

DESIGN CHALLENGE

Design a set of visuals for an incoming conference and hackathon.

The events are related to NASA.

The design should be universal and possible to be represented in various media, such as print, video and physical form.

PROPOSAL

Build a design system in which various 3D objects are generated / converted by algorithmic means, and then rendered to have similar aesthetics.

INSPIRATIONS

Paper Galaxy by Reza Ali, Lo-poly art by Tim Reynolds, Sediment Mars by Sarah Hallacher
