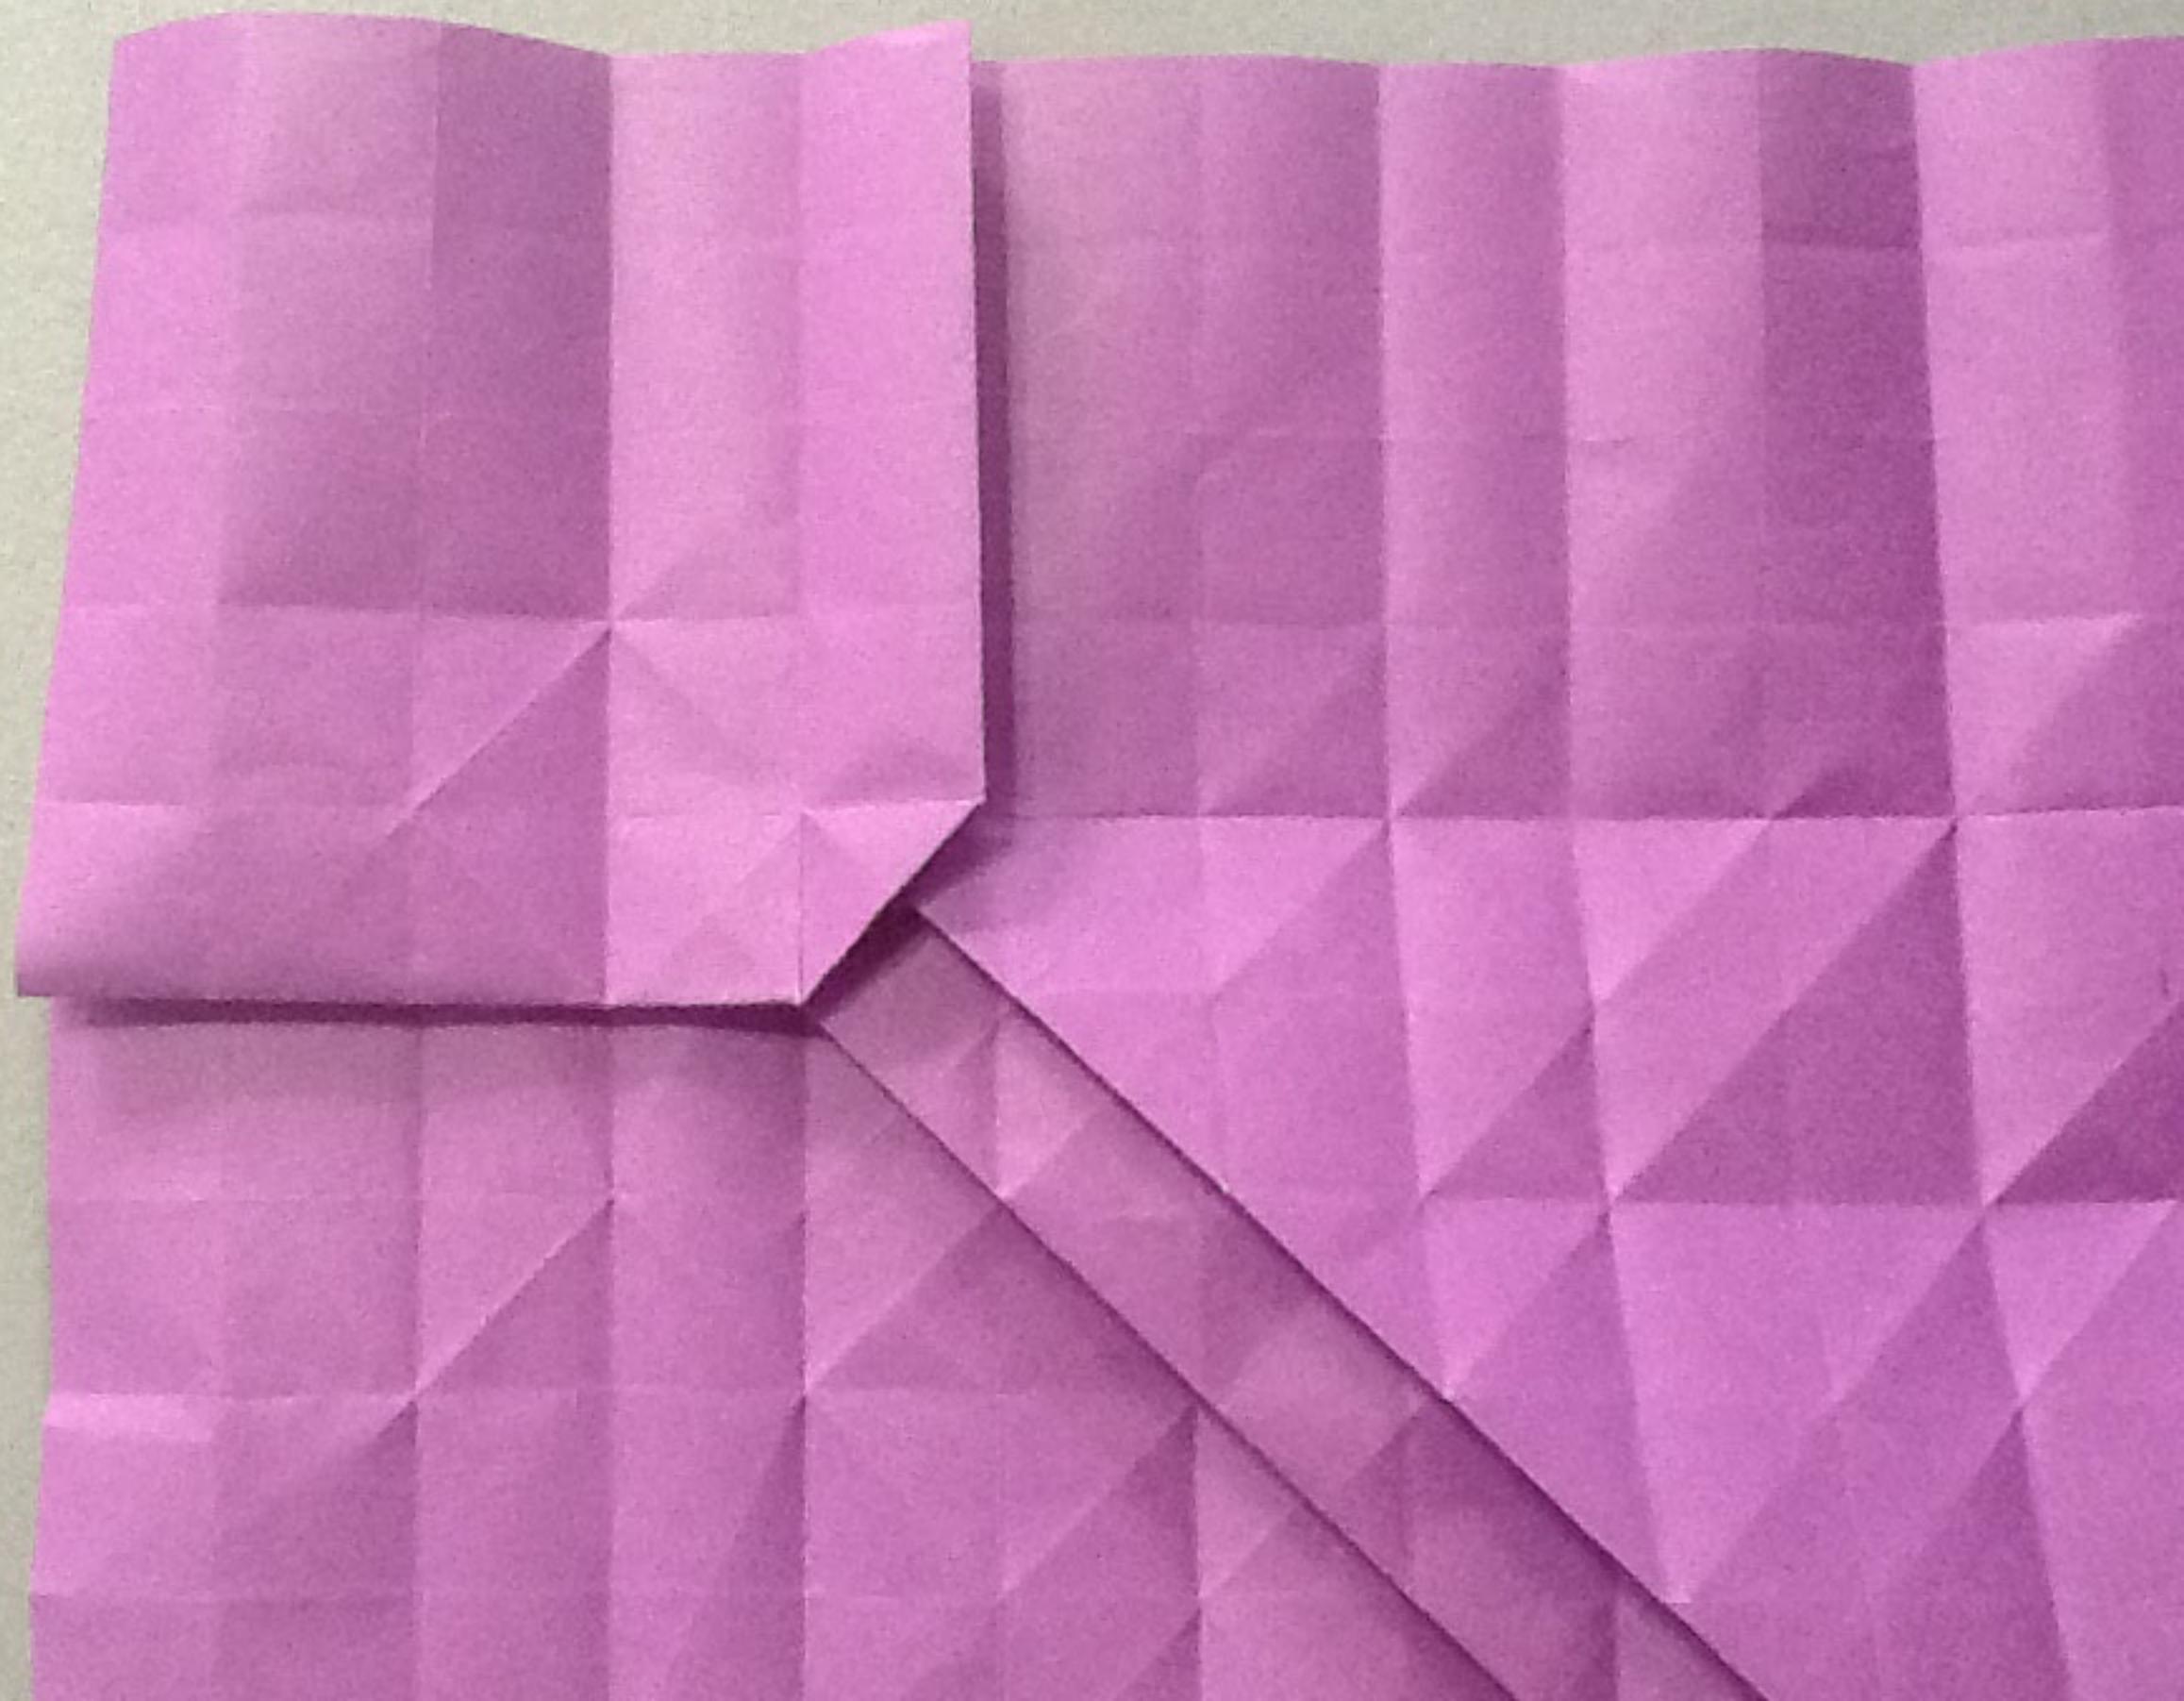

⑥

Push in the right
side of the box-

④

MVC

Model is flat.
Repeat on the
next round of
diagonal pleats.

(c)

MVC

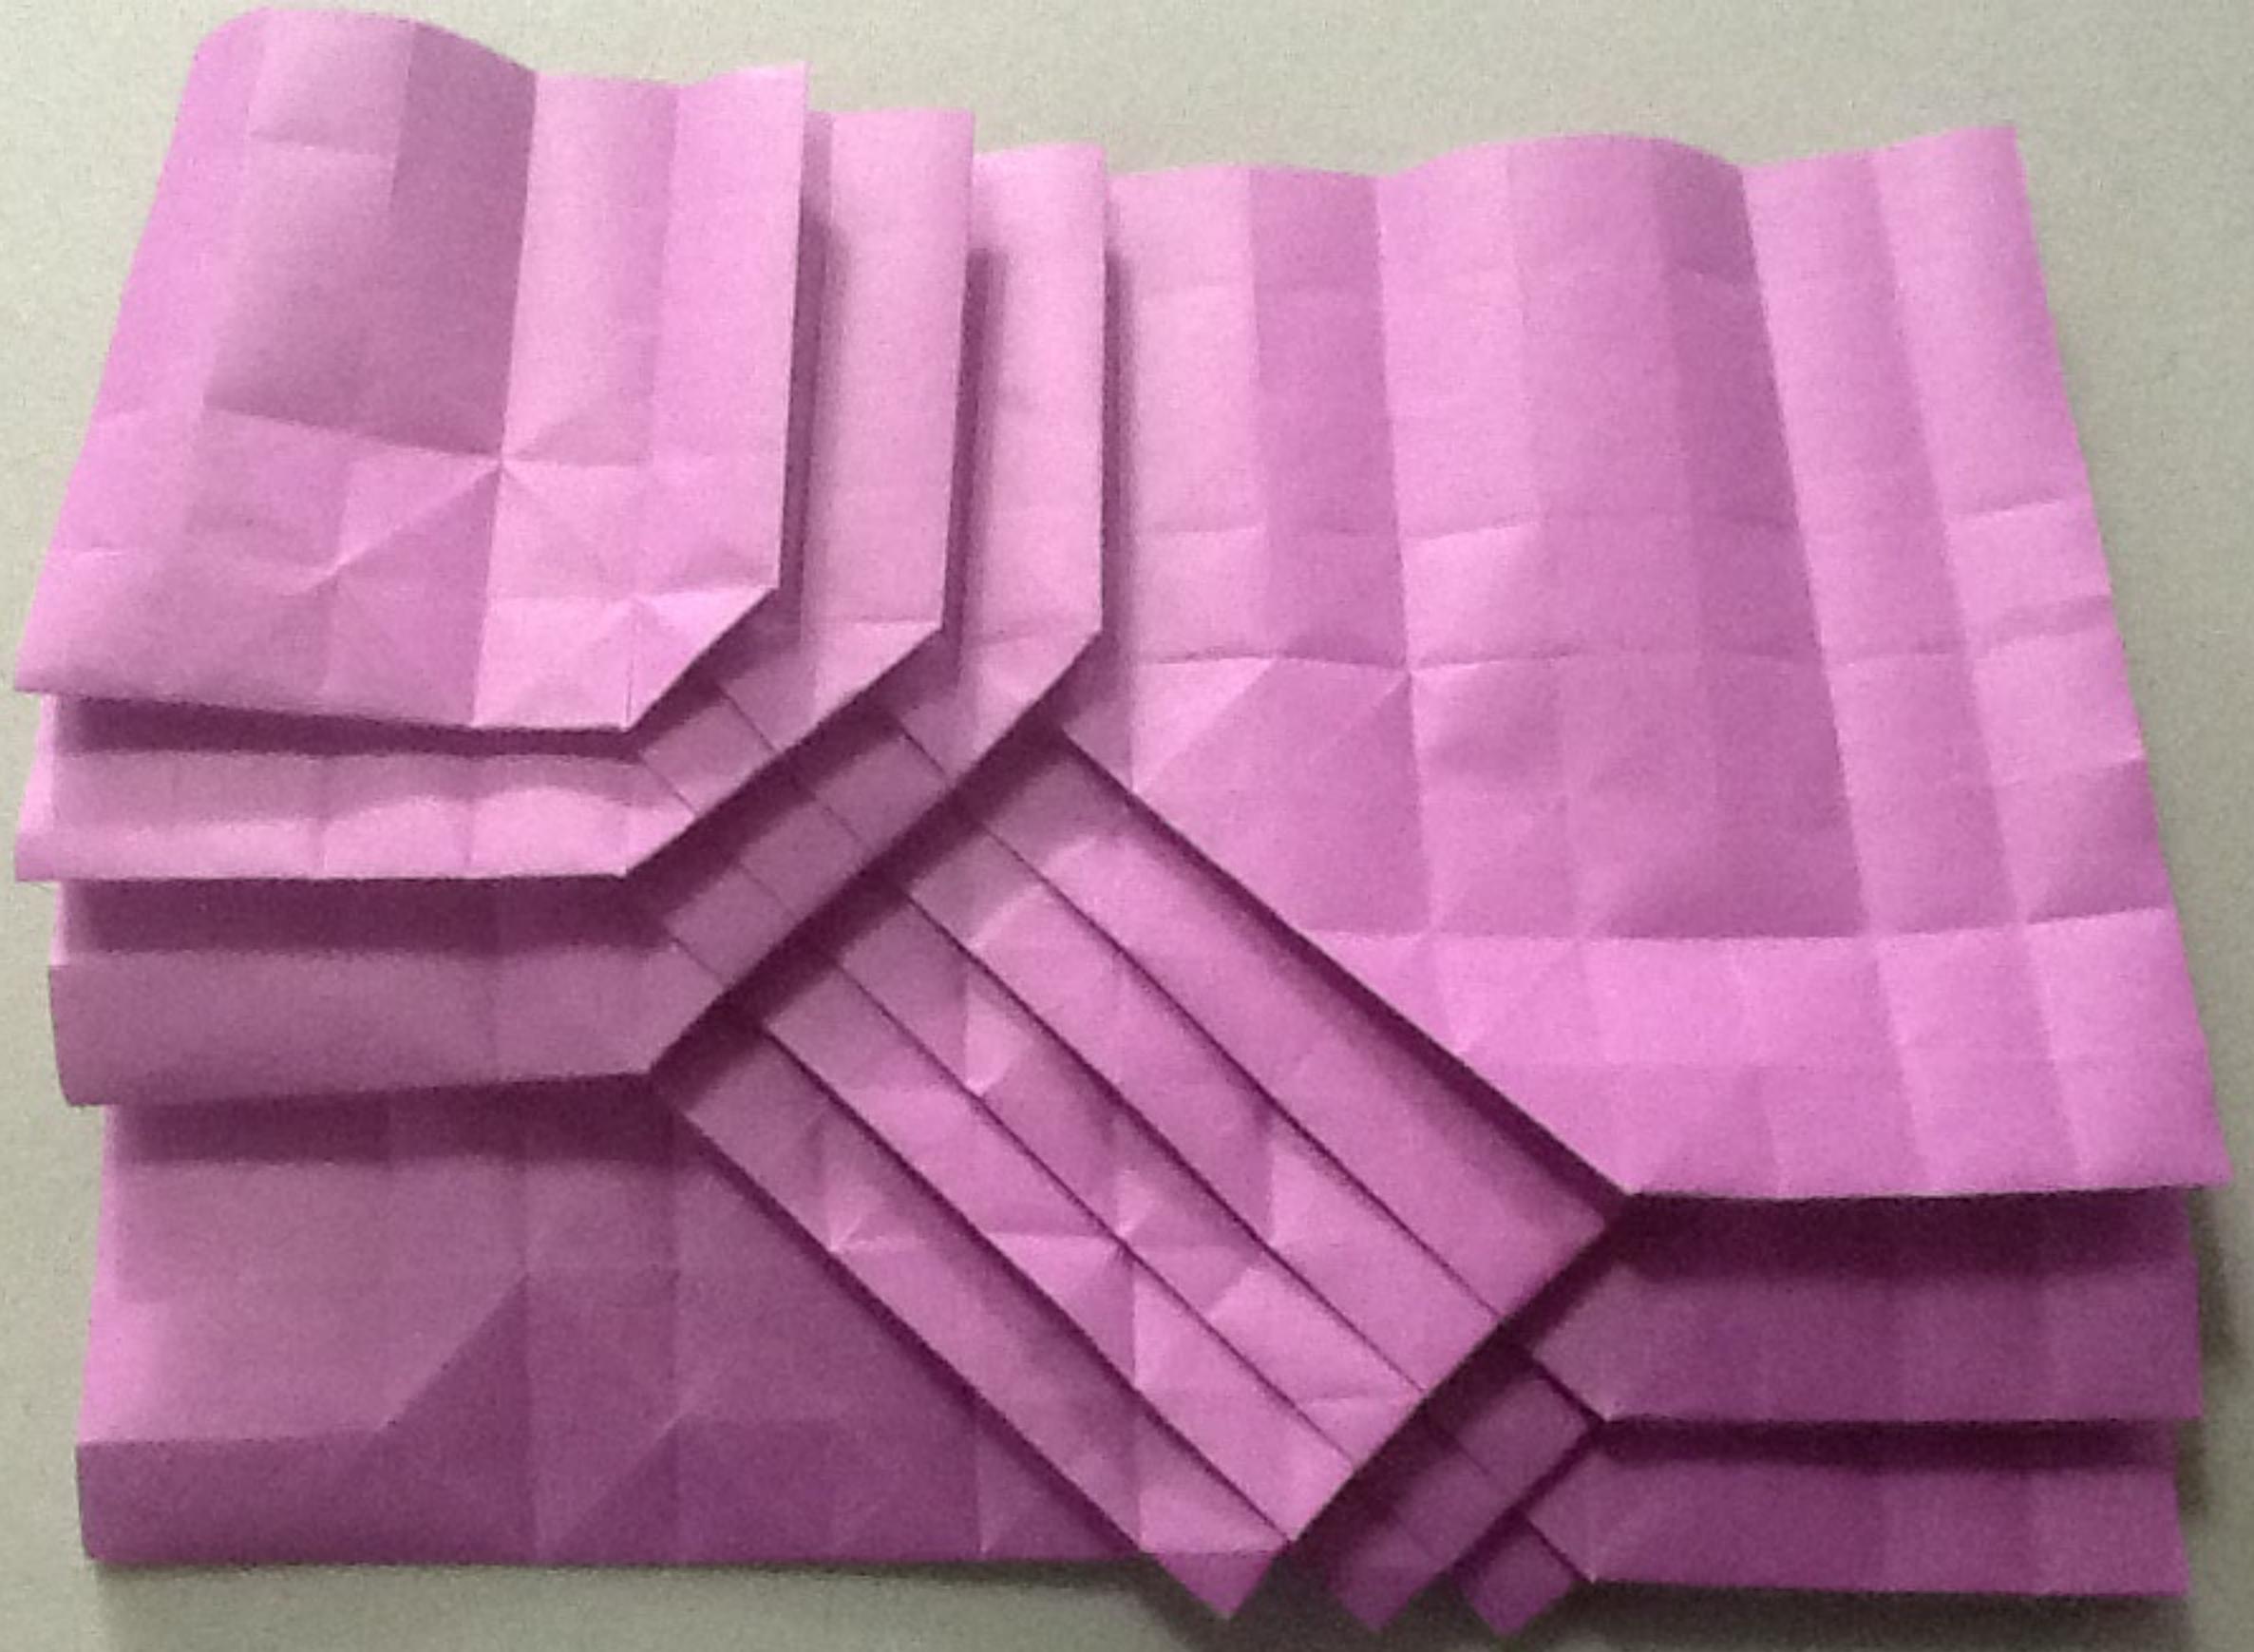

Repeat on the
next two rounds
of pleats-

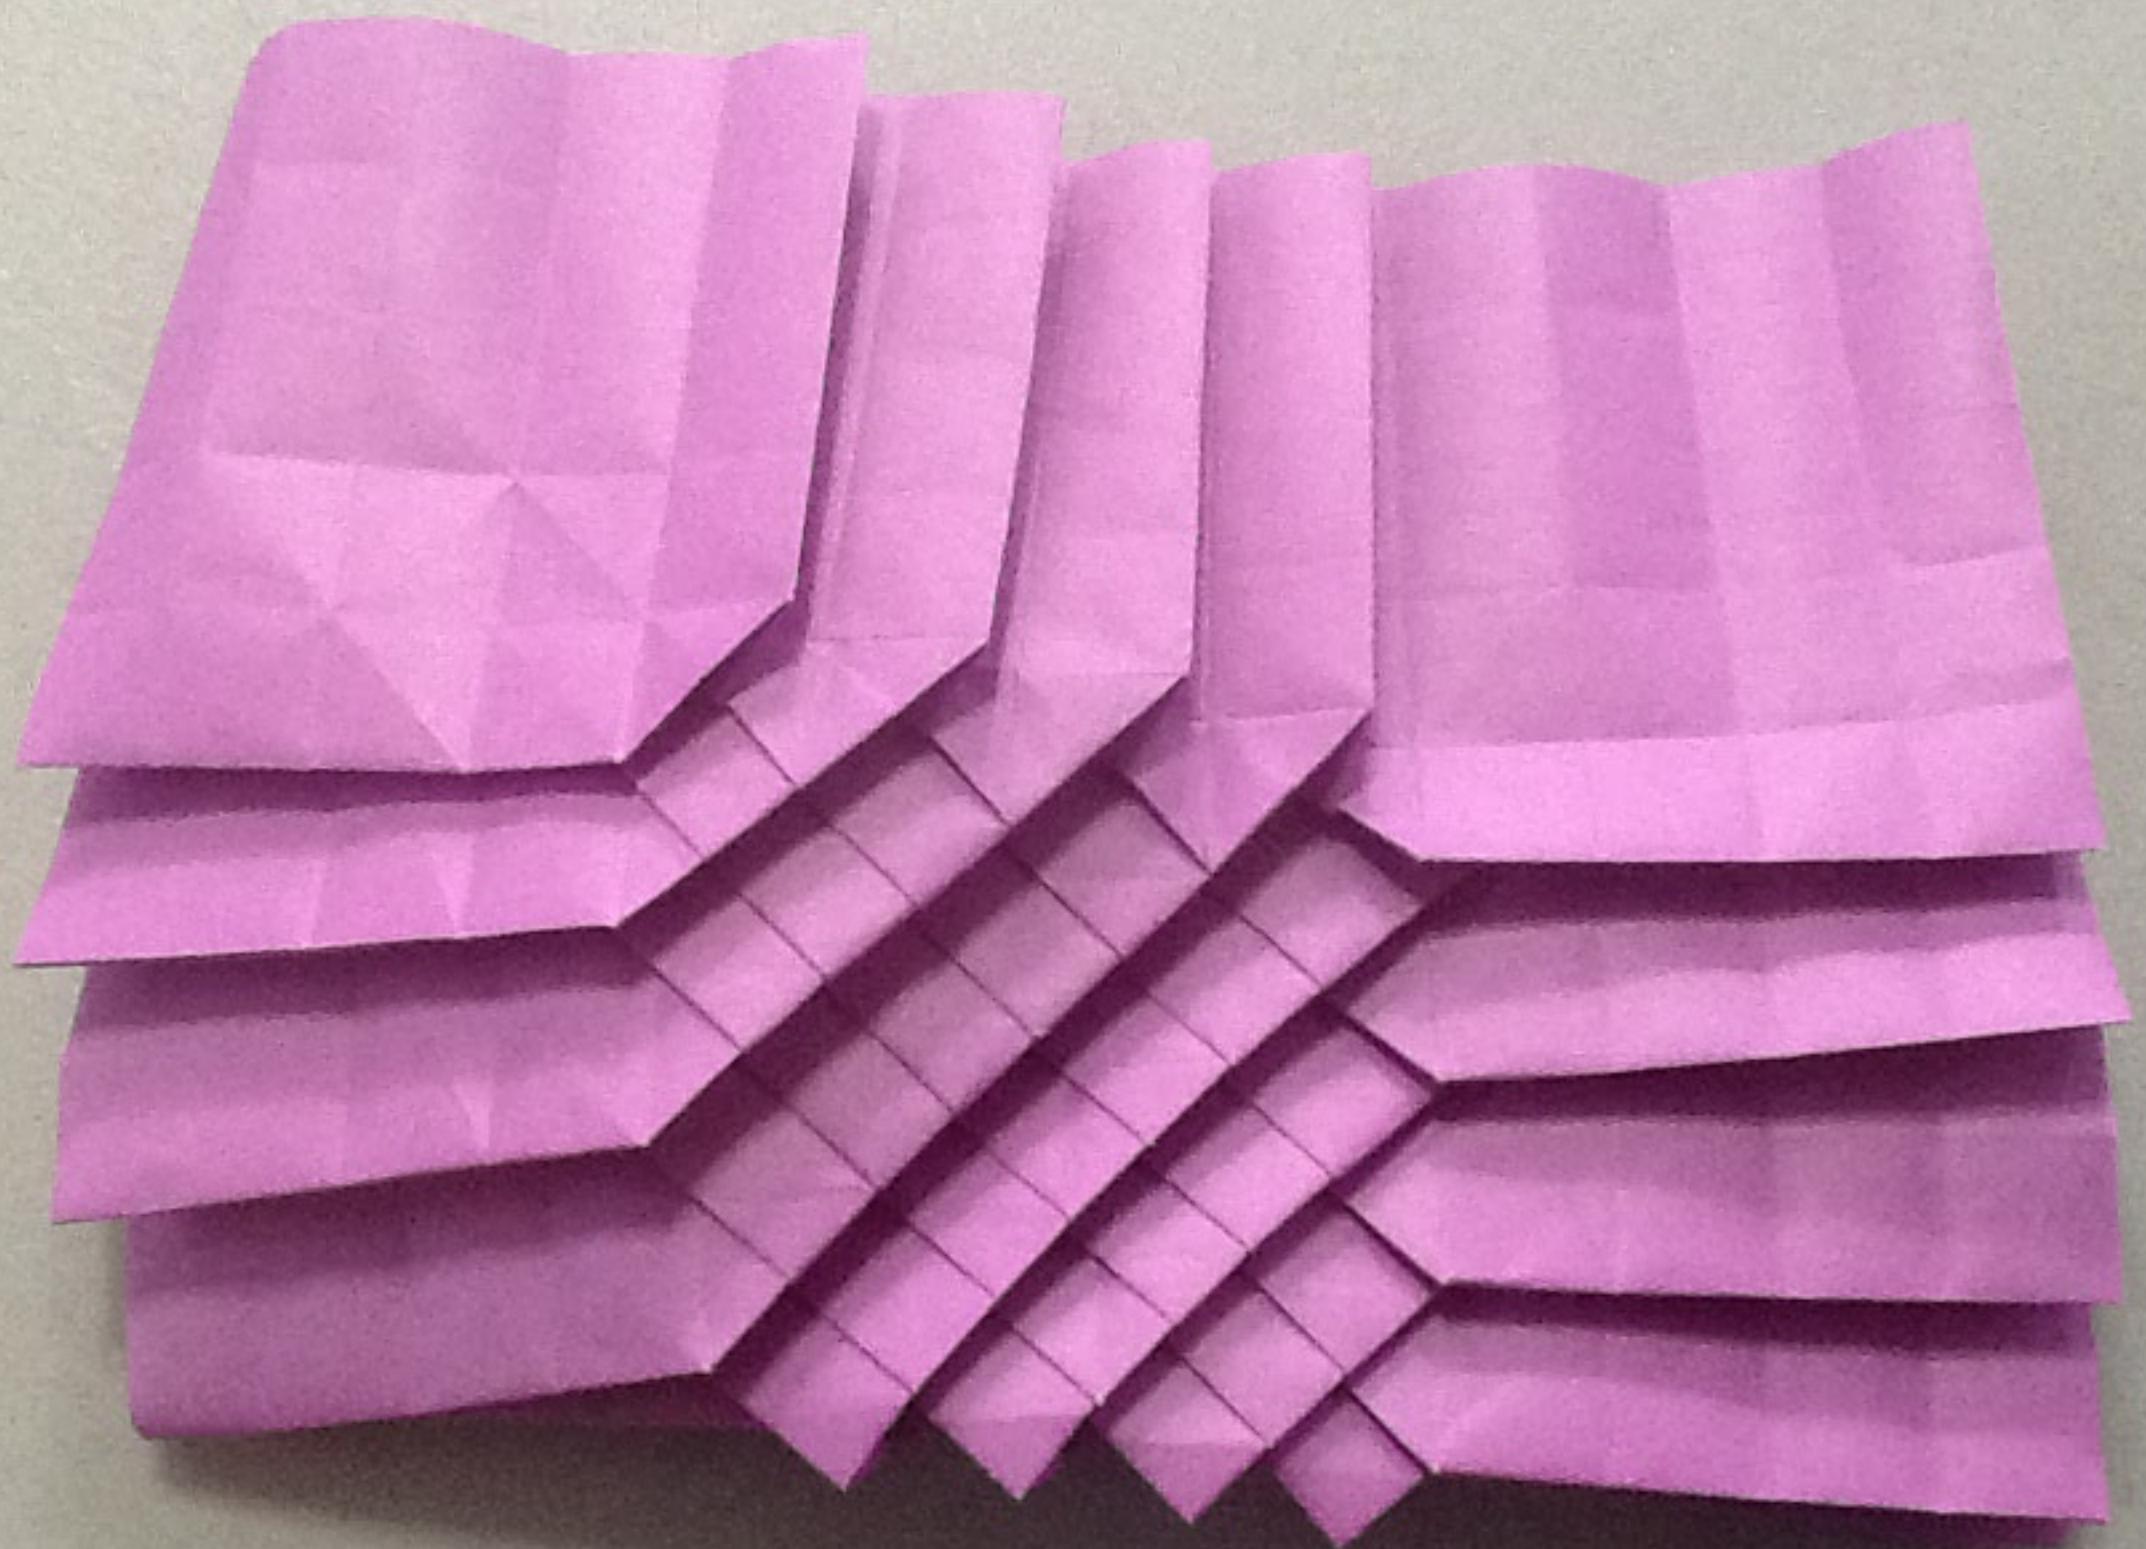

⑥

MVC

Scales are shaped at this point.

It is optional but good practice.

Tool-assisted method is as follows-

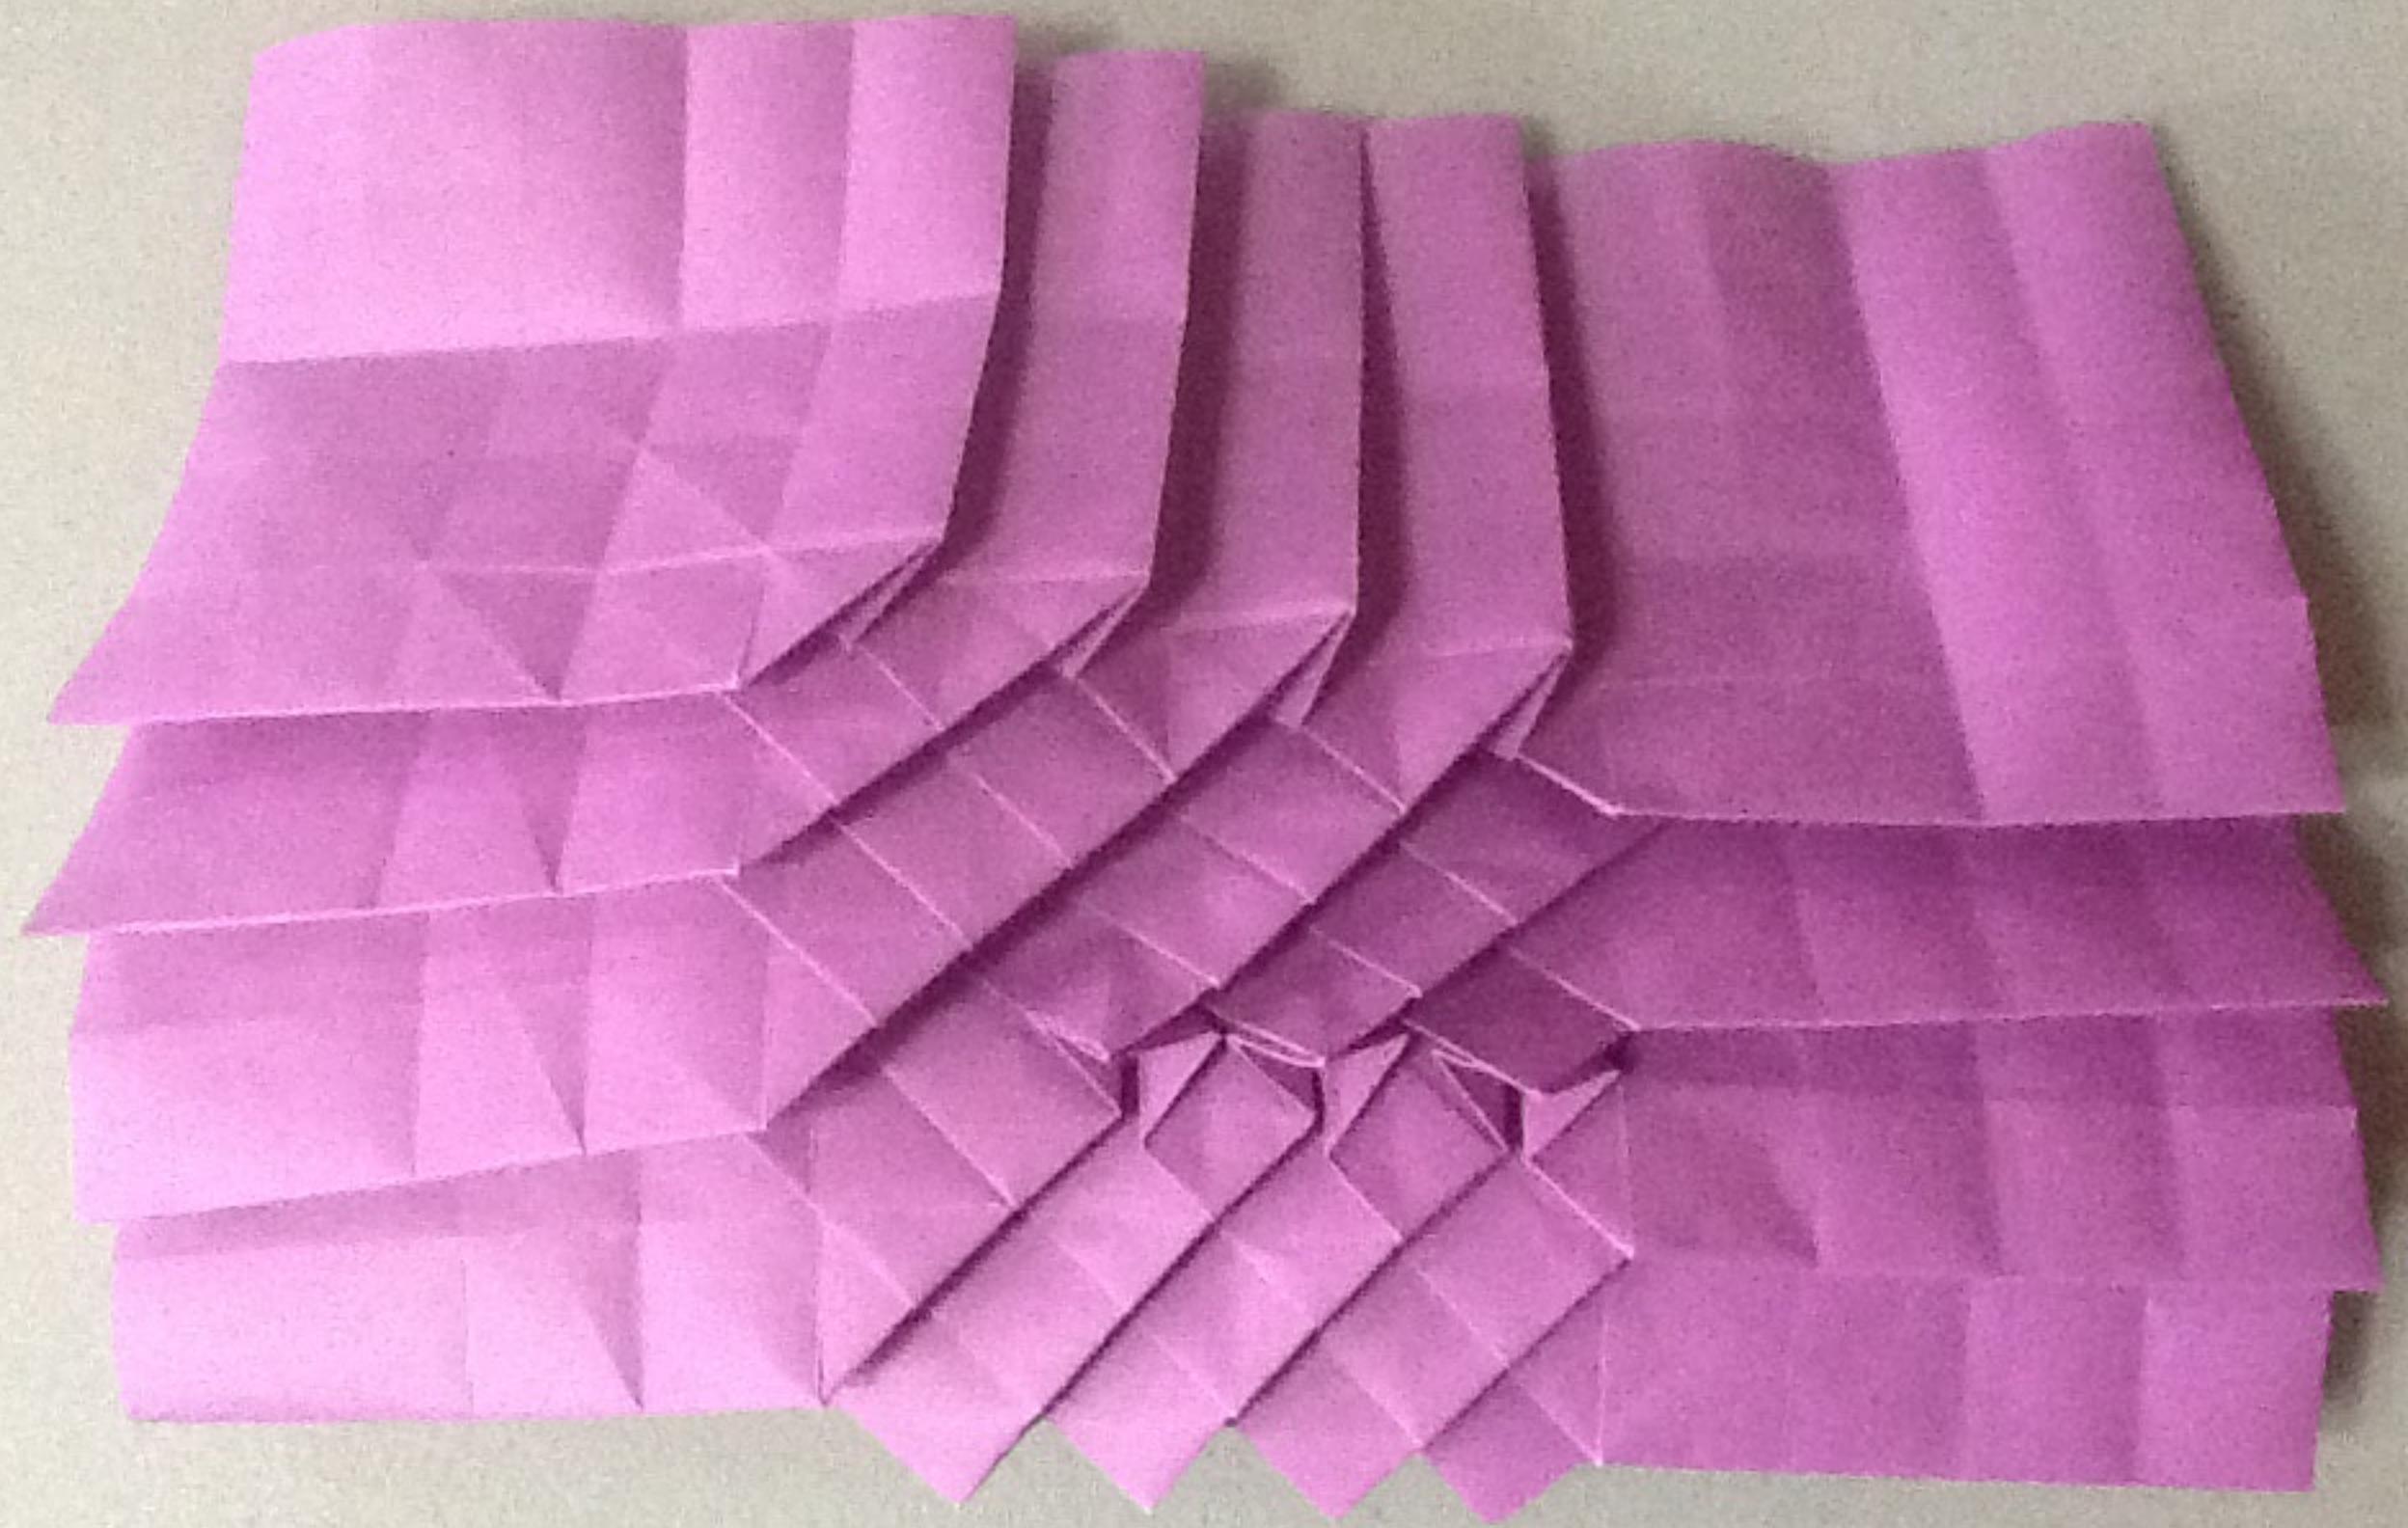

MVC

(c)

whether you shape
scales or not, three
intersections are pulled
up to the colored side
and left unshaped.

Shaped scales.

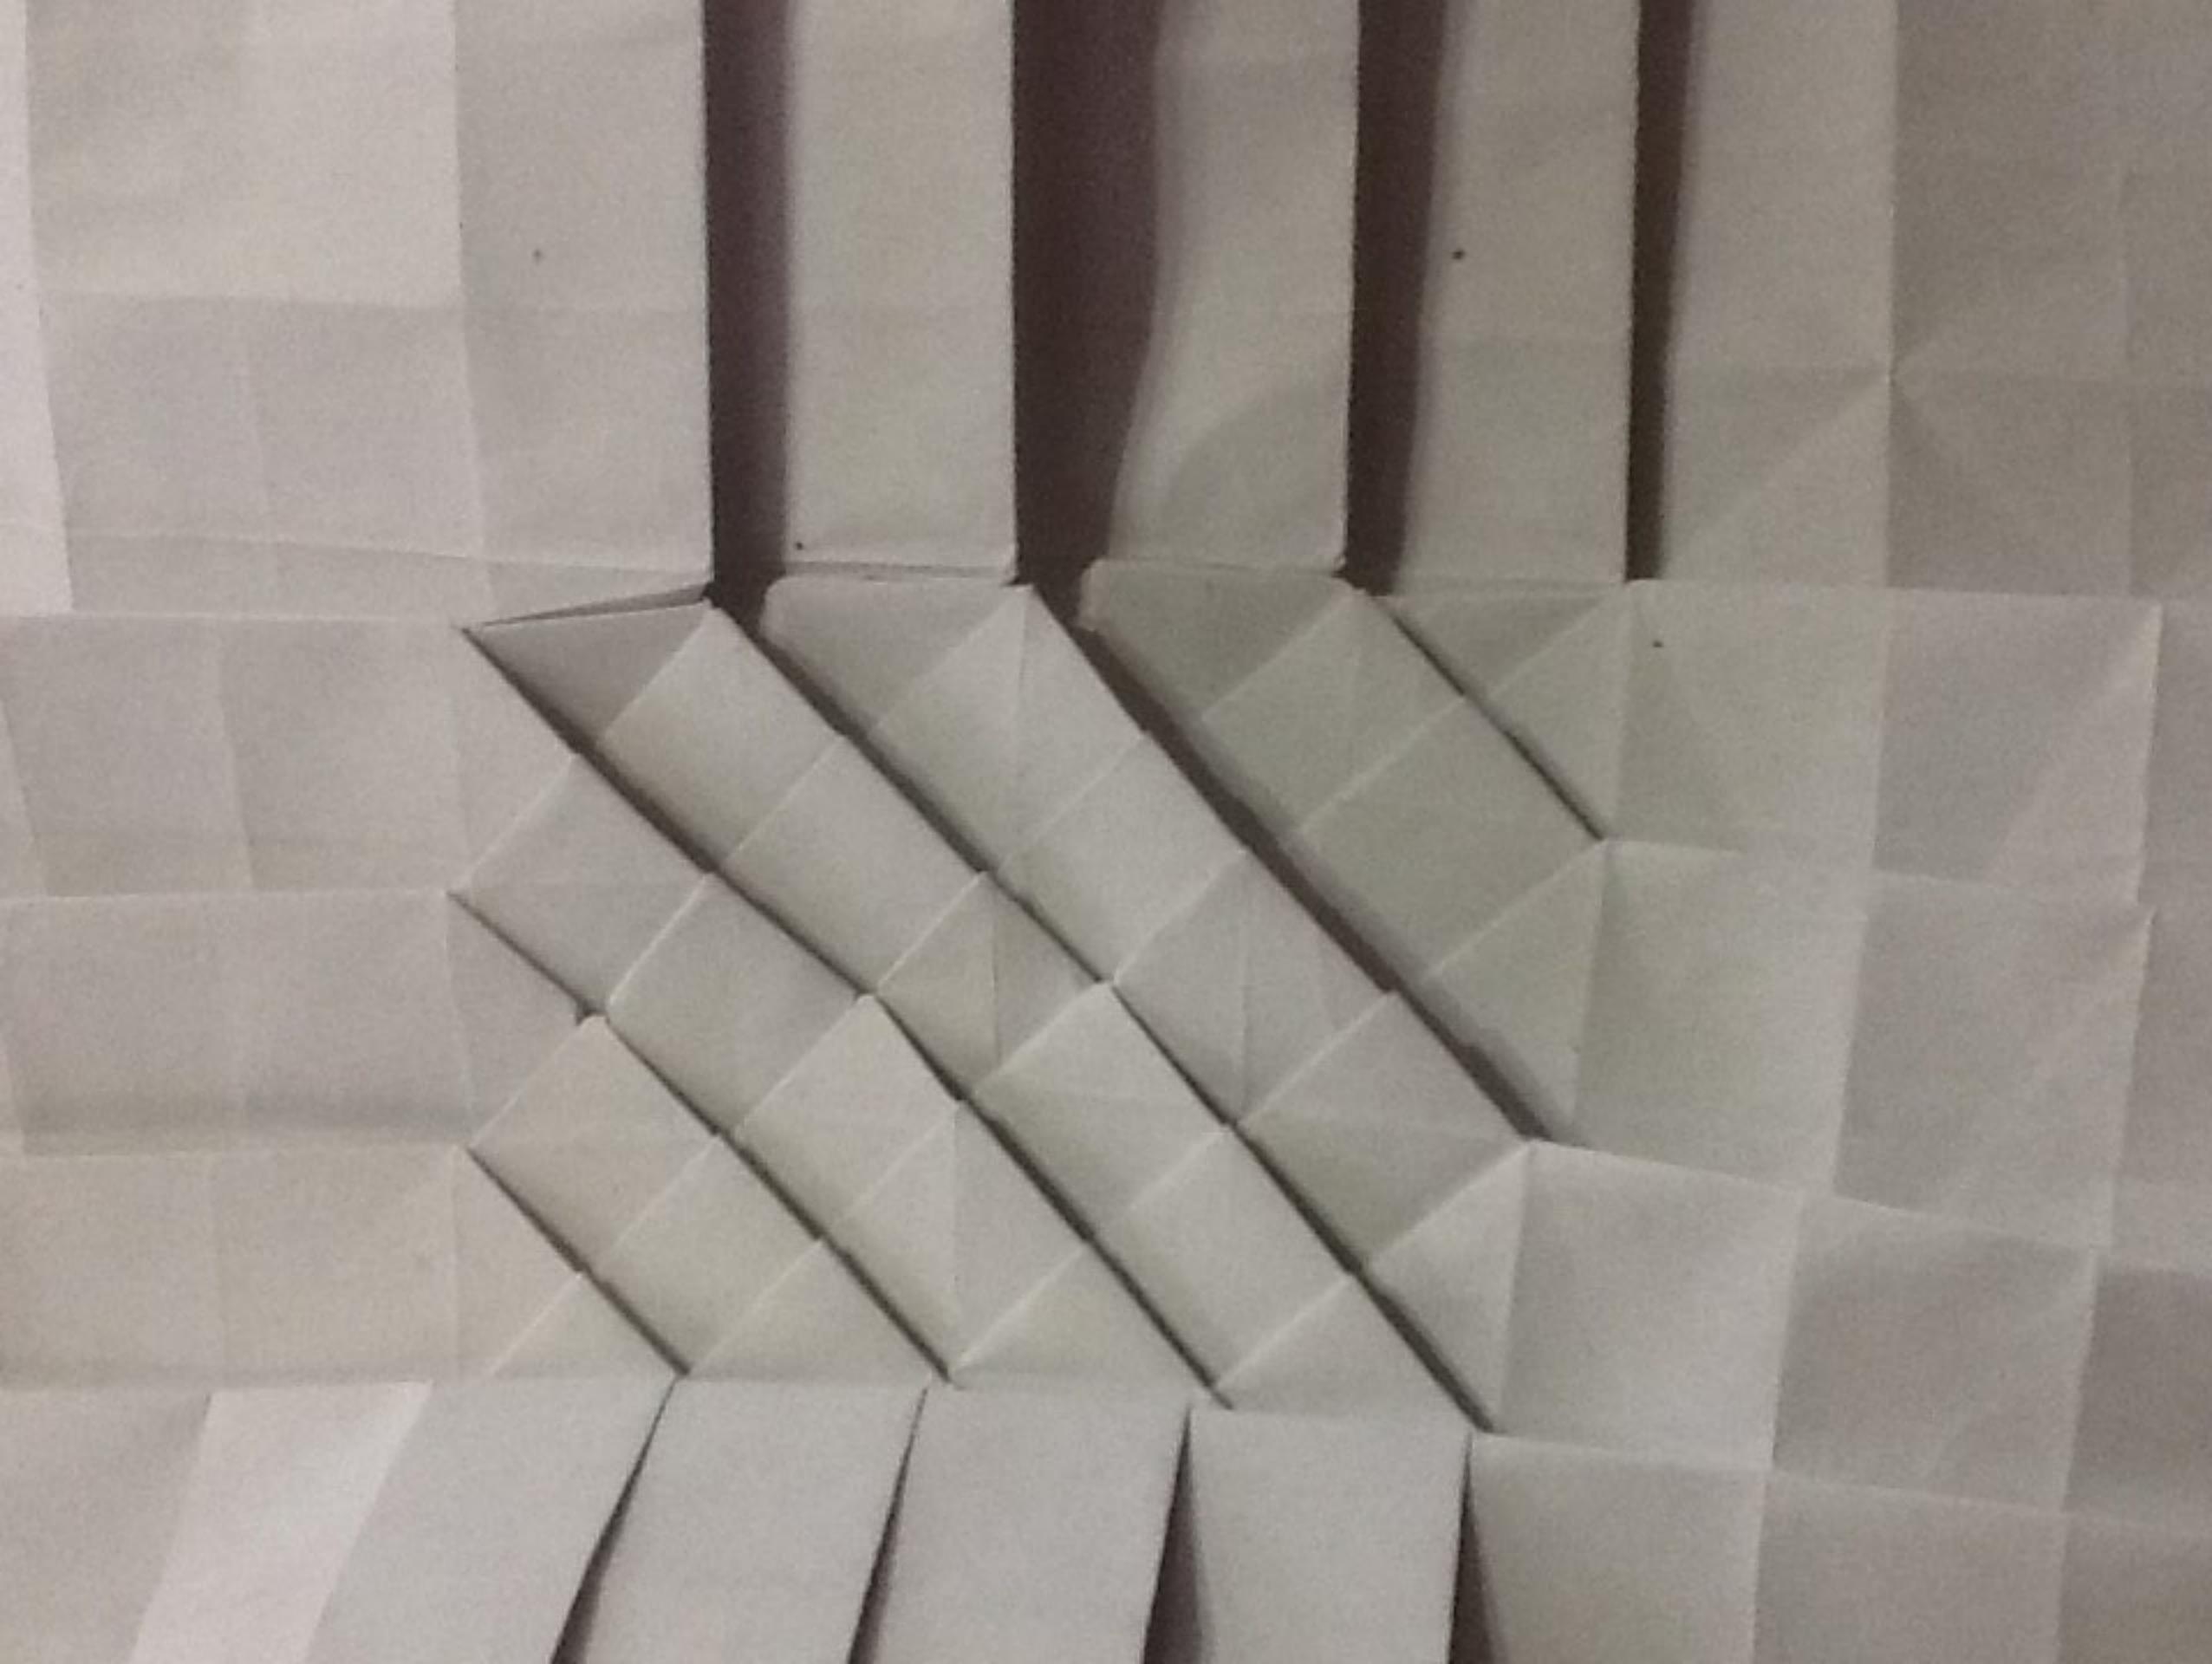

MVC

(W) Now pull up all
other intersections

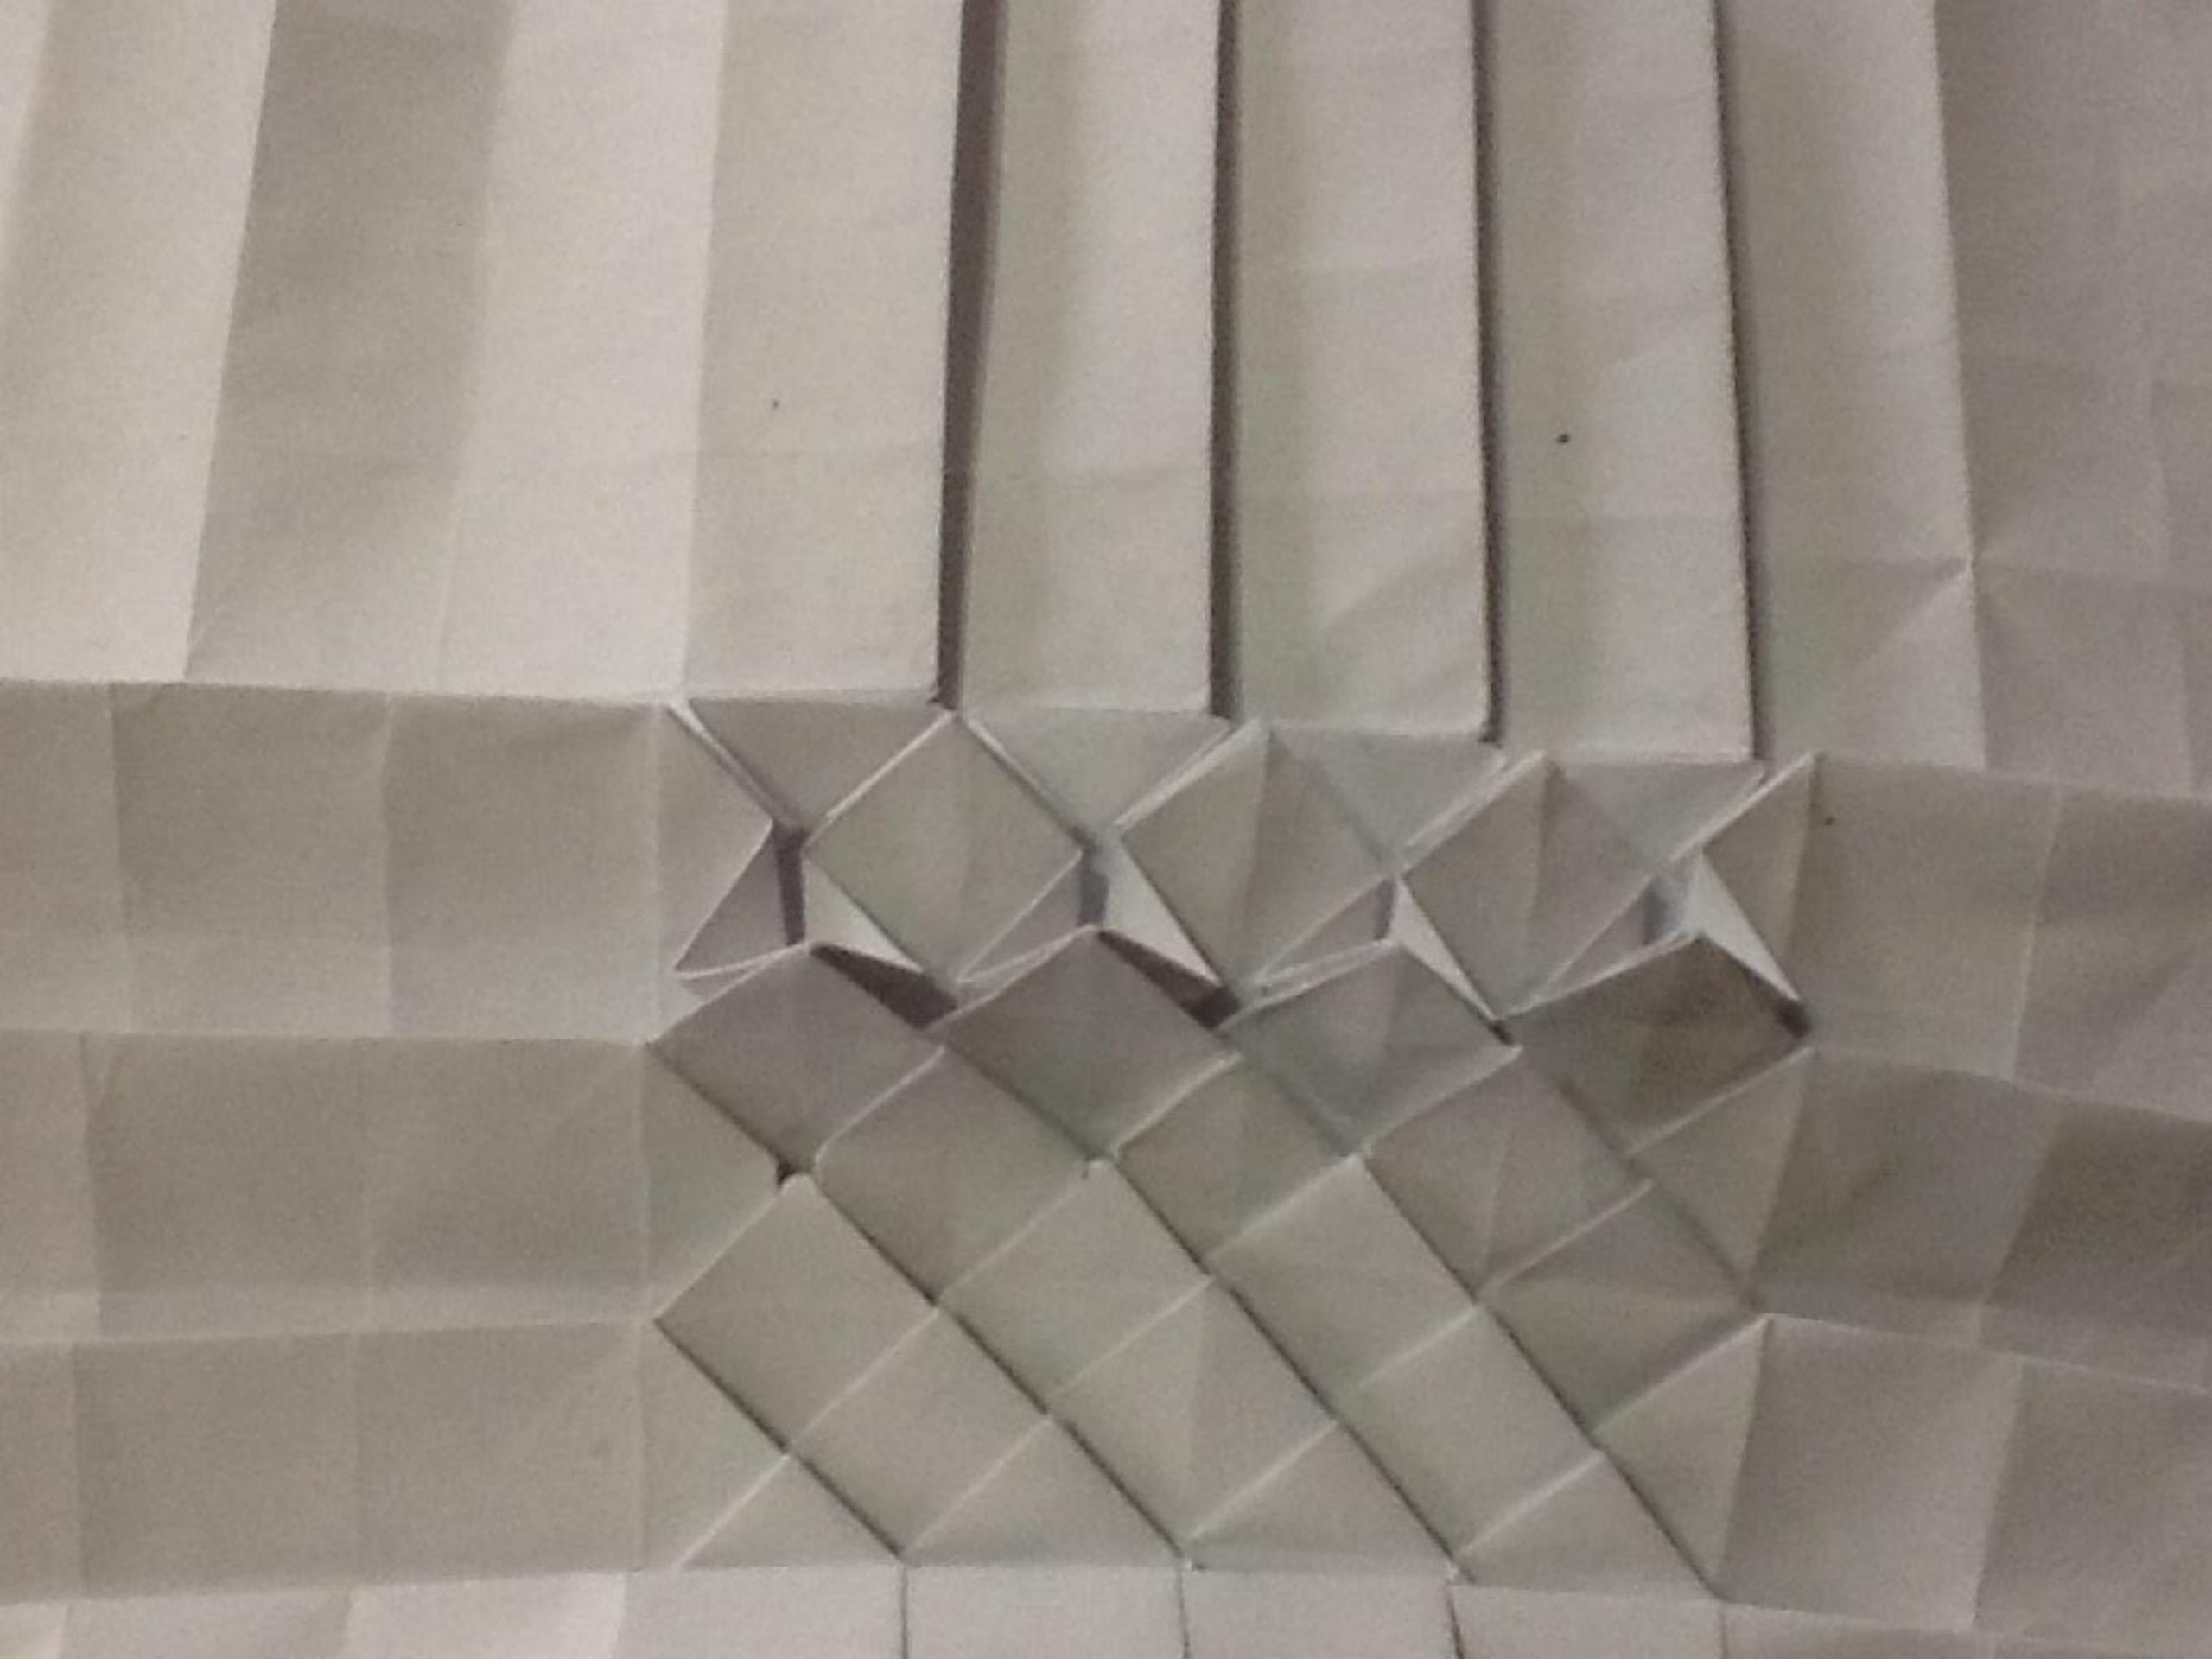

On the white side.

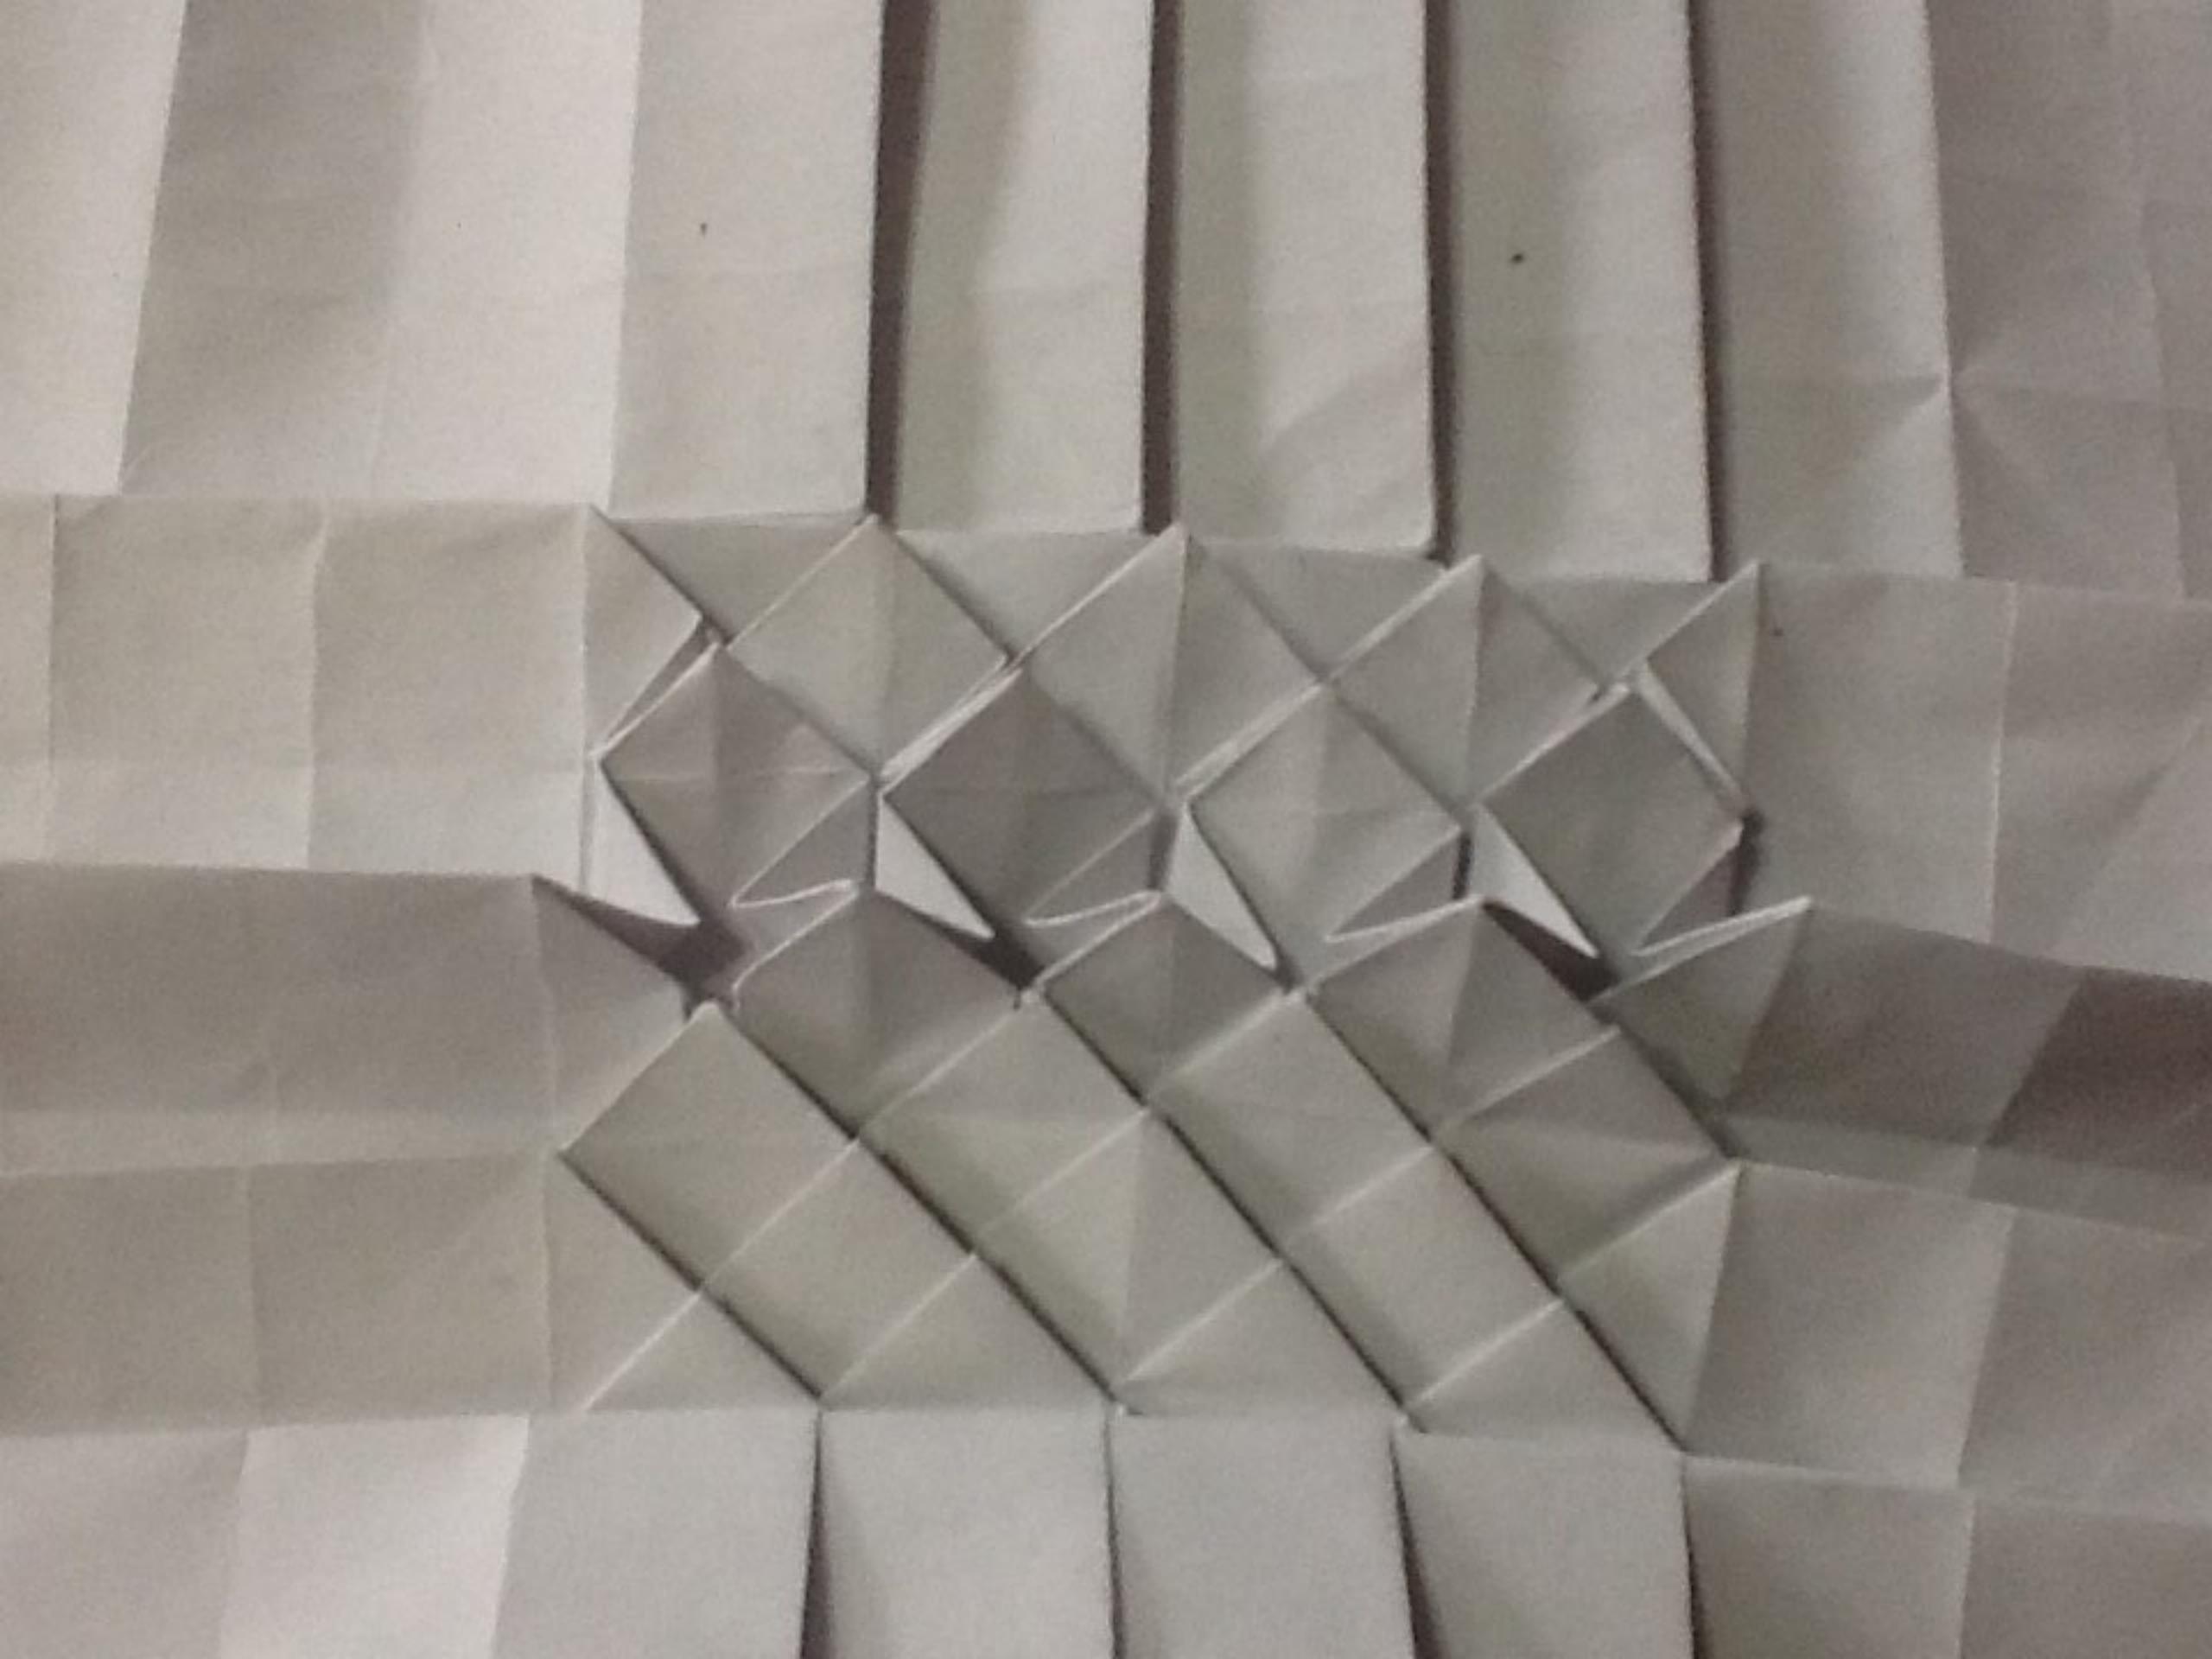

Some are hard to
reach, but all are
possible.

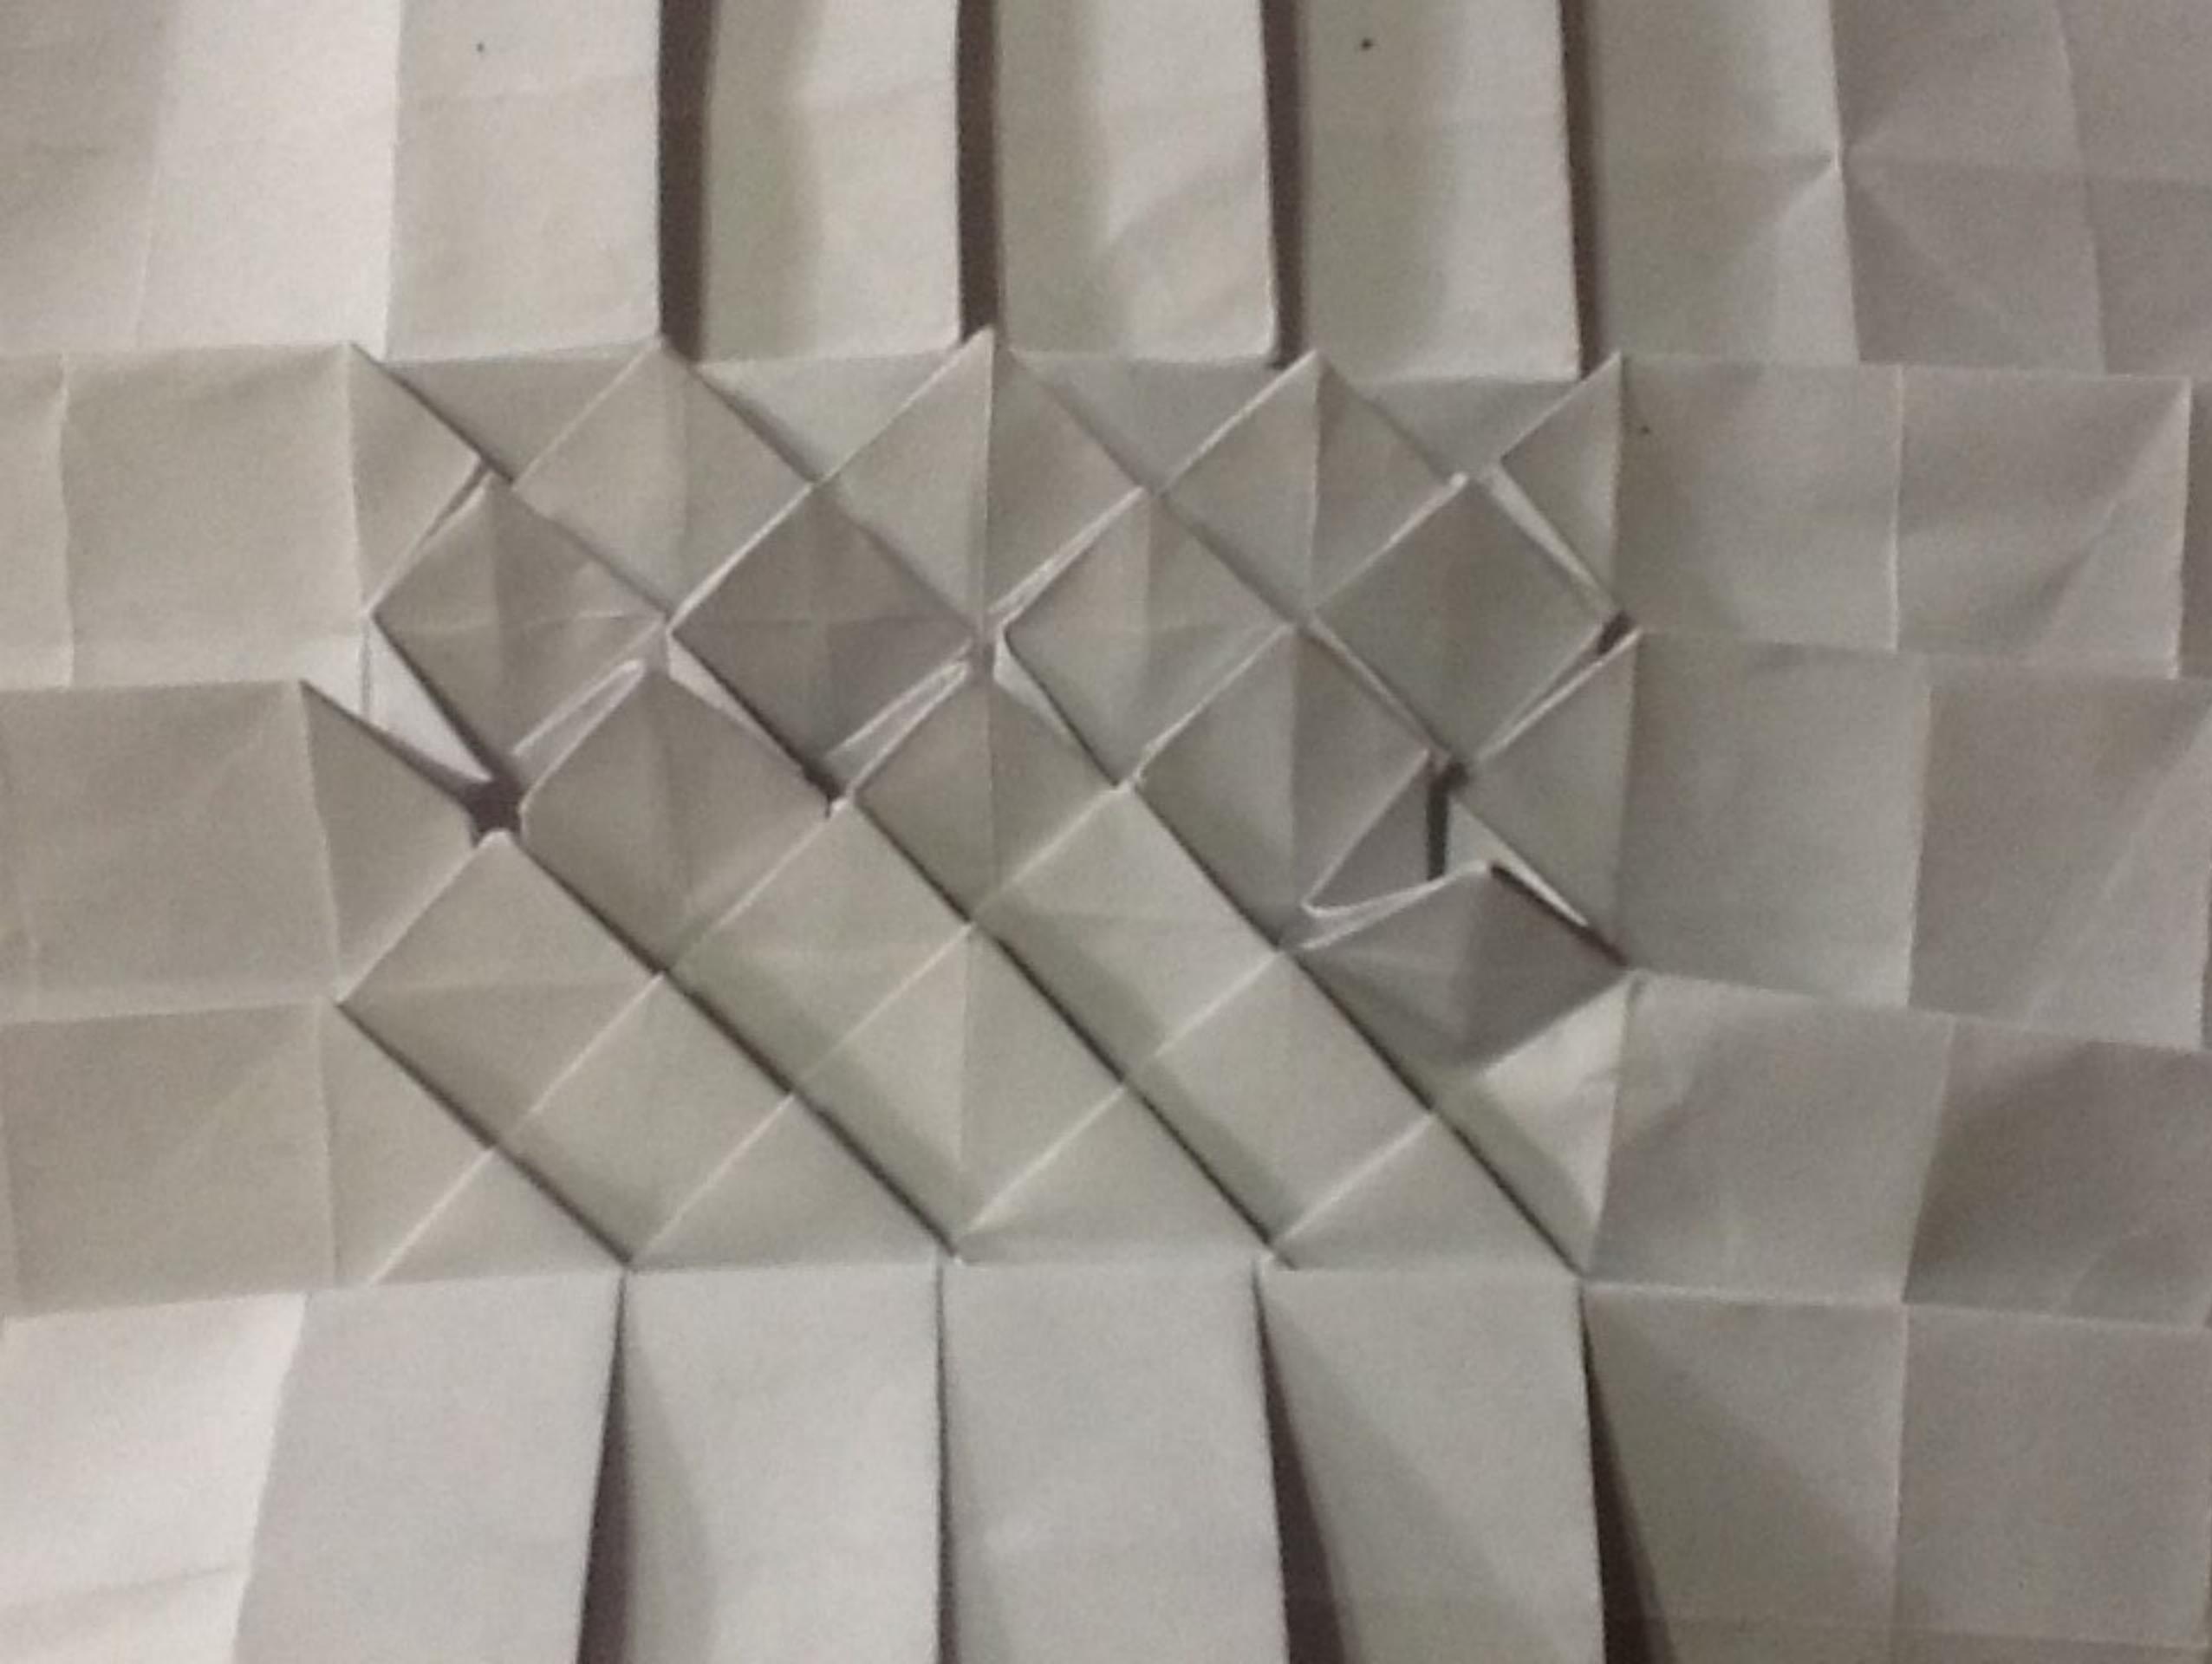

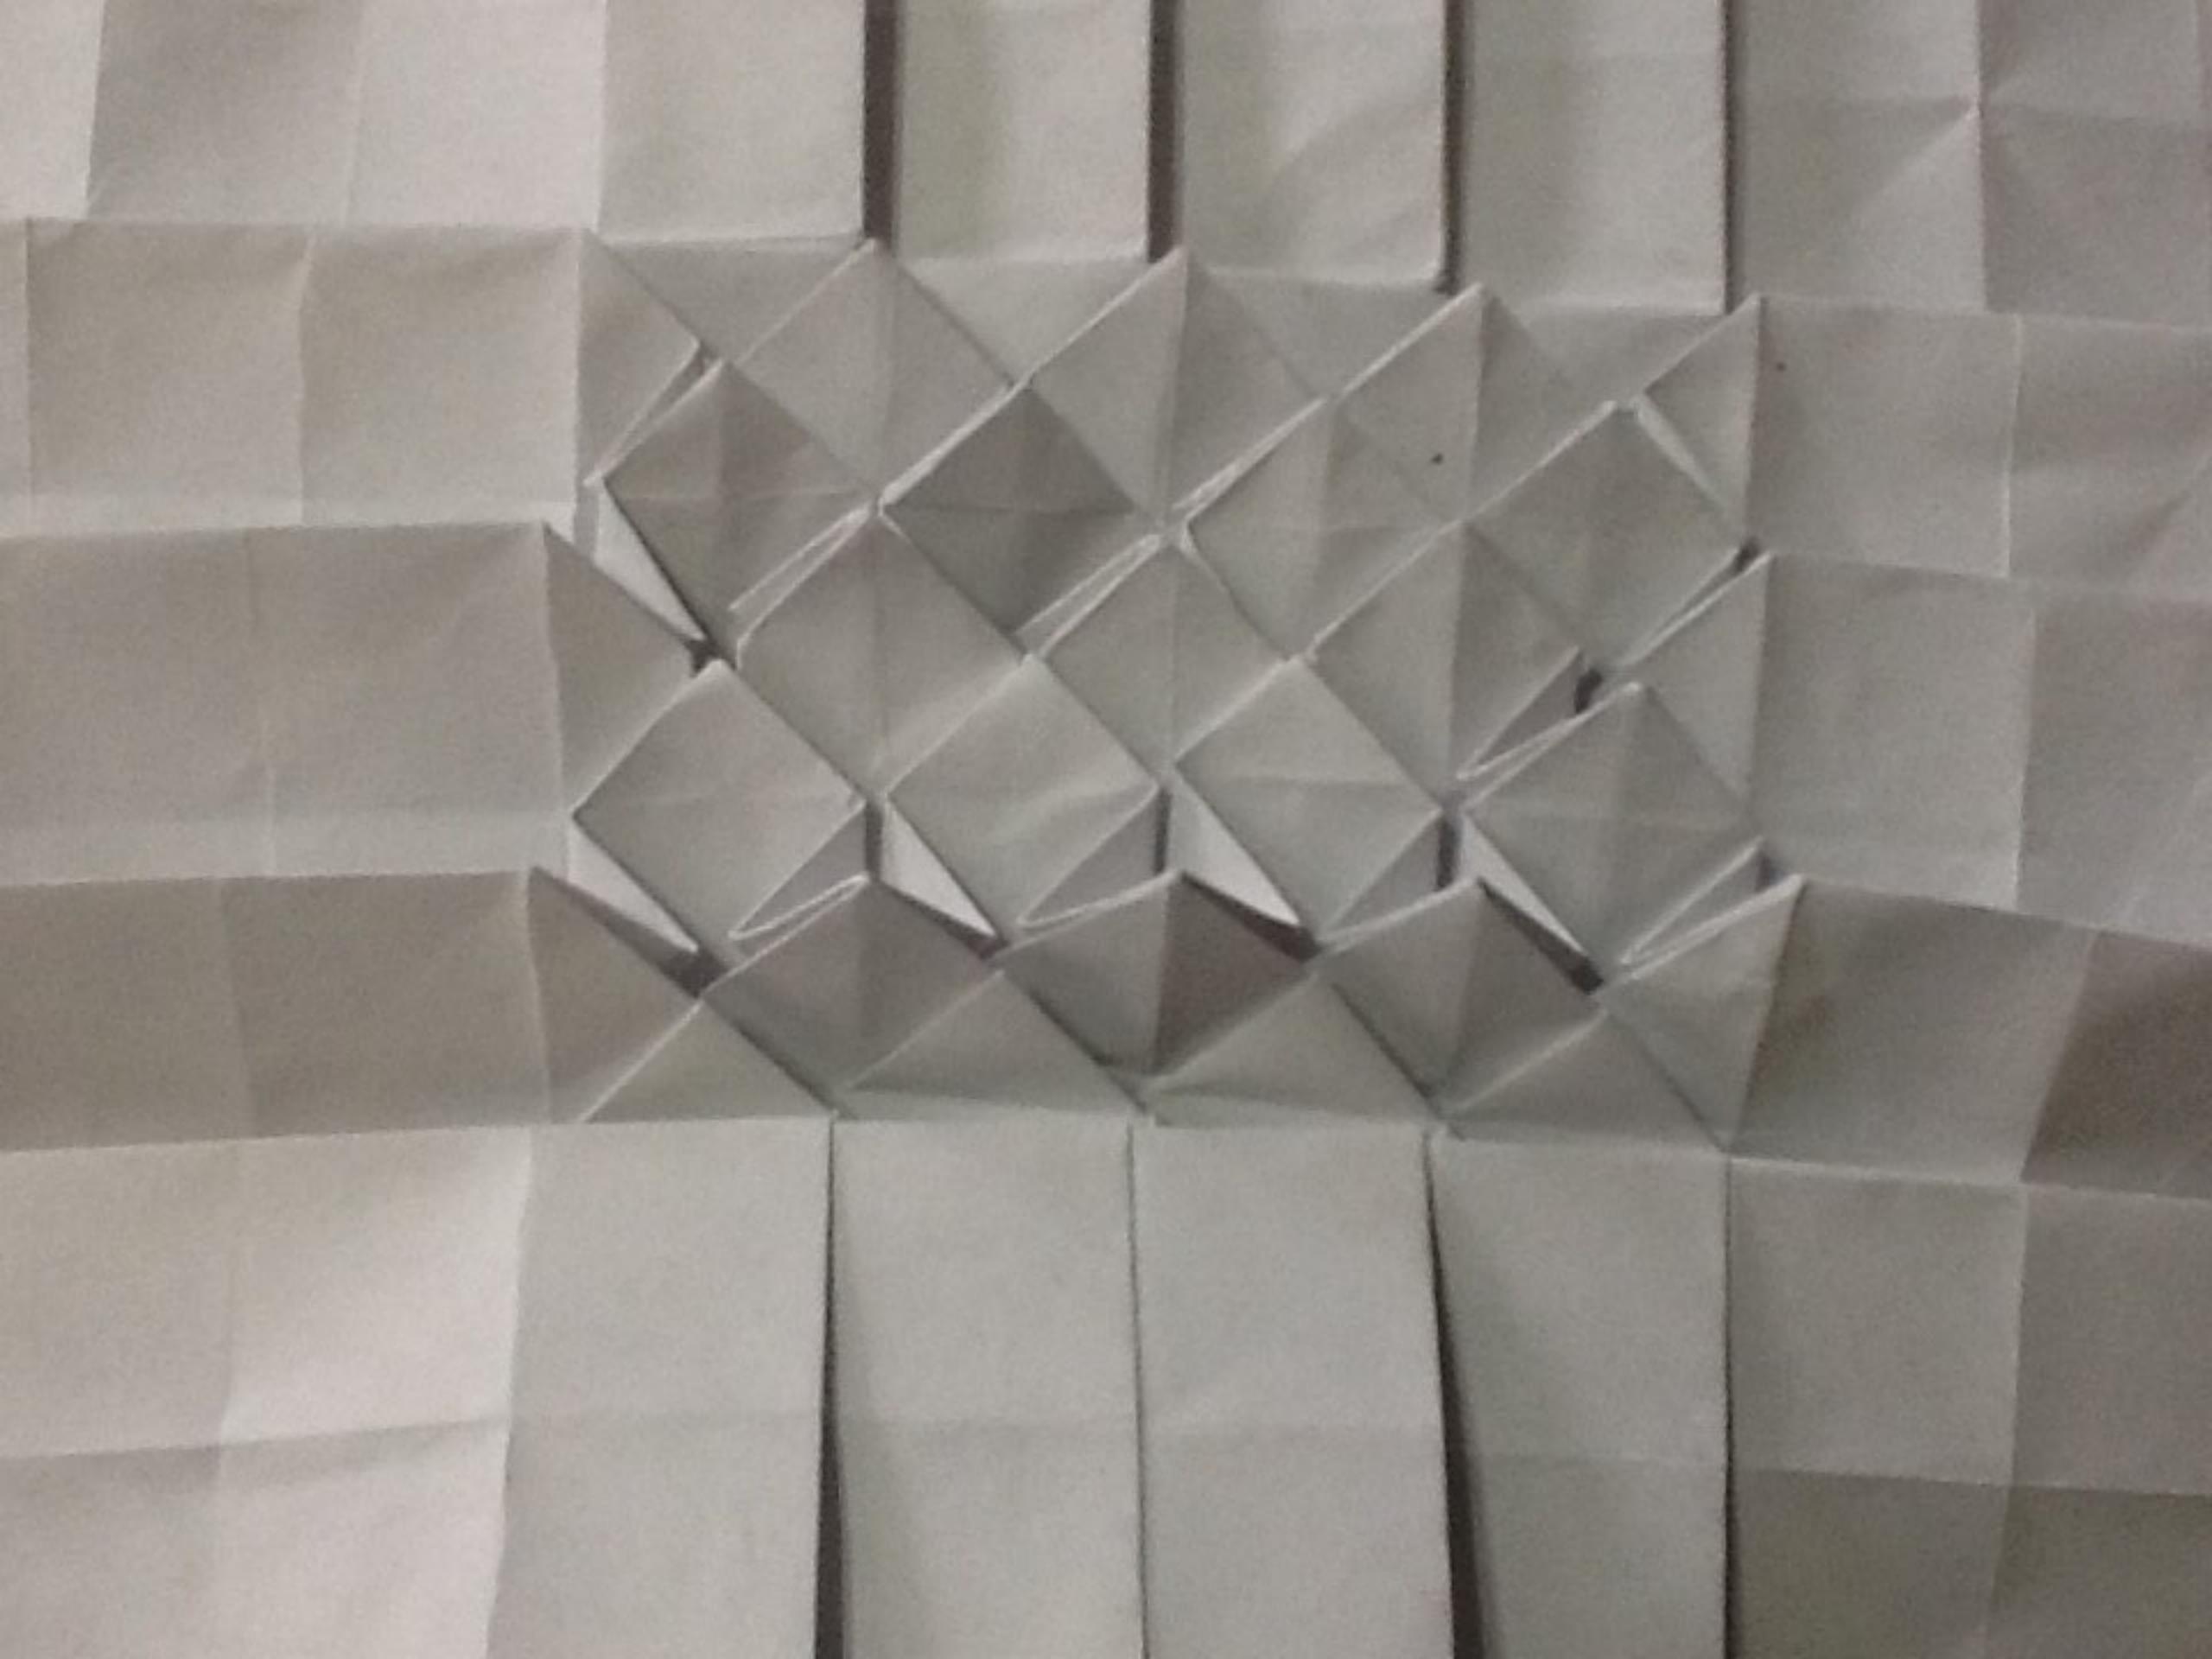

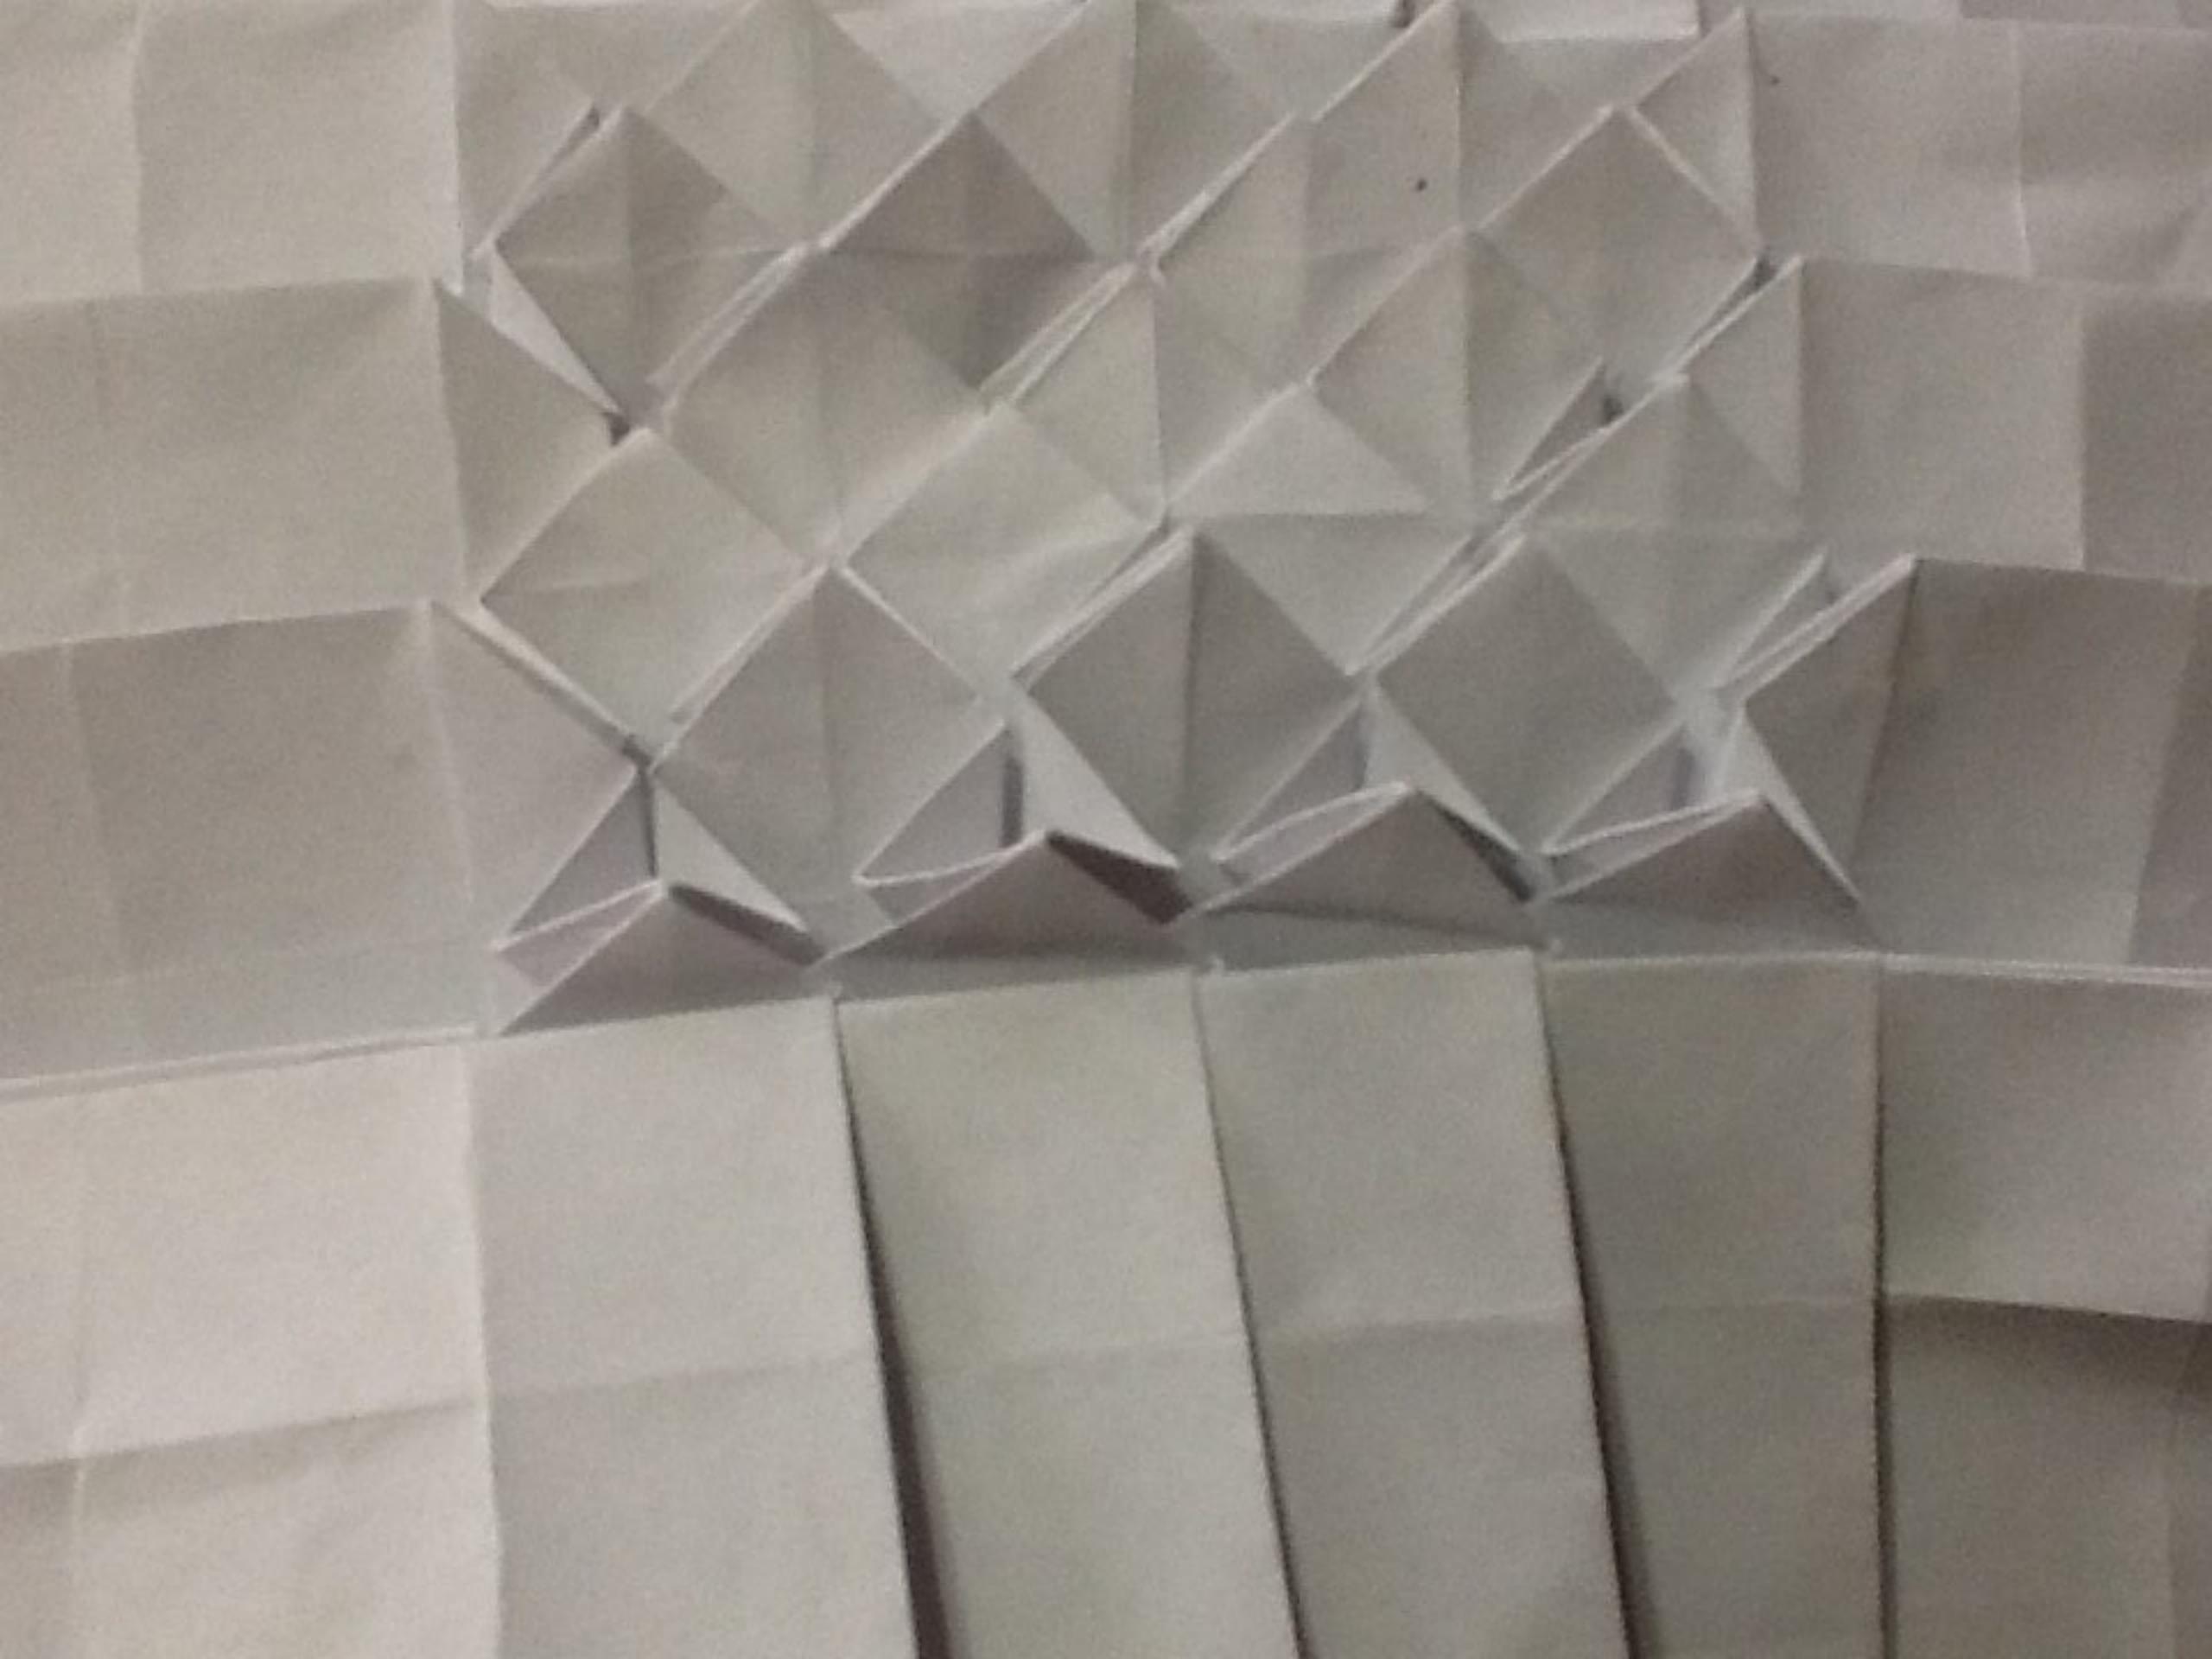

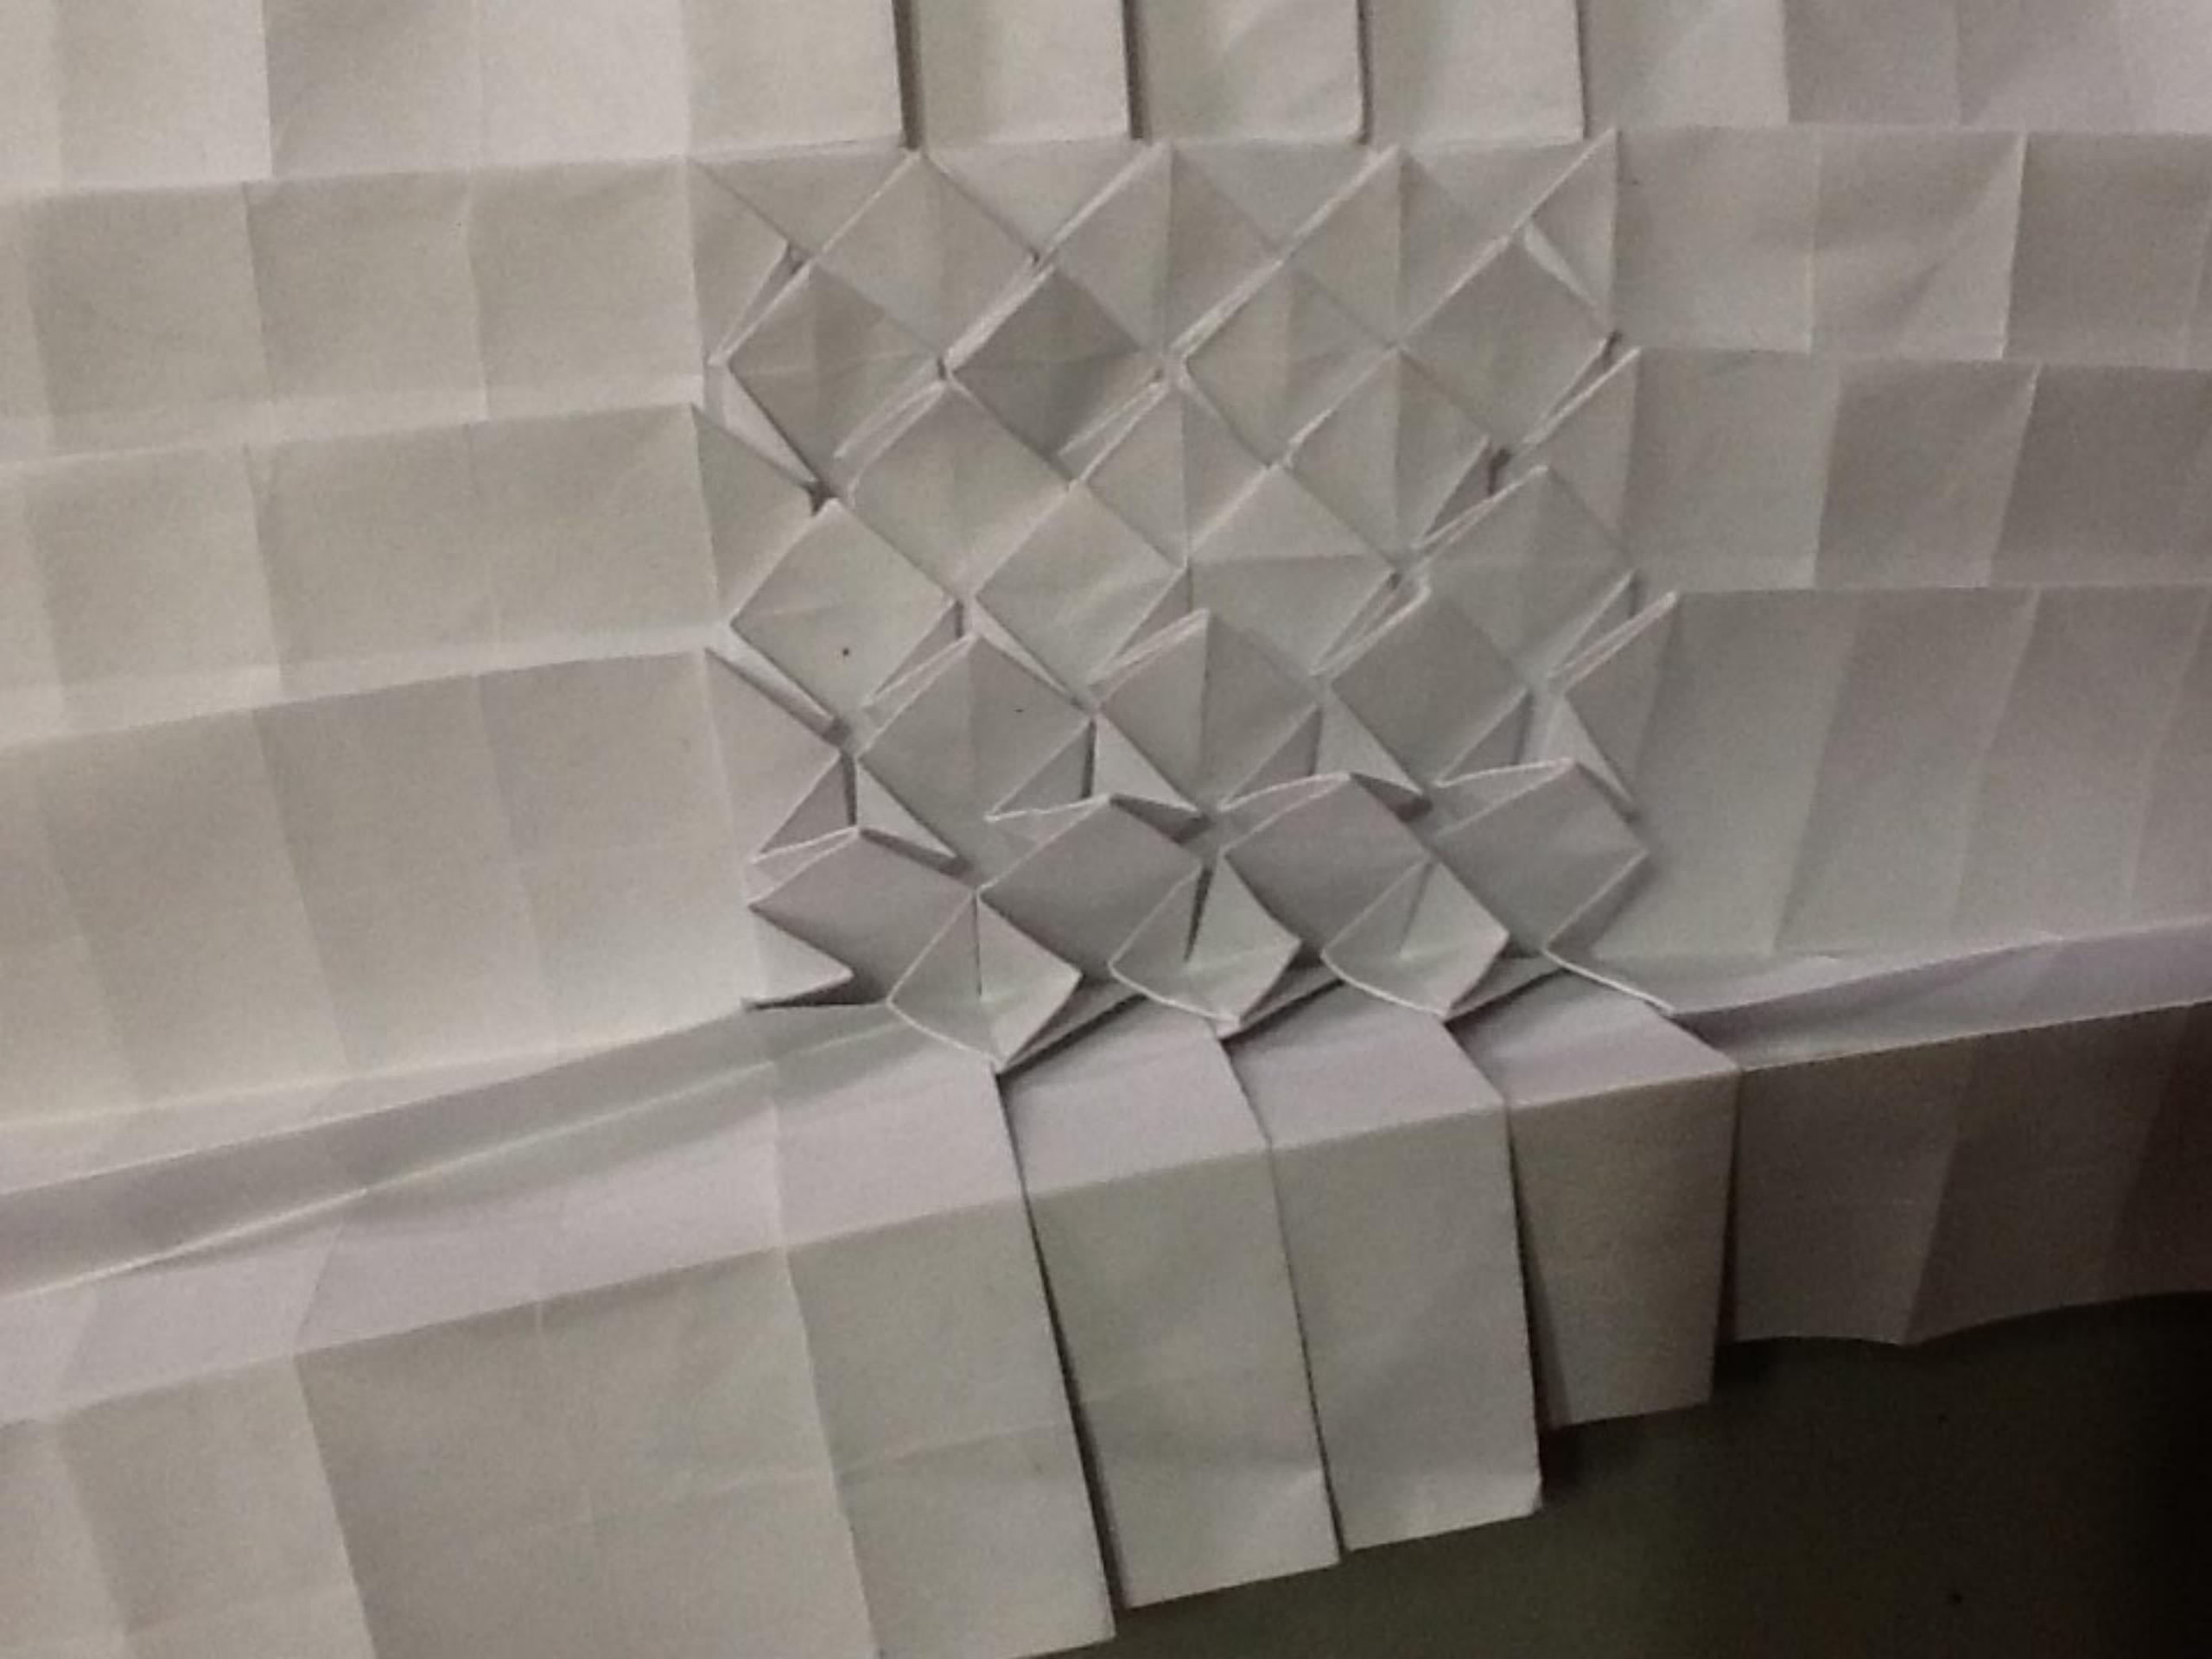

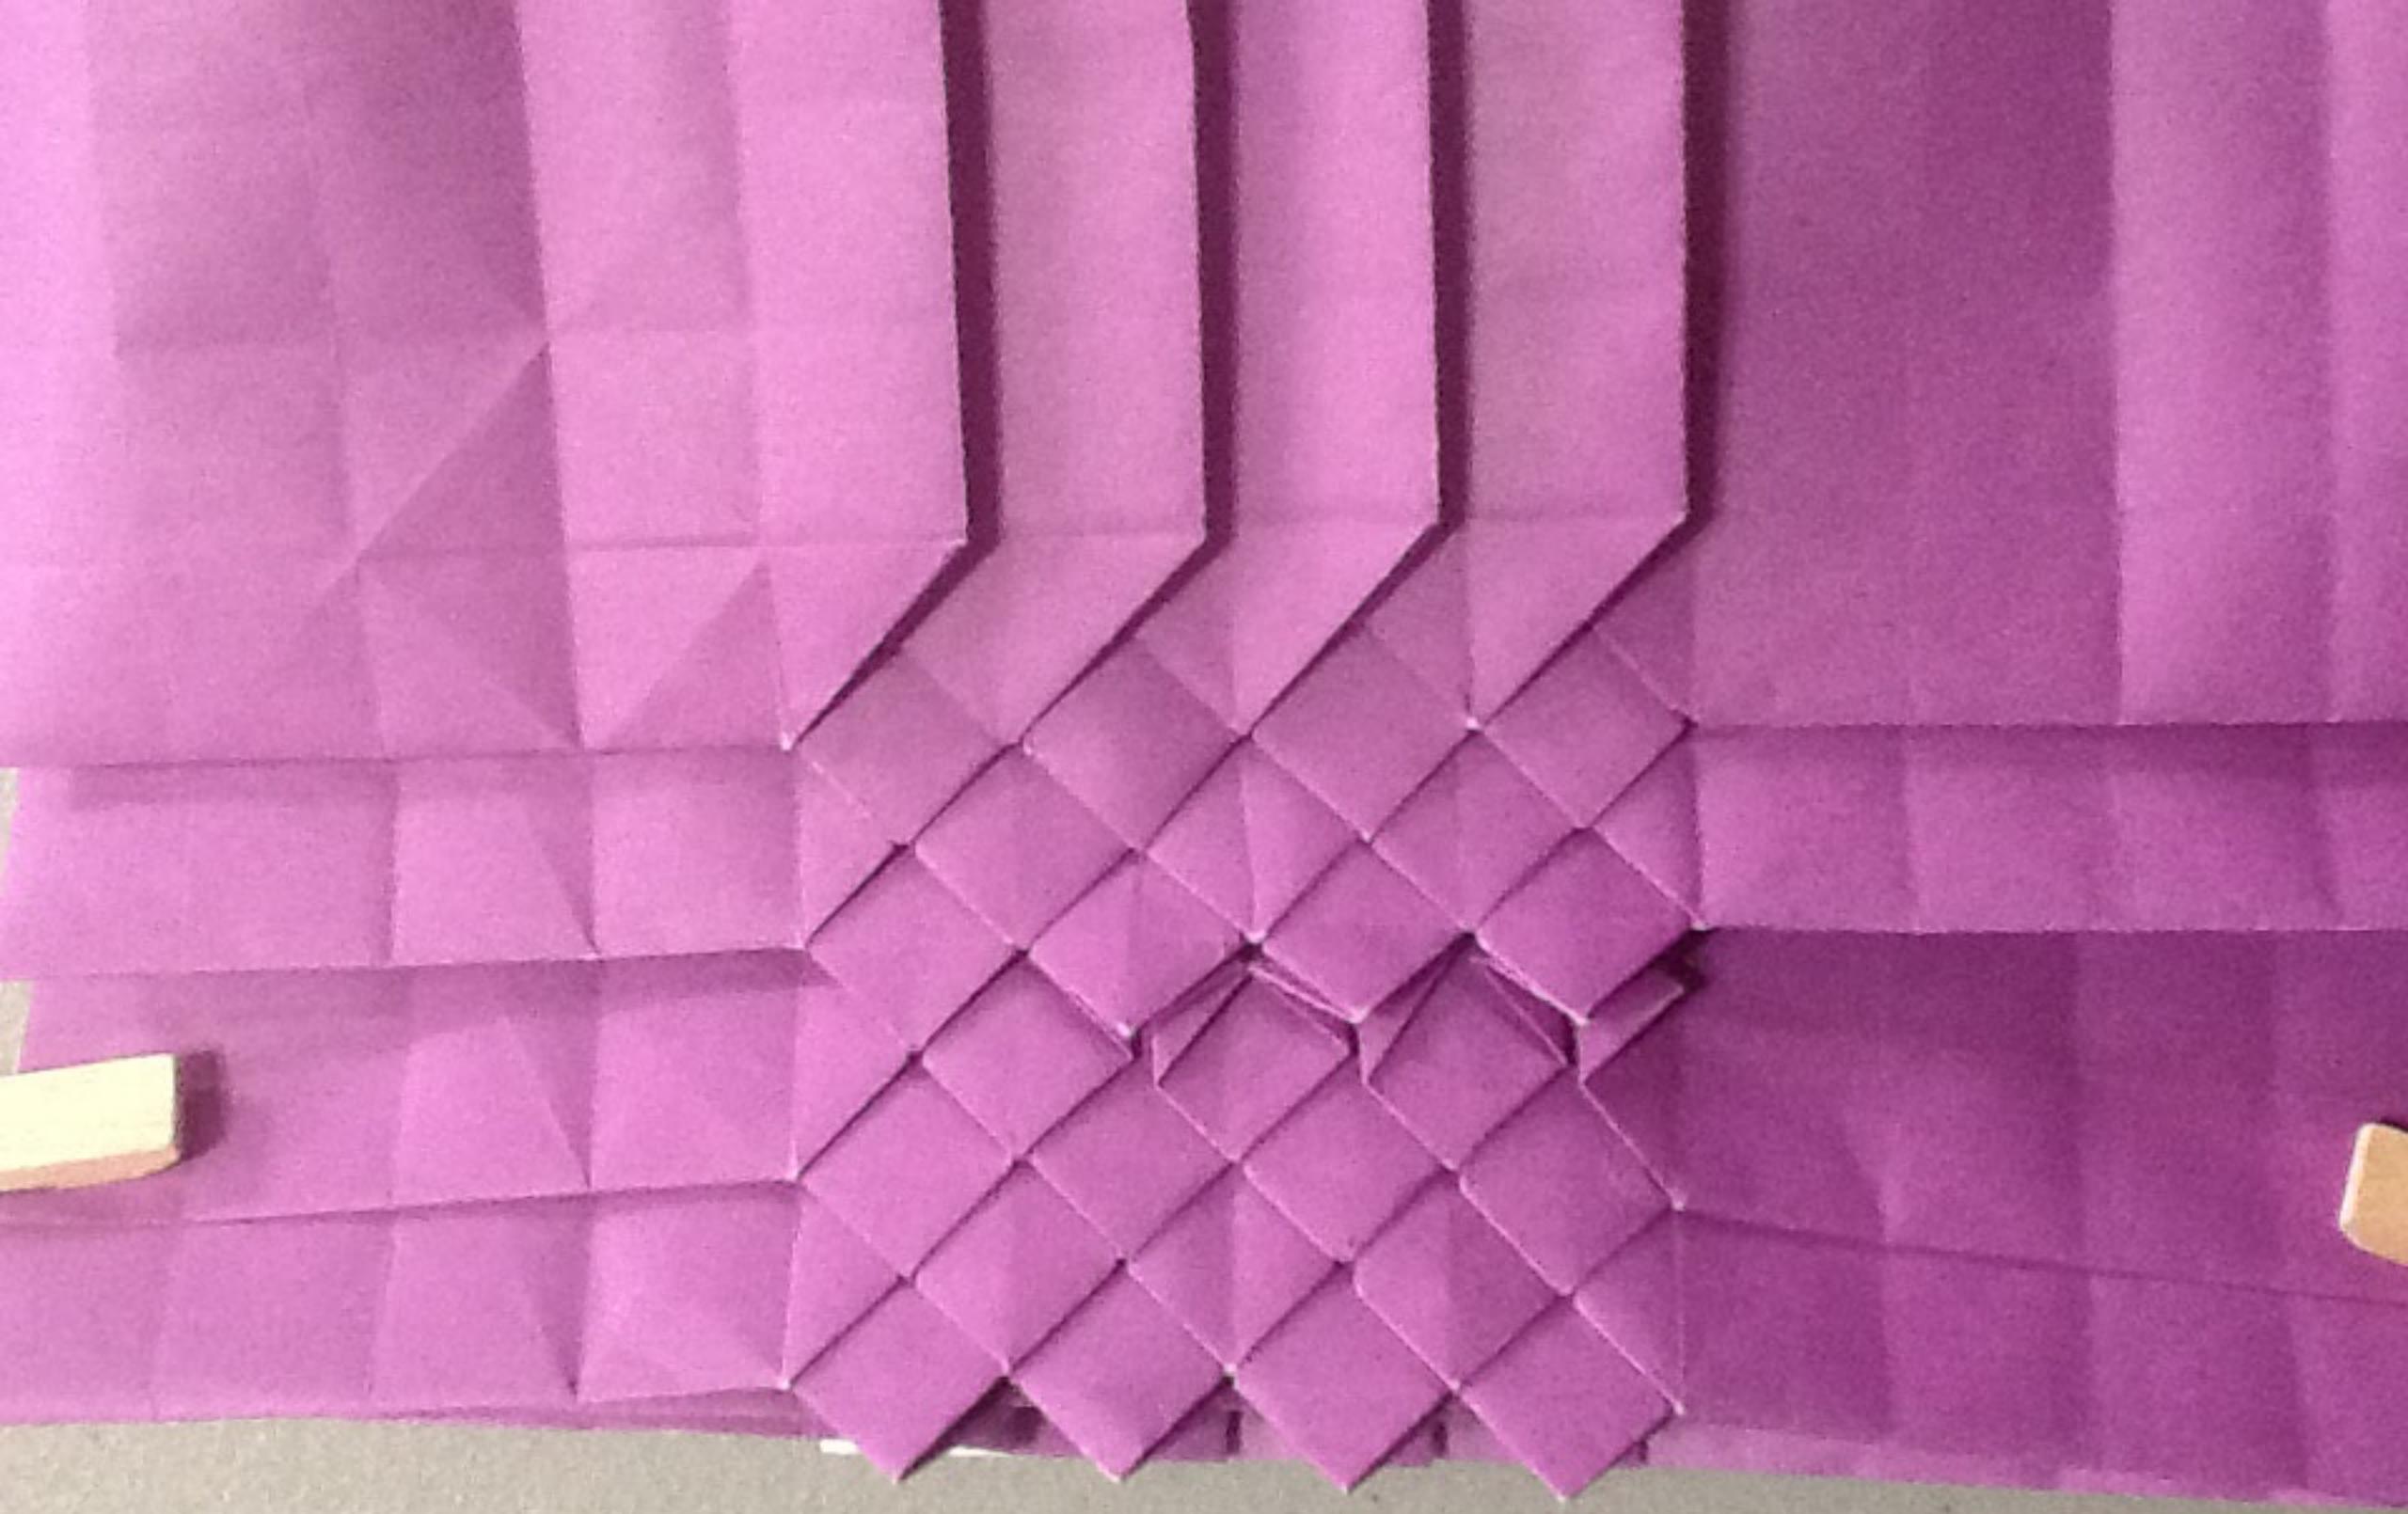

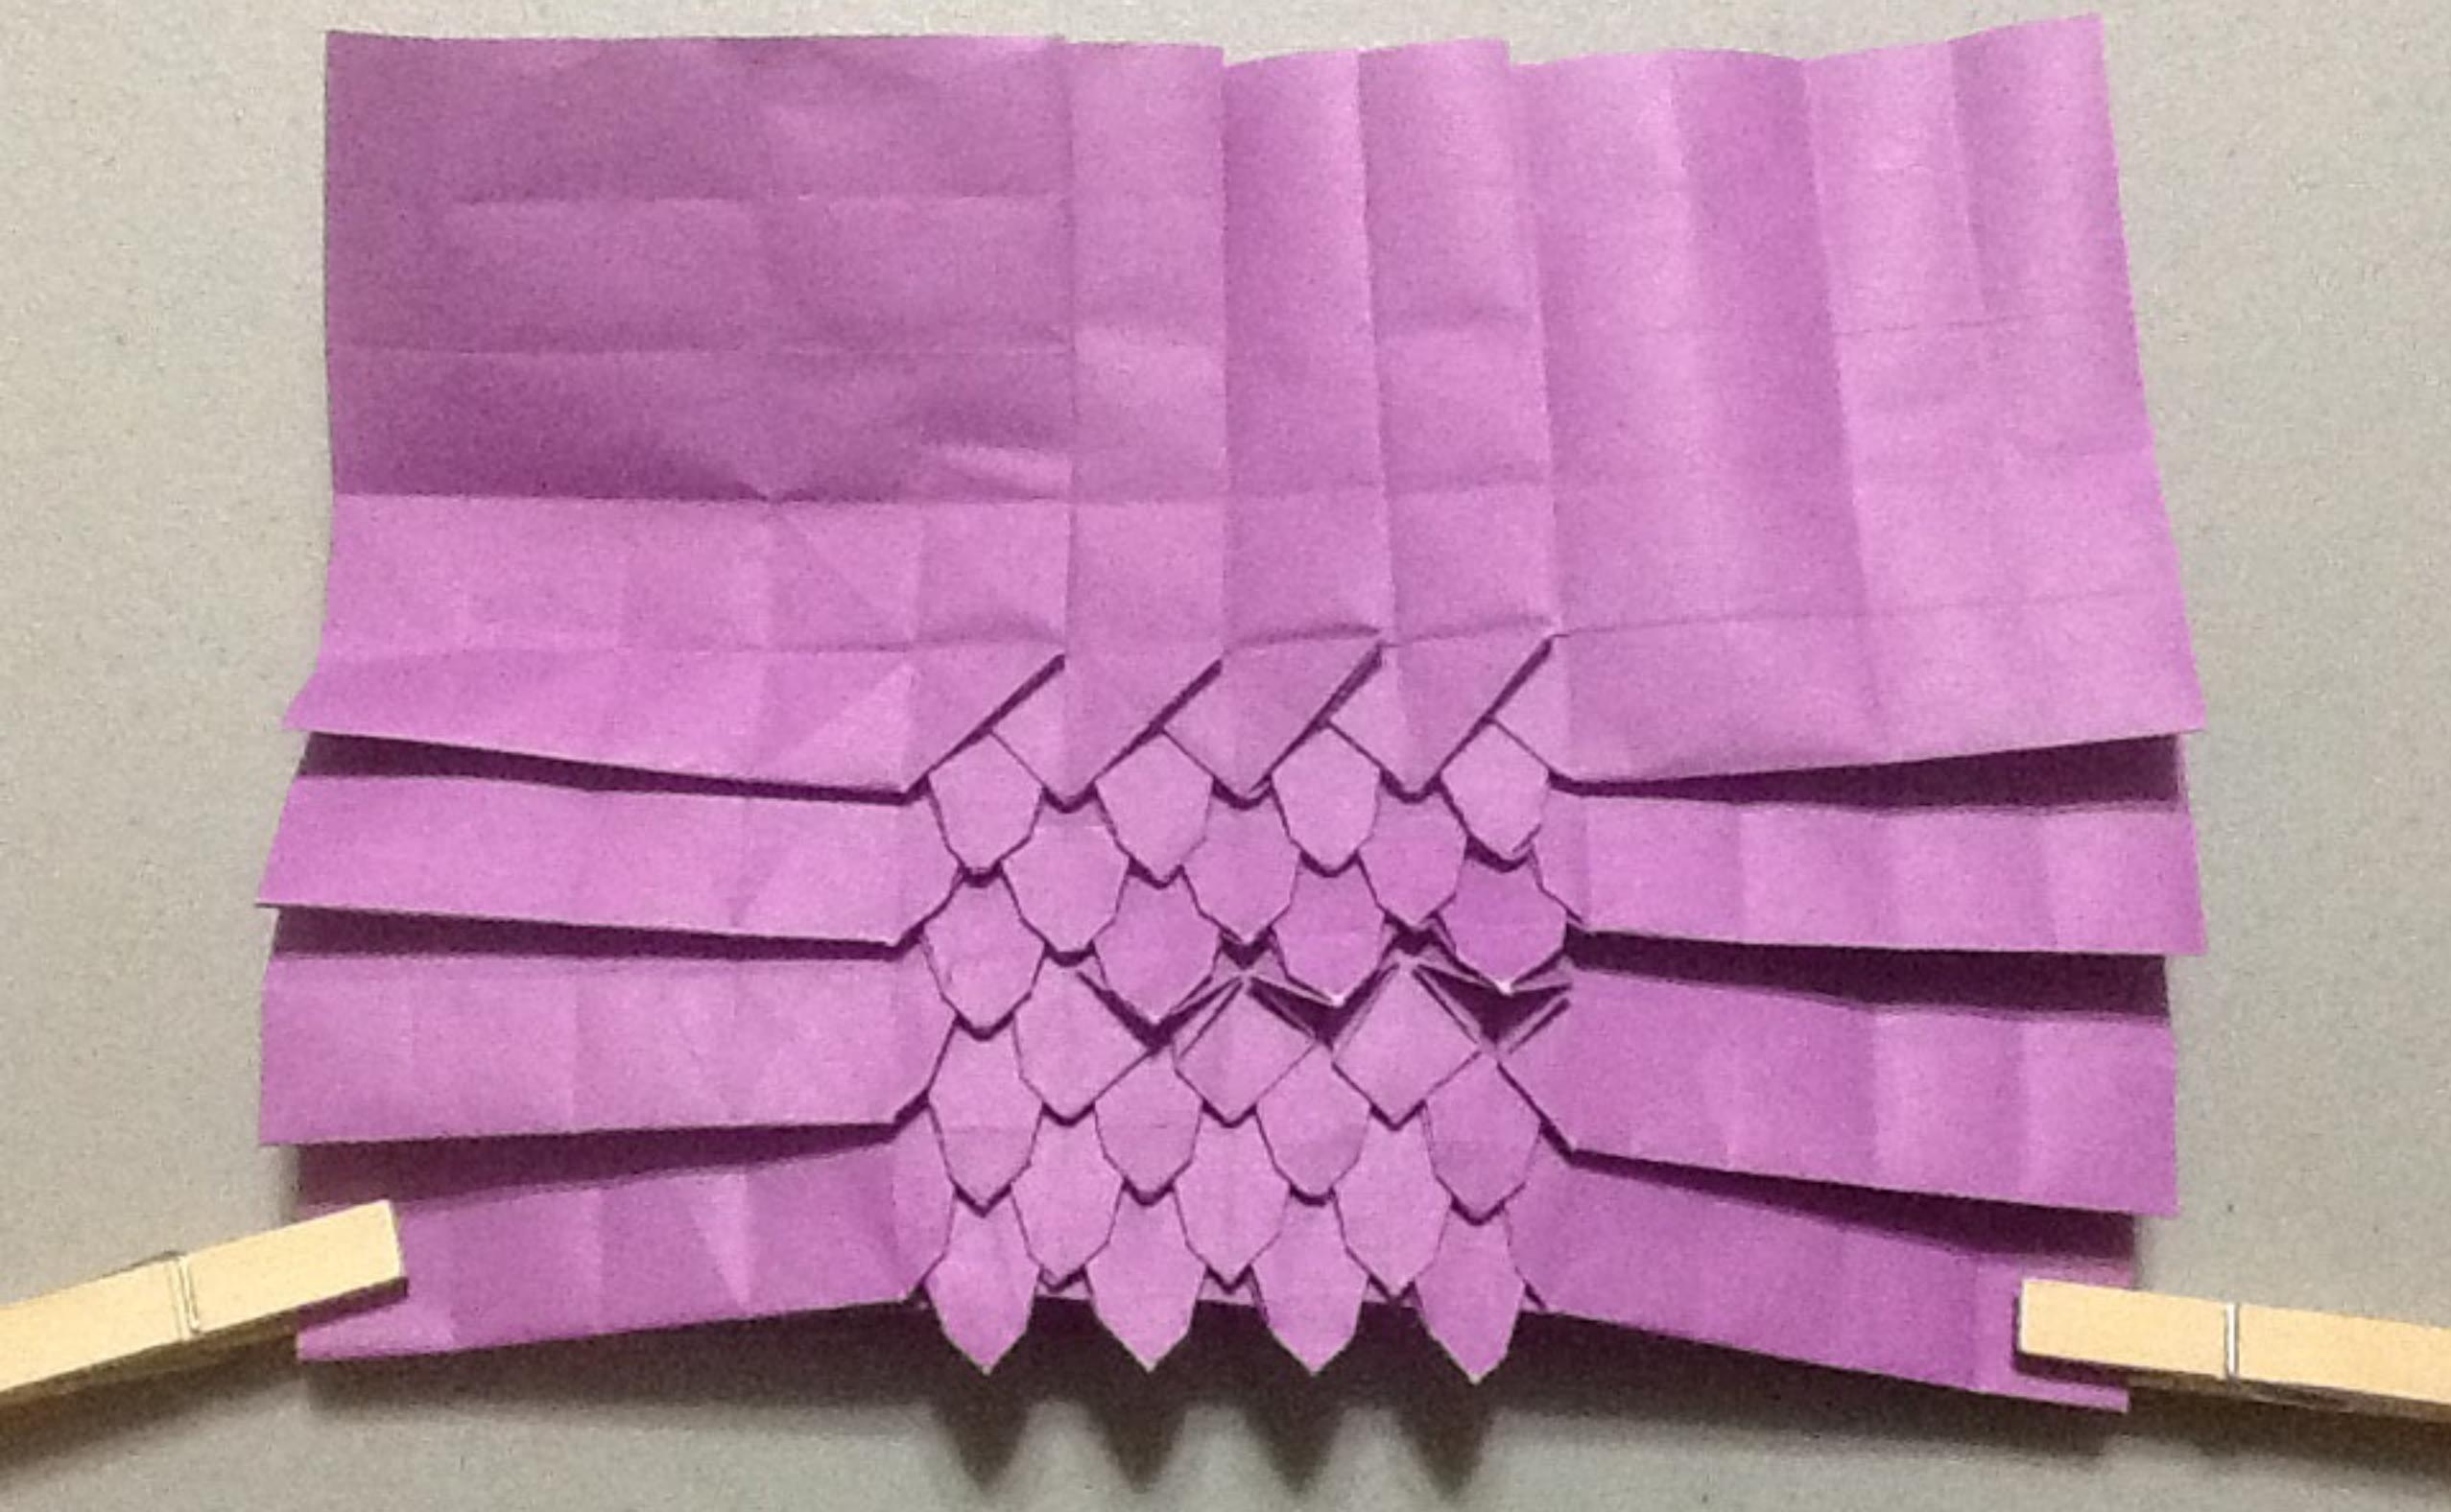

MVC

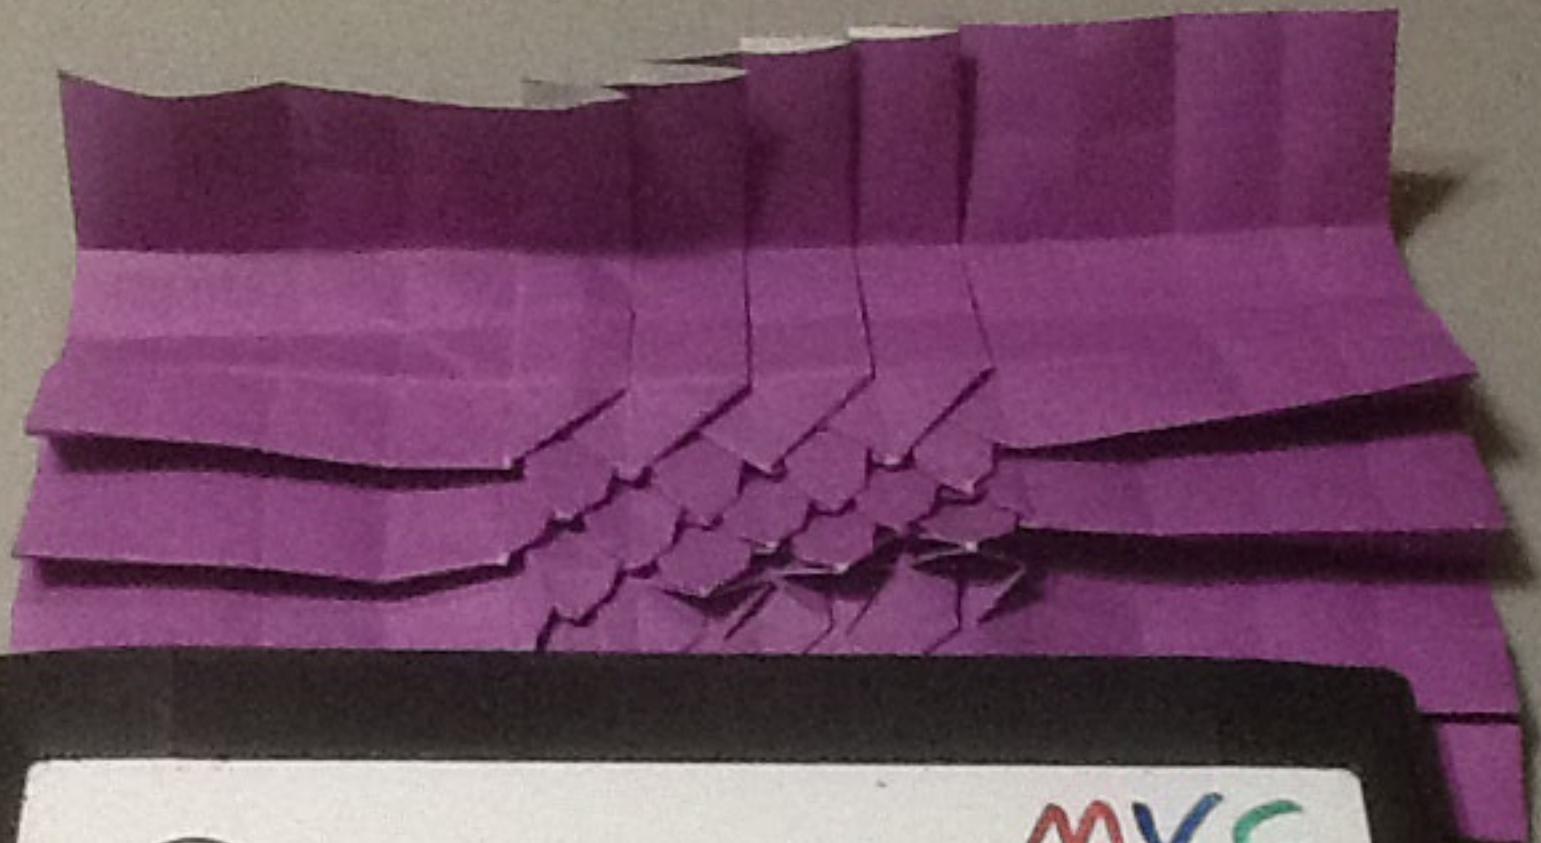

(c)

Now they can
be shaped on
the colored side-

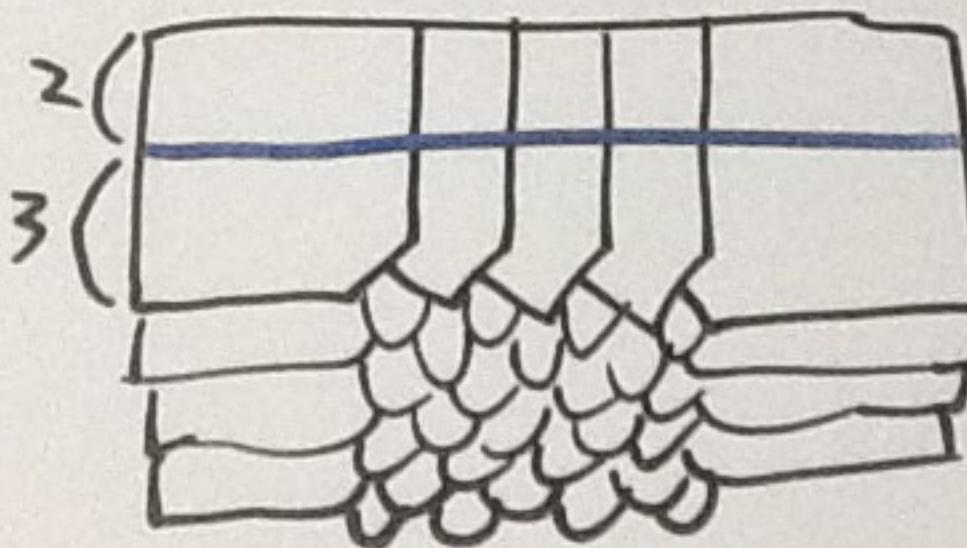

(C)

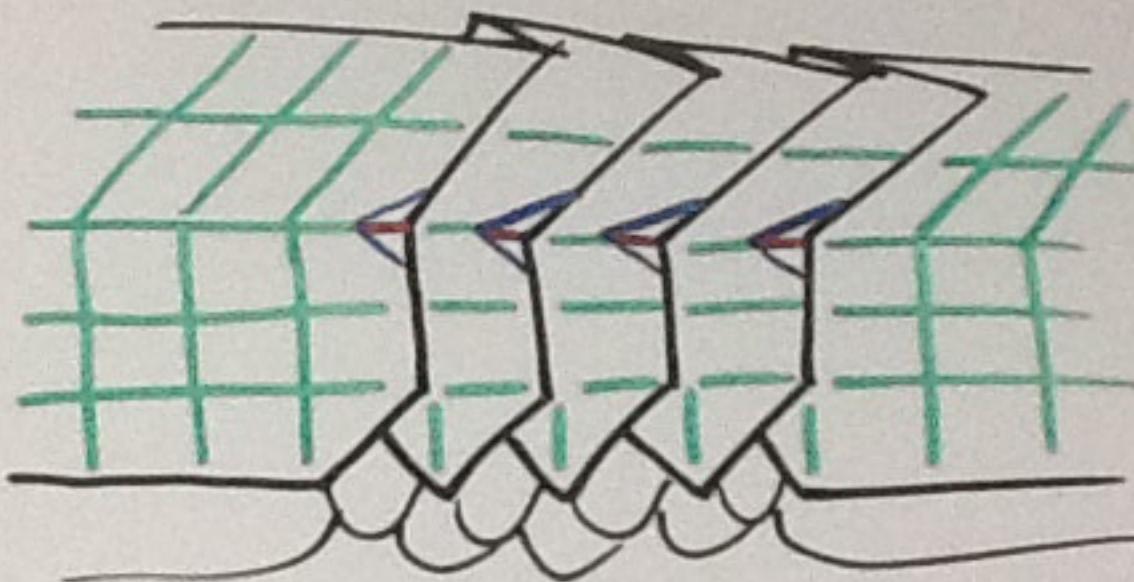

MVC

Fold up halfway

(c)

MVC

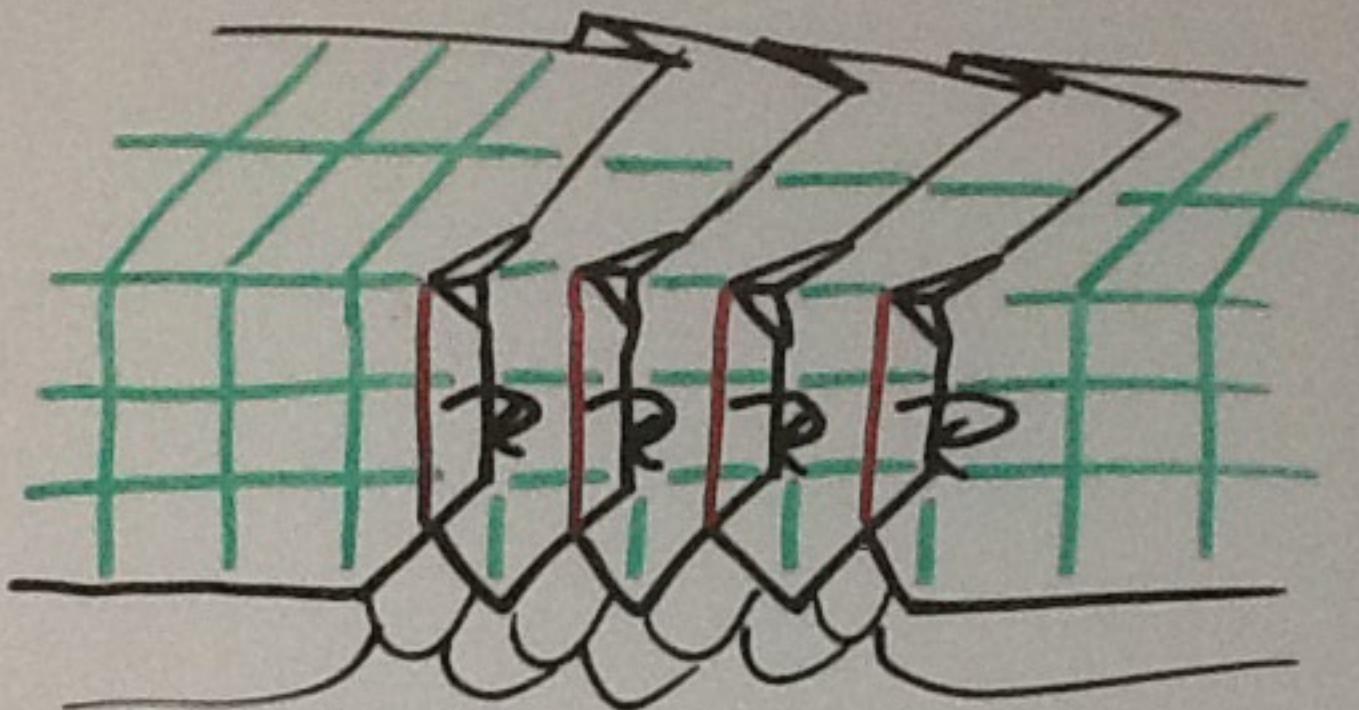

Make four small
reverse folds

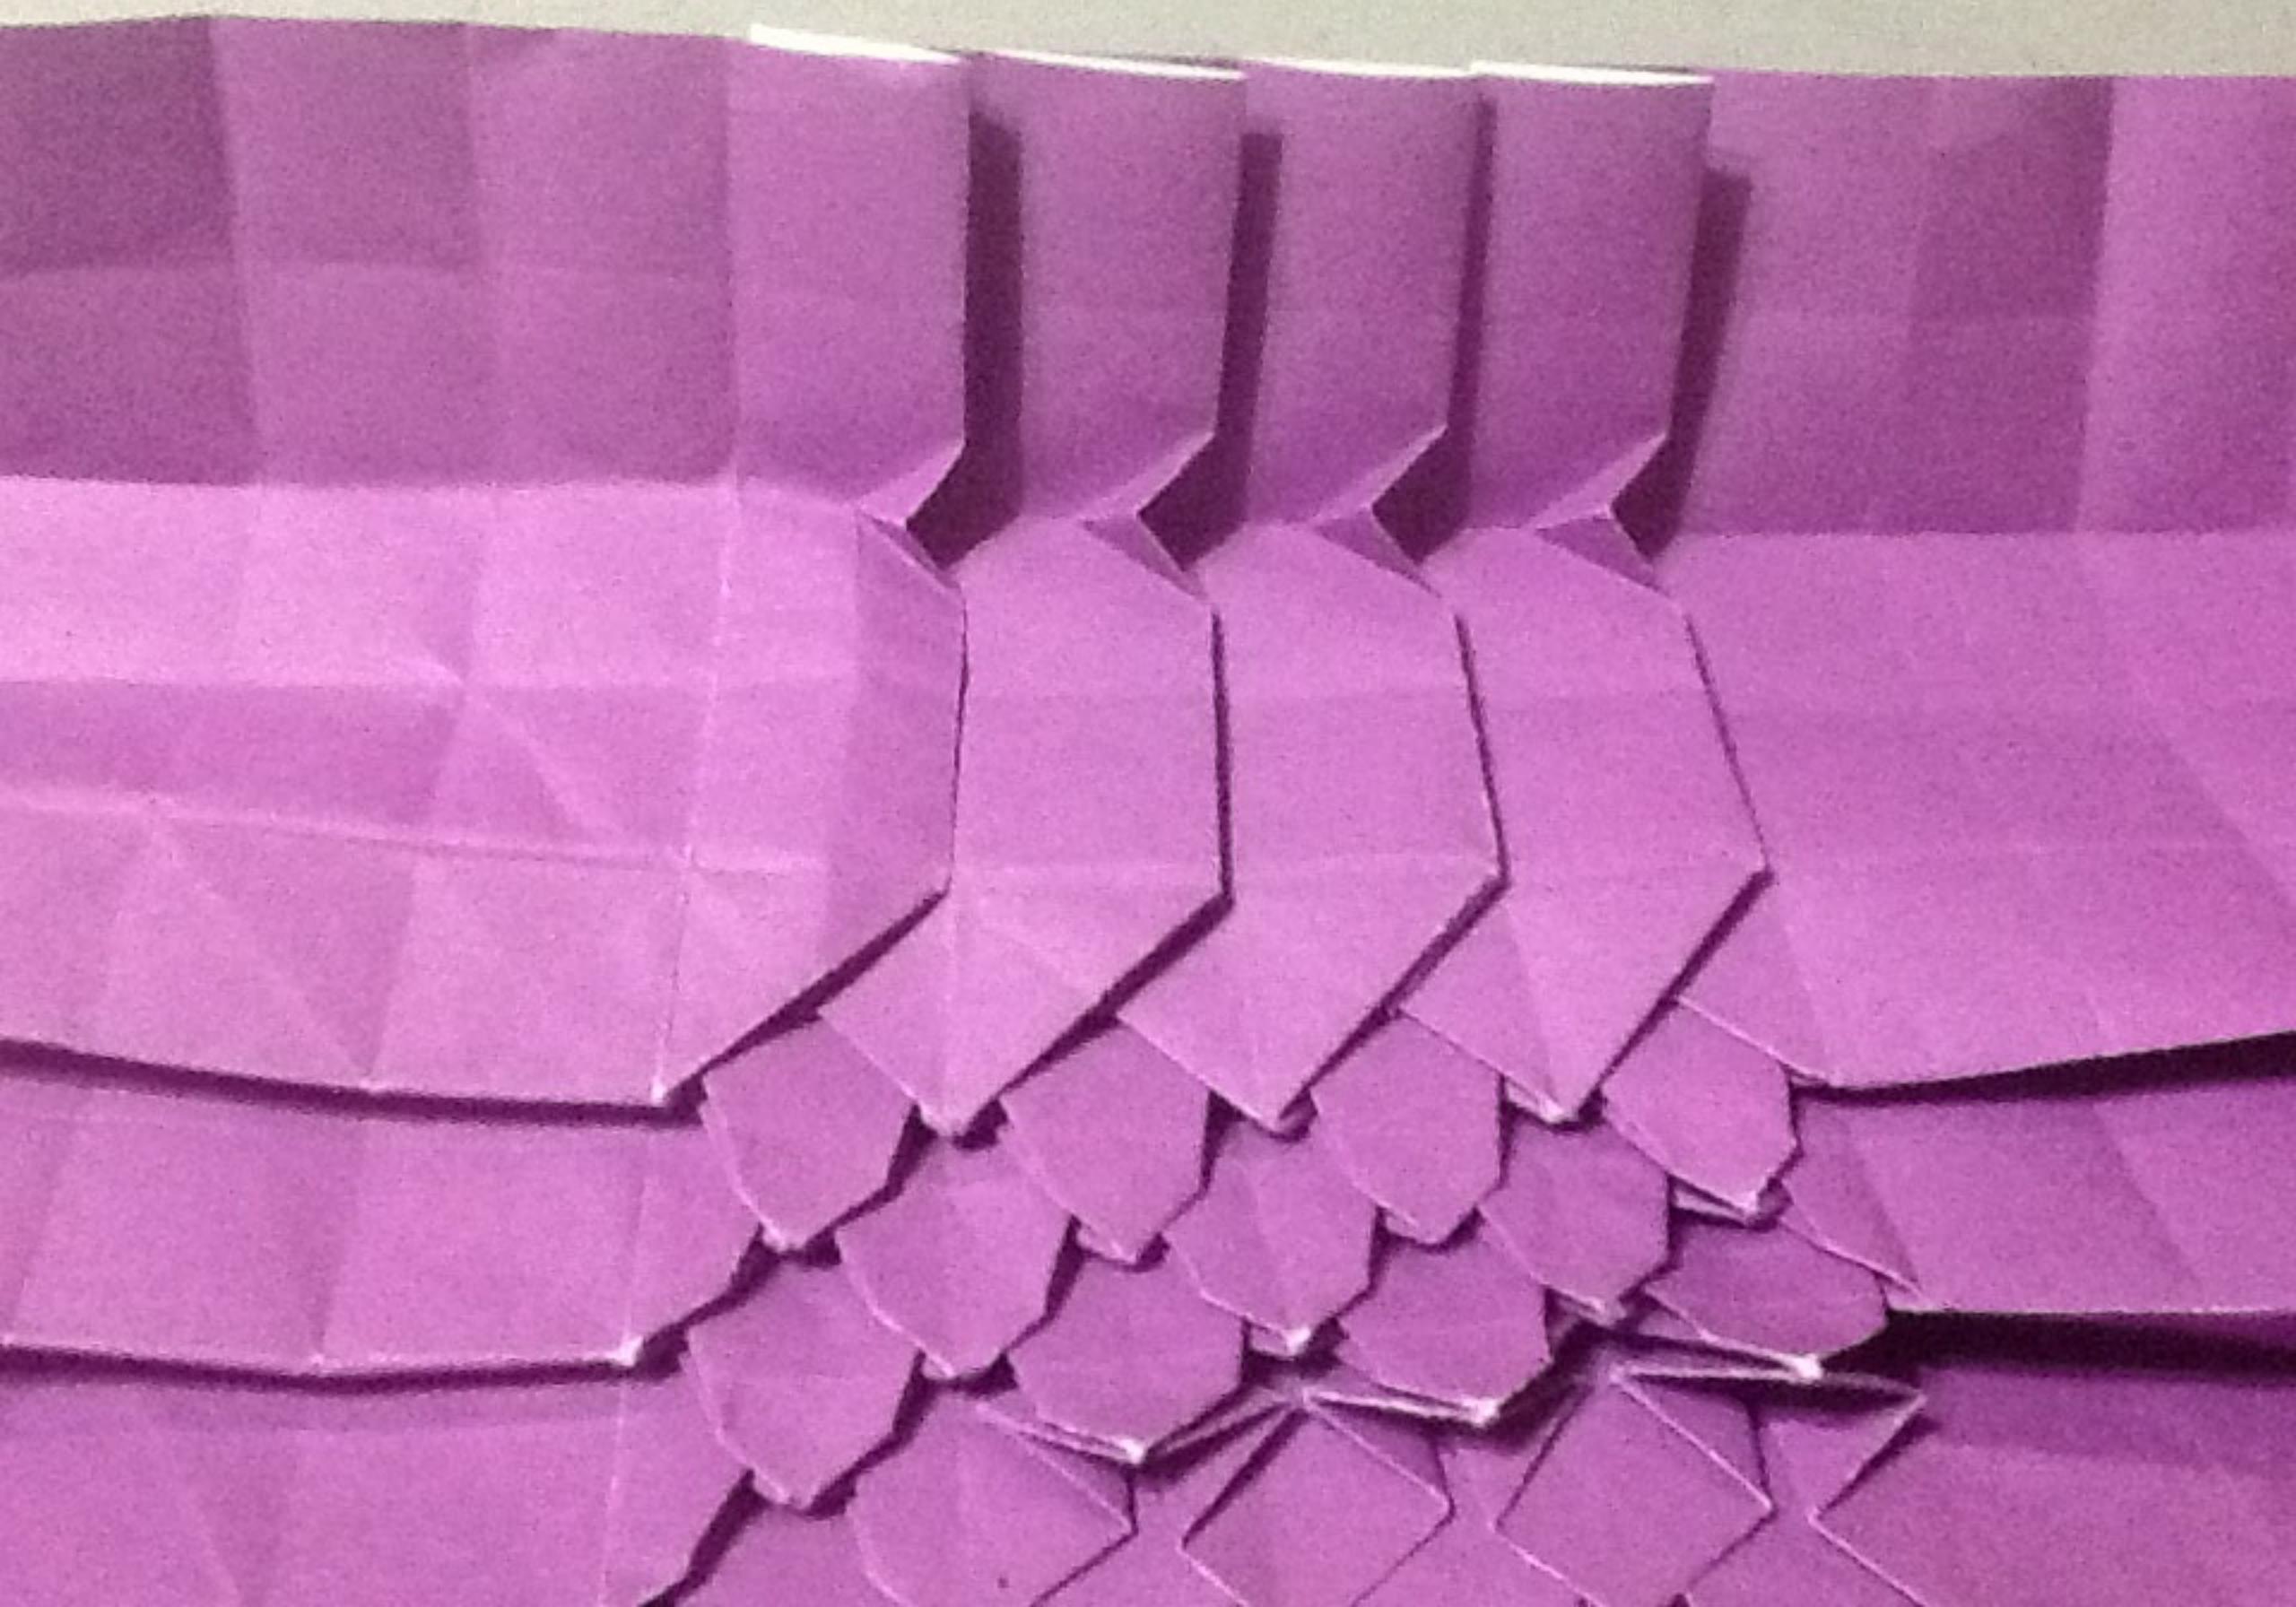

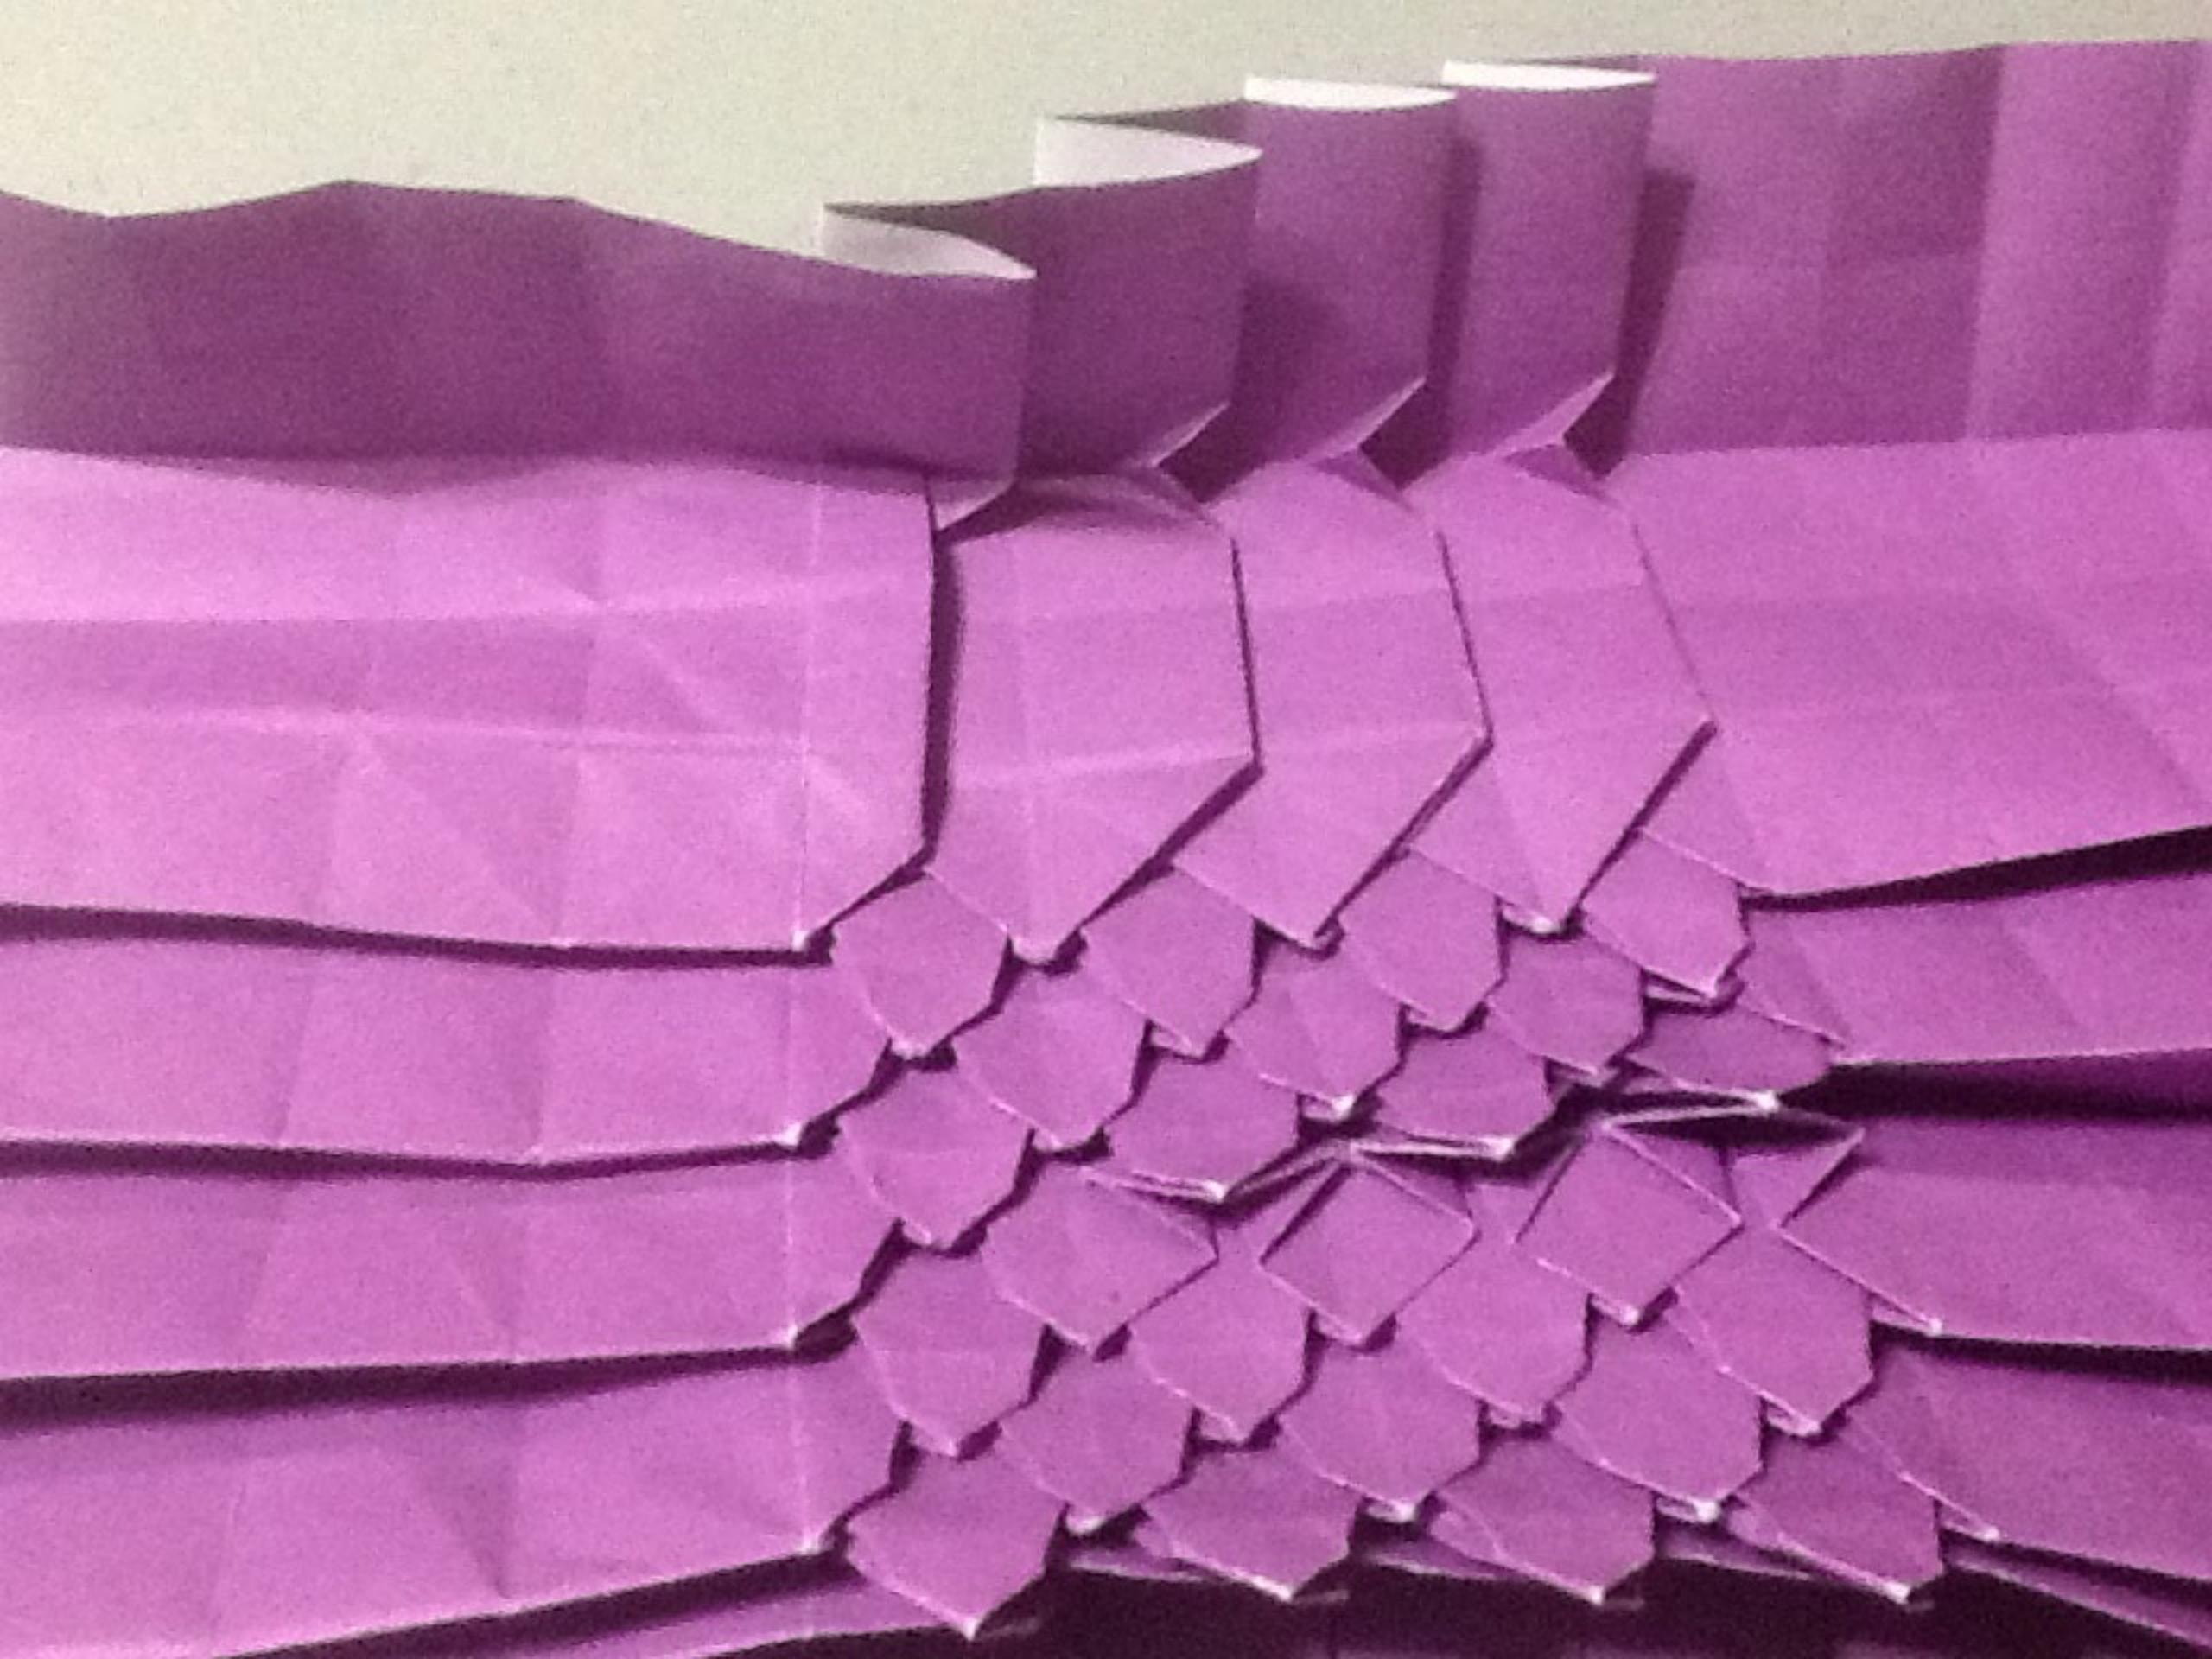

(c)

MVC

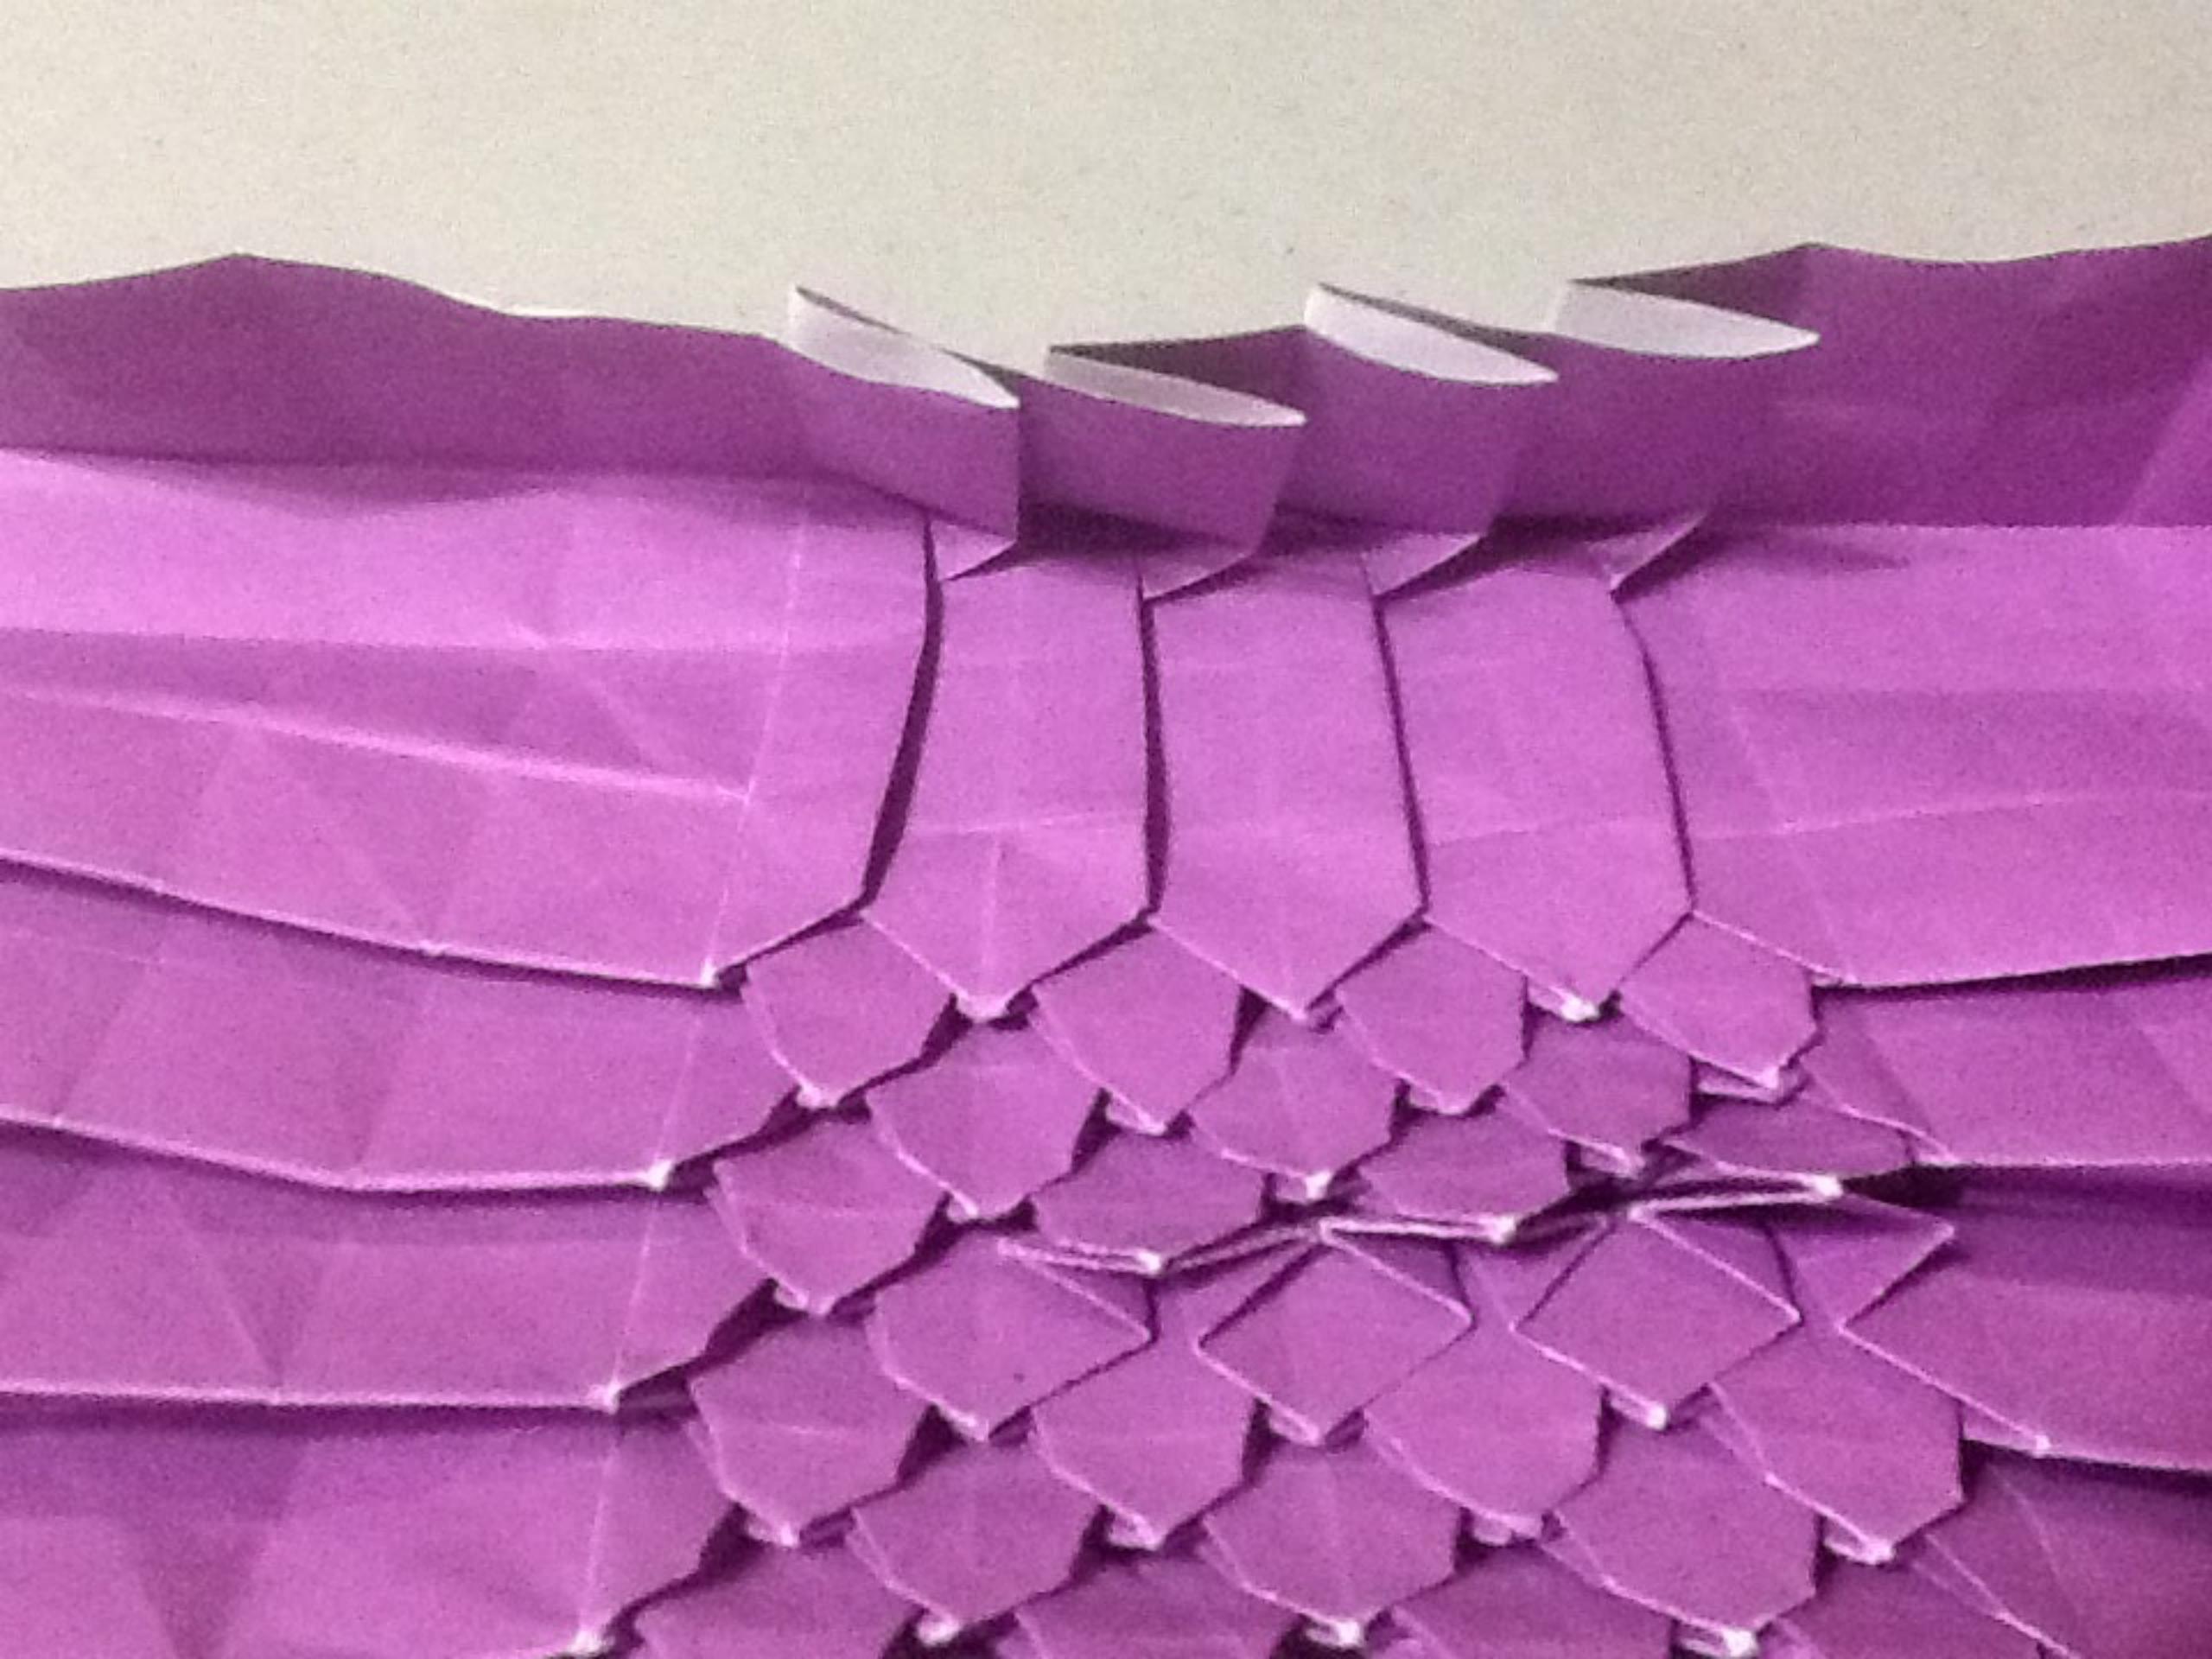

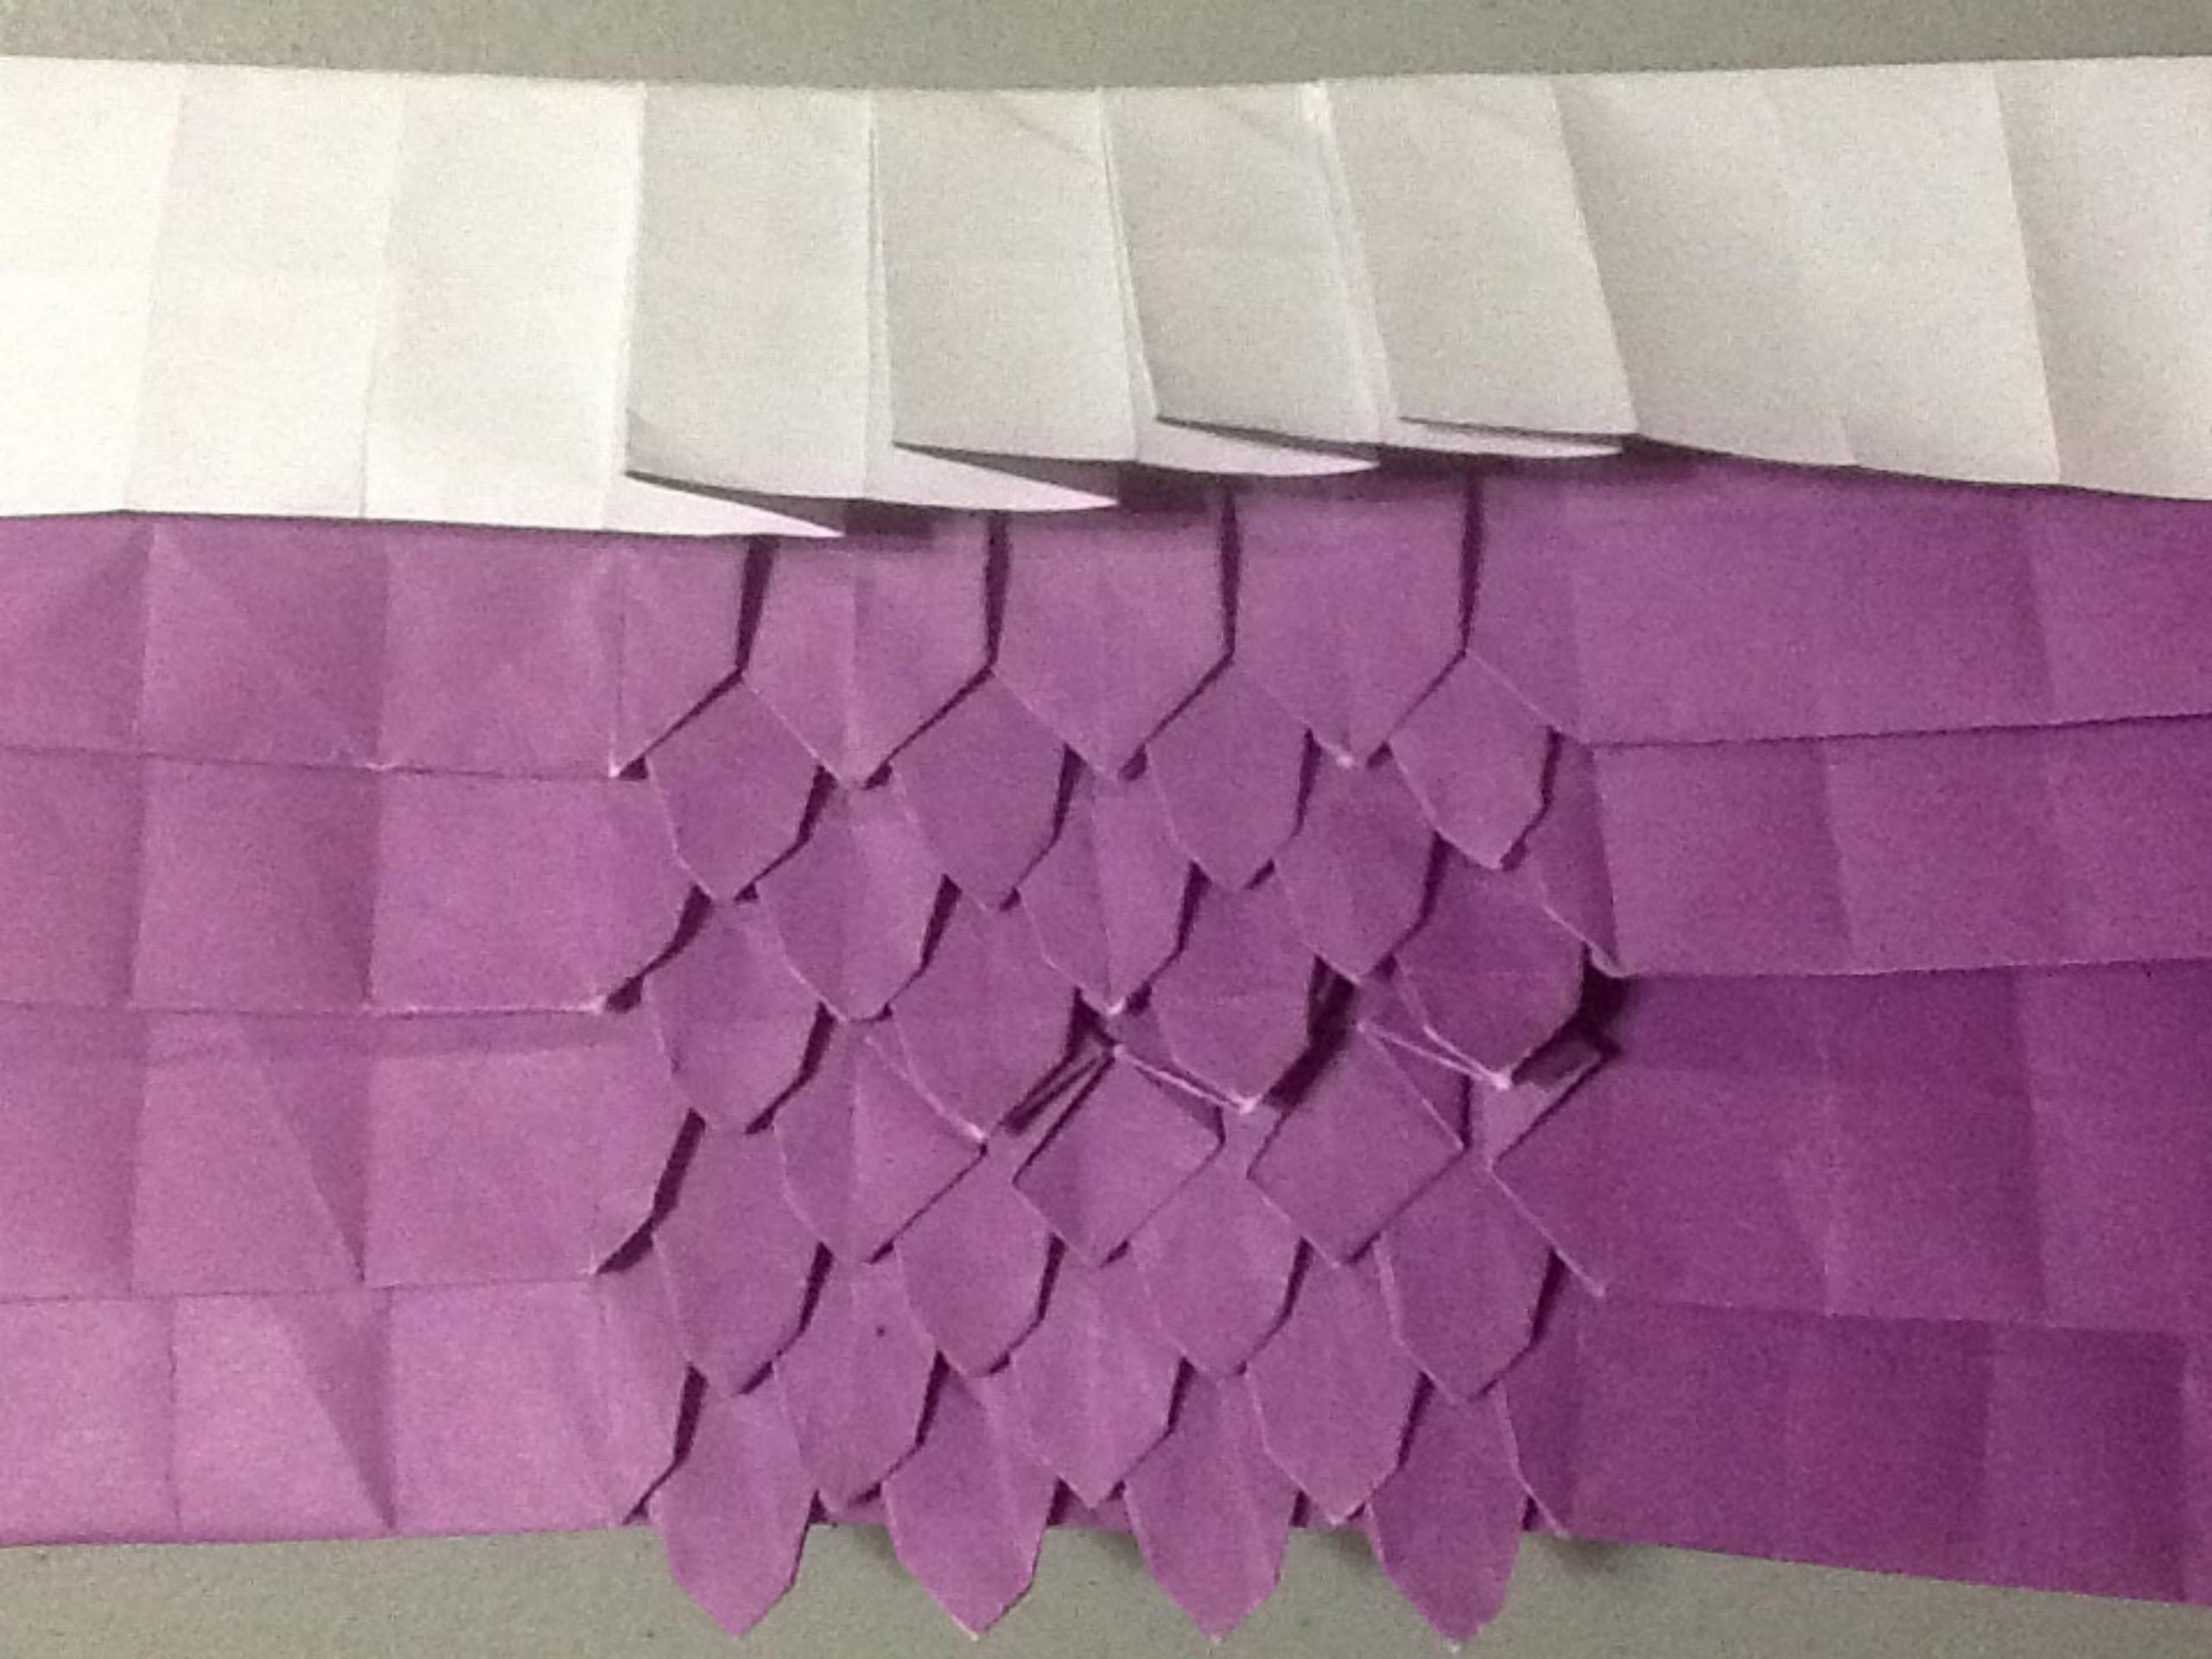

Four mountain folds
to tuck in the sides-

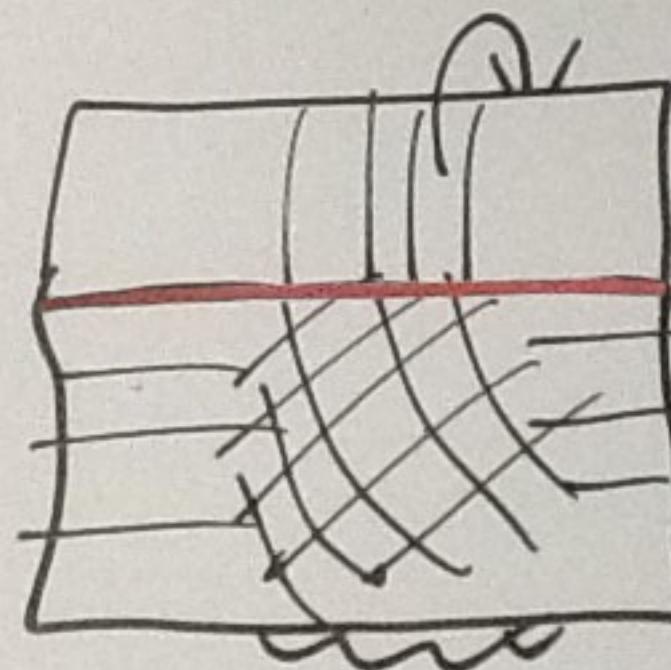

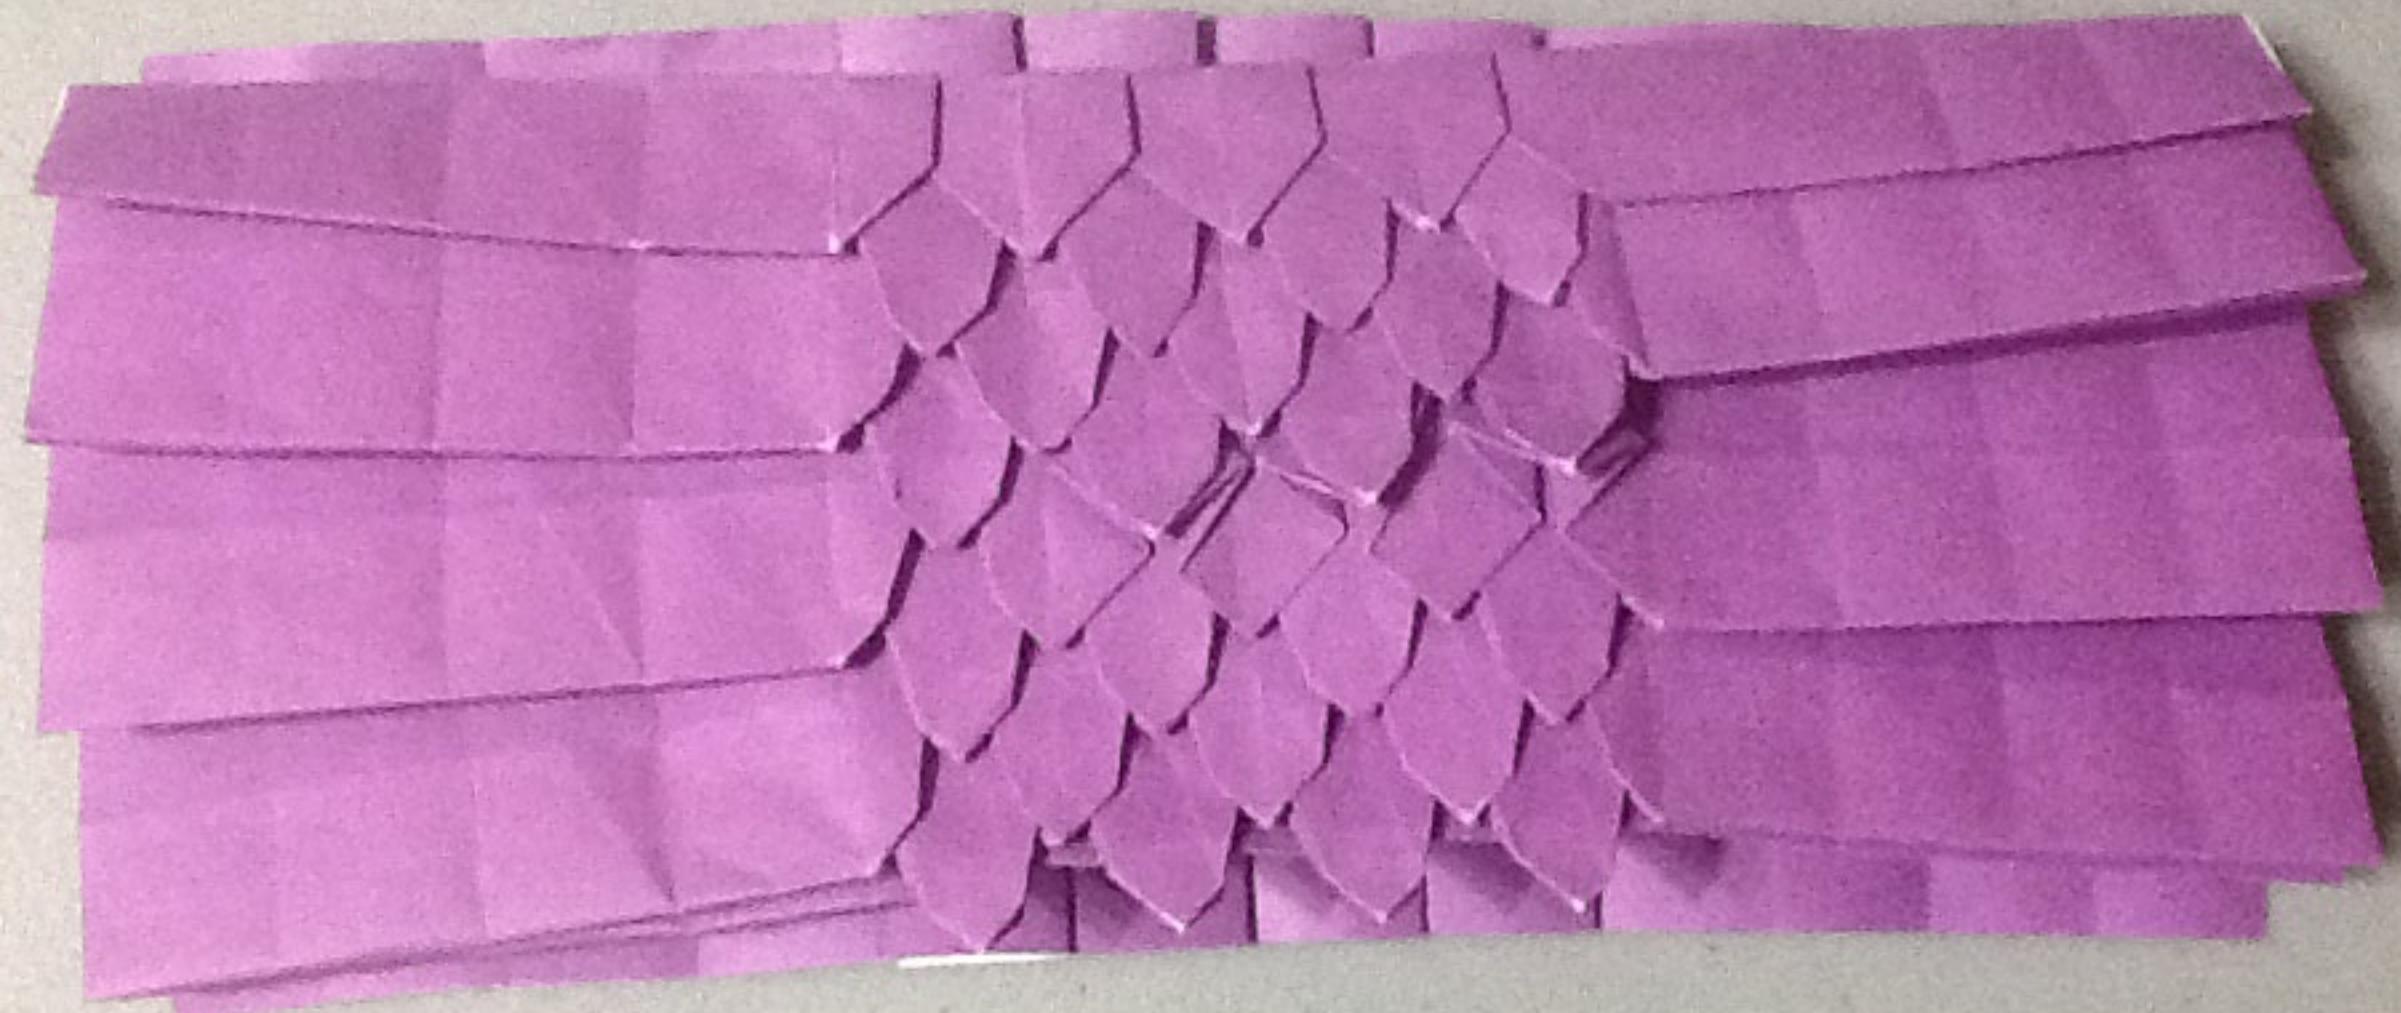

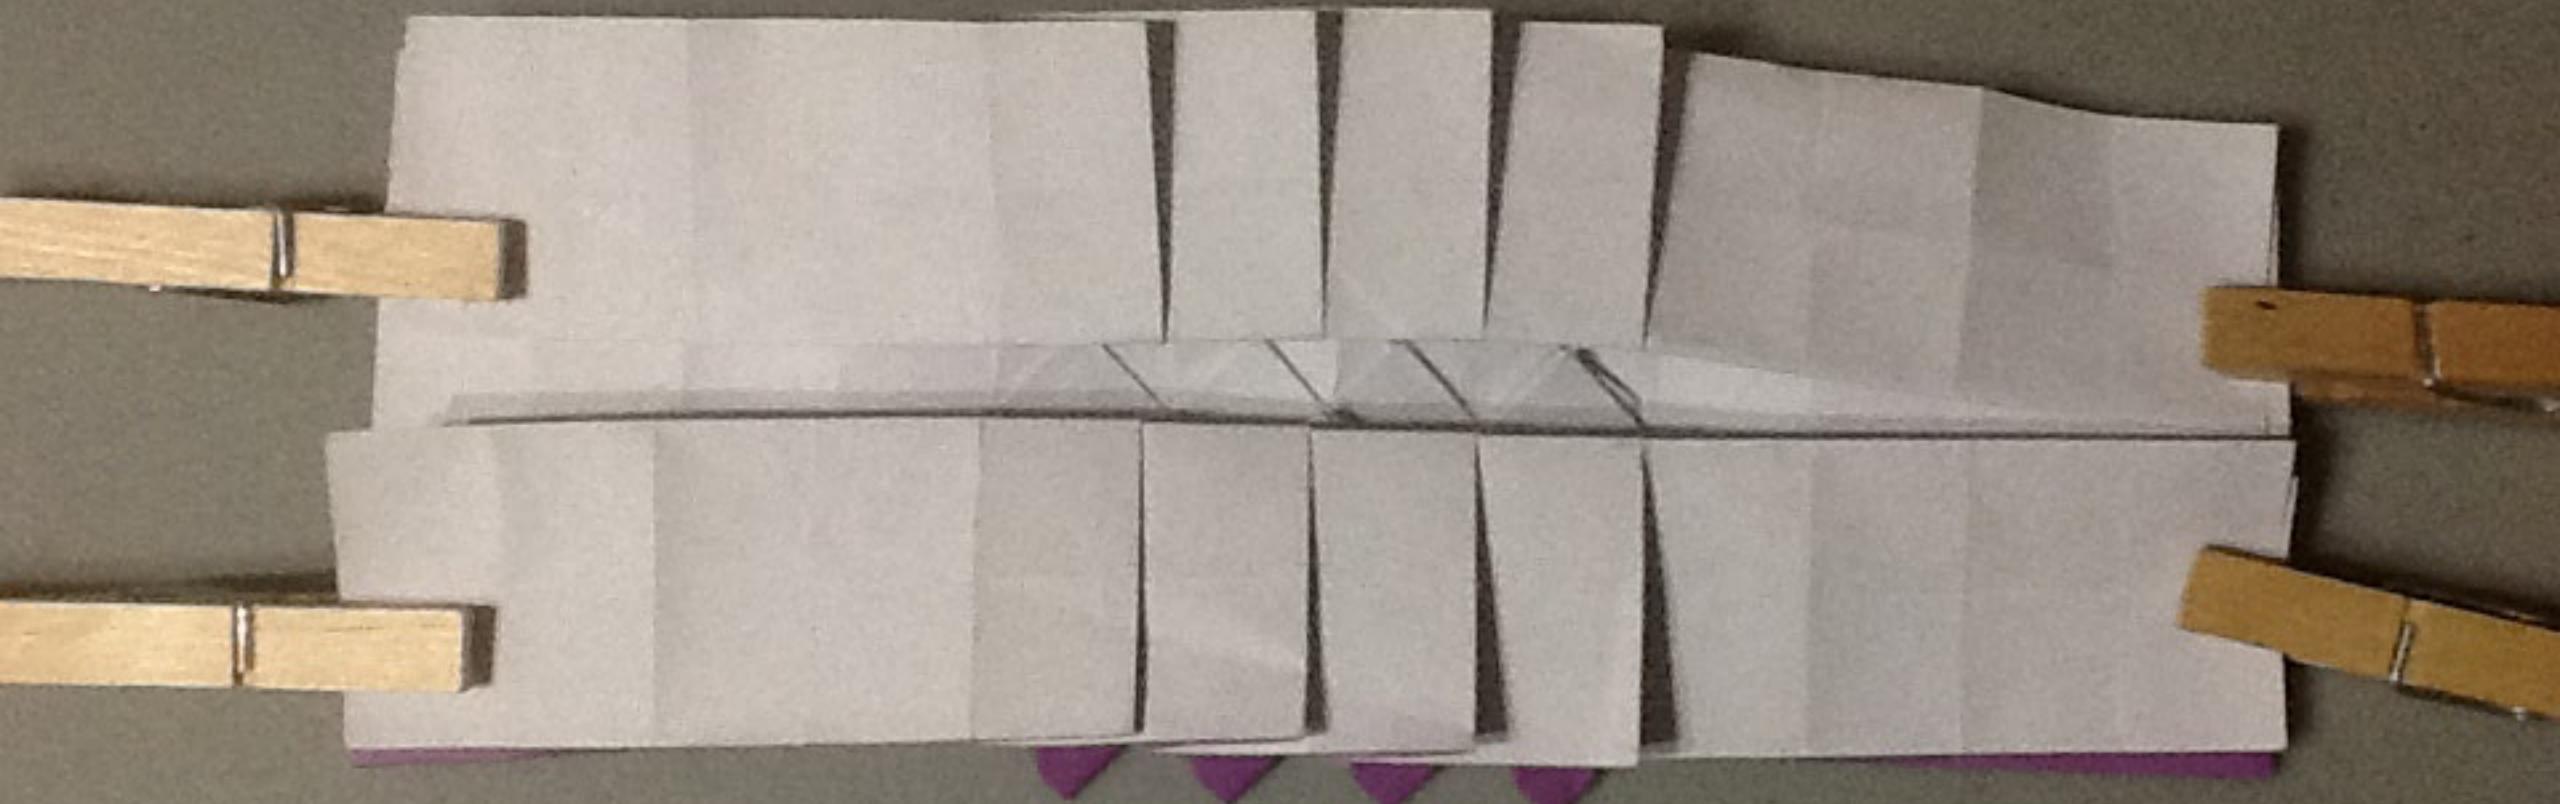

MVC

Fold back

(c)

MVC

Bring out dorsal
spines-
